Authoritative Latest 300-620 Test Format Supply you Trusted Advanced Testing Engine for 300-620: Implementing Cisco Application Centric Infrastructure to Prepare easily

Making right decision of choosing useful 300-620 practice materials is of vital importance. Here we would like to introduce our 300-620 practice materials for you with our heartfelt sincerity. With passing rate more than 98 percent from exam candidates who chose our 300-620 Study Guide, we have full confidence that your 300-620 actual test will be a piece of cake by them. Don't hesitate, you will pass with our 300-620 exam questions successfully and quickly.

Cisco 300-620 Certification Exam is designed to test the knowledge and skills of IT professionals who are responsible for designing, deploying, and managing Cisco Application Centric Infrastructure (ACI) solutions. ACI is a comprehensive solution for building agile, secure, and scalable data center networks that can support modern applications and services.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q238-Q243):

NEW QUESTION # 238

An administrator must migrate the vSphere Management VMkernel of all ESXi hosts in the production cluster from the standard default virtual switch to a VDS that is integrated with APIC in a VMM domain.

Which action must be completed in this scenario?

- A. The VMkernel Management BD must be located under the Management Tenant.
- B. The administrator must create an in-band VMM Management EPG before performing the migration.
- C. The administrator must set the Management VMkernel BD resolution immediacy to On-Demand.
- **D. The Management VMkernel EPG resolution must be set to Pre-Provision.**

Answer: D

NEW QUESTION # 239

A customer is deploying a new application across two ACI pods that is sensitive to latency and jitter. The application sets the DSCP values of packets to AF31 and CS6, respectively. Which configuration changes must be made on the APIC to support the new application and prevent packets from being delayed or dropped between pods?

- A. disable DSCP translation policy
- B. align the custom QoS policy on the EPG site in the customer tenant
- C. disable DSCP mapping on the IPN devices
- D. align the ACI QoS levels and IPN QoS policies

Answer: D

Explanation:

To support a new application that is sensitive to latency and jitter and sets the DSCP values of packets to AF31 and CS6, it is necessary to align the ACI Quality of Service (QoS) levels and Inter-Pod Network (IPN) QoS policies. This alignment ensures that the DSCP values are preserved and respected across the ACI fabric and the IPN, preventing packets from being delayed or dropped between pods.

NEW QUESTION # 240

Refer to the exhibit.

The screenshot shows the Cisco APIC GUI configuration for a connection. On the left, a navigation pane shows the hierarchy: Service Parameters > Service Graph Templates > Prod_to_Trans > Function Node - ASA407 > consumer > provider. The main area displays the 'Connections' table:

Name	Connected Nodes	Direct Connect	Unicast Route	Adjacency Type
C1	N1, T1	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
C2	N1, T2	False	<input checked="" type="checkbox"/>	

Below the table are 'Update' and 'Cancel' buttons. A red box highlights the 'Adjacency Type' dropdown menu for the C2 connection.

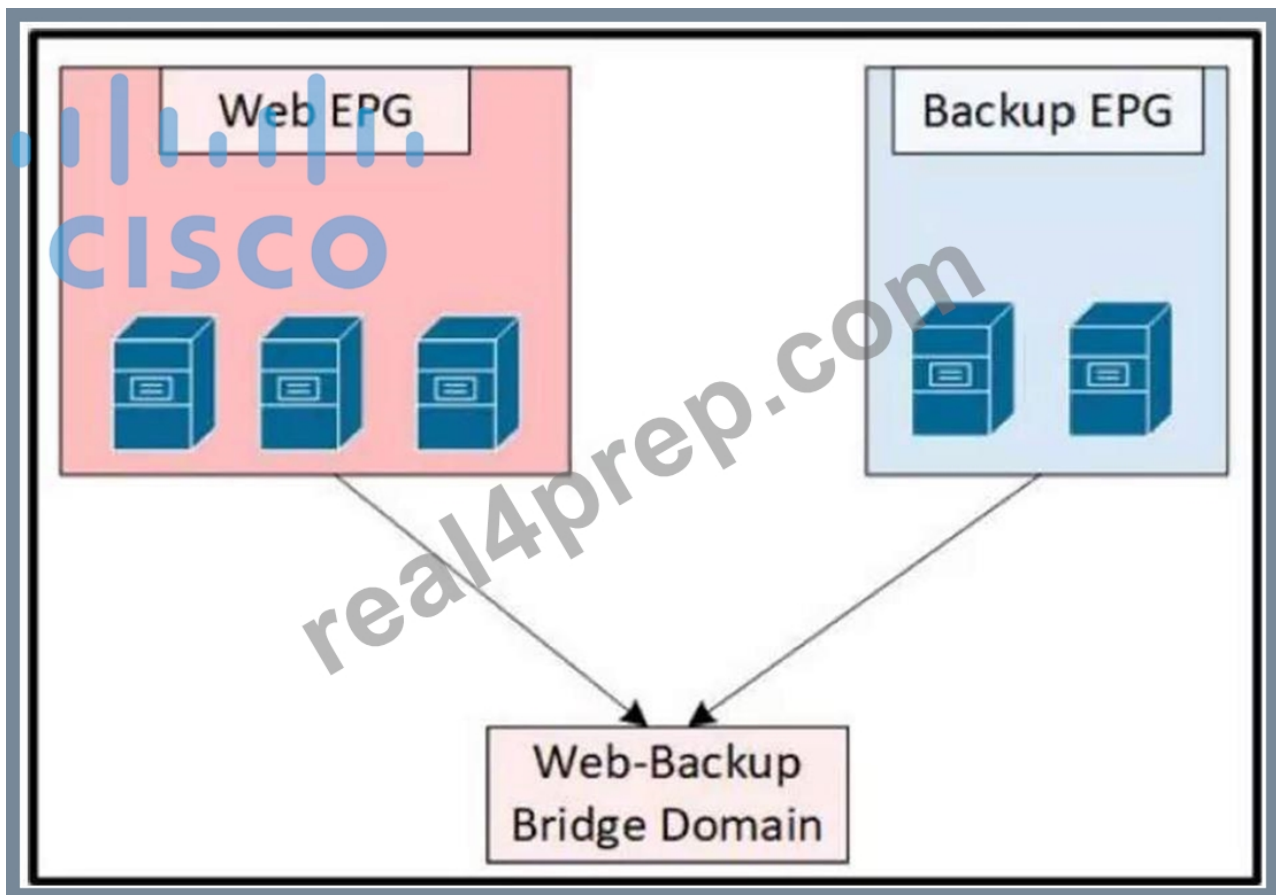

Which Adjacency Type value should be set when the client endpoint and the service node interface are in a different subnet?

- A. Unicast
- B. L3
- C. L3Out
- D. Routed

Answer: D

NEW QUESTION # 241

Refer to the exhibit. An engineer must migrate the web servers and backup servers from the legacy network to a Cisco ACI environment in the corresponding EPGs. The requirement is to allow communication between the servers in the web EPG and the backup EPG without creating contracts. Which action meets the requirements?

- A. Set Policy Control Enforcement to Unenforced.
- B. Configure the Enforced Bridge Domain status flag.
- C. Set the direction of Policy Enforcement to Egress.
- D. Set IP Data-plane learning to Enabled.

Answer: A

NEW QUESTION # 242

Which components must be configured for the BGP Route Reflector policy to take effect?

- A. pod policy groups and profiles
- B. leaf fabric interface overrides and profiles
- C. access policies and profiles
- D. spine fabric interface overrides and profiles

Answer: D
