**Reliable EAEP2201 Test Sample, New EAEP2201 Exam Labs**

There are rare products which can rival with our products and enjoy the high recognition and trust by the clients like our products. Our products provide the EAEP2201 study materials to clients and help they pass the test EAEP2201 certification which is highly authorized and valuable. Our company is a famous company which bears the world-wide influences and our EAEP2201 Study Materials are recognized as the most representative and advanced study materials among the same kinds of products.

Esri EAEP2201 Certification Exam is a valuable credential for professionals who work in the GIS industry. It is recognized by Esri and its partners as a mark of excellence in enterprise GIS administration, and is a way for professionals to distinguish themselves in a competitive job market. EAEP2201 Exam is challenging, but those who pass it will have the confidence and skills needed to excel in their careers as enterprise GIS administrators.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q15-Q20):

### NEW QUESTION # 15

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Delete users using the Member tab
- B. Batch delete users with ArcPy
- C. Use command line utilities

**Answer: C**

Explanation:

The most efficient and supported method for managing and removing multiple users after a Portal for ArcGIS upgrade is by using command line utilities, specifically the deleteusers utility included with Portal for ArcGIS. This tool allows administrators to batch delete user accounts by referencing a file that lists usernames. This method is especially useful when needing to quickly reduce the number of named users to comply with licensing restrictions.

Deleting users individually via the Member tab (Option B) is time-consuming and inefficient when dealing with large numbers of accounts. Using ArcPy (Option C) is not supported for managing Portal users in bulk.

Reference Source: ArcGIS Enterprise Administrator Guide - Portal for ArcGIS tools and command line utilities

### NEW QUESTION # 16

A portal administrator is trying to enable web-tier authentication (IWA) for the ArcGIS Enterprise portal using Active Directory and IIS.

Steps taken:

- \* Configured portal with Microsoft version of ArcGIS Web Adaptor
- \* Set identity store to Active Directory
- \* Added AD users to the portal
- \* Disabled anonymous access in Portal

Users are not prompted to sign in and are not automatically logged in.

What should the administrator do next?

- A. Enable Windows Authentication in IIS
- B. Assign a default user type to all portal members
- C. Work with the IT department to disable anonymous access to the IIS web server
- D. Refresh user membership in the Portal Administrator Directory

**Answer: C**

Explanation:

When using IWA through the Web Adaptor (IIS), the IIS server itself must be configured to deny anonymous access and allow Windows Authentication. Simply disabling anonymous access within the Portal settings is not enough.

From Esri's web-tier authentication guide:

"For IWA to function as expected, anonymous access must be disabled in IIS for the ArcGIS Web Adaptor, and Windows Authentication must be enabled. If IIS still allows anonymous access, users will bypass authentication prompts."

- \* Option B is irrelevant here-user types don't affect login behavior.
- \* Option C is a content sync feature, not related to authentication.
- \* Option D (Enable Windows Authentication) is correct only if it hasn't already been done, but the missing step is disabling anonymous

accessin IIS.

Reference: ArcGIS Enterprise - Configuring Web-Tier Authentication with IIS

#### NEW QUESTION # 17

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Open ArcGIS Server statistics to create a report for commonly used items.
- B. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- C. Run usage reports in Portal for ArcGIS to determine the effect on the organization.

**Answer: A**

#### NEW QUESTION # 18

An organization configures an ArcGIS Enterprise portal to allow single sign-on using Integrated Windows Authentication (IWA). Configuration includes:

\* All accounts in the Active Directory group gisusers are added to the portal

\* Existing users can sign in without entering credentials. However, new employees assigned to the same gisusers group cannot log in, create content, or join groups. What is causing this issue for the new employees?

- A. The Web Adaptor cache must be cleared
- B. Their Active Directory accounts have been assigned an incompatible default user type
- C. Their Active Directory accounts have not had sufficient time to sync to the portal
- D. Their Active Directory accounts have not been added to the portal

**Answer: D**

Explanation:

For IWA authentication, Active Directory users are not automatically added to the ArcGIS Enterprise portal.

They must either be:

\* Manually added as members, or

\* Automatically created at first login if auto-creation is enabled.

Since the new users are assigned to the gisusers group but cannot sign in or create content, it's clear that their accounts have not yet been added to the portal.

From ArcGIS Enterprise documentation:

"Integrated Windows Authentication (IWA) allows users to sign in with their Windows credentials. However, users must still be members of the portal. You can manually add users or enable automatic account creation during login."

\* Option B is invalid since default user type settings do not prevent login.

\* Option C is incorrect because synchronization is not time-based—it's account-creation dependent.

Reference: ArcGIS Enterprise - Managing Portal Members and Identity Store Integration

#### NEW QUESTION # 19

A GIS administrator needs to change the ownership of a shared update group to a different user. The administrator receives an error message: "Unable to reassign the group at this time." What is causing this error?

- A. It is not possible to reassign ownership of shared update groups
- B. The sharing settings on the group are configured incorrectly
- C. The user does not have the correct privileges

**Answer: A**
