Moreover, it is designed for professionals who have experience with the application and want to validate their knowledge.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q70-Q75):

### NEW QUESTION # 70

A company implements Dynamics 365 for Finance and Operations. You must use functionality in the system for group production runs to prevent downtime and excessive cleaning of the machines on the production line.

You need to set up the system.

Which behaviors should you expect? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Scenario

You set up a coverage time horizon of 120 days, a sequence time horizon of 60 days, and a campaign cycle of 30 days.

#### Expected planning behavior

Two complete campaign cycles of 30 days, each within the 60-days sequencing time horizon.

Three complete campaign cycles of 30 days, each within the 60-days sequencing time horizon.

One complete campaign cycle of 120 days.

You set up a sequencing ID for 50 gram, 100 gram, and 200 gram packages. You assign ranking values as 1, 5, and 10 respectively.

50 gram packets, then 100 gram packets, then 200 gram packets  
200 gram packets, then 100 gram packets, then 50 gram packets

#### Answer:

Explanation:

Scenario	Expected planning behavior
You set up a coverage time horizon of 120 days, a sequence time horizon of 60 days, and a campaign cycle of 30 days.	<p>Two complete campaign cycles of 30 days, each within the 60-days sequencing time horizon.</p> <p>Three complete campaign cycles of 30 days, each within the 60-days sequencing time horizon.</p> <p>One complete campaign cycle of 120 days.</p>
You set up a sequencing ID for 50 gram, 100 gram, and 200 gram packages. You assign ranking values as 1, 5, and 10 respectively.	<p>50 gram packets, then 100 gram packets, then 200 gram packets</p> <p>200 gram packets, then 100 gram packets, then 50 gram packets</p>

Explanation

**Scenario**

You set up a coverage time horizon of 120 days, a sequence time horizon of 60 days, and a campaign cycle of 30 days.

**Expected planning behavior**

Two complete campaign cycles of 30 days, each within the 60-days sequencing time horizon.  
Three complete campaign cycles of 30 days, each within the 60-days sequencing time horizon.  
One complete campaign cycle of 120 days.

You set up a sequencing ID for 50 gram, 100 gram, and 200 gram packages. You assign ranking values as 1, 5, and 10 respectively.

50 gram packets, then 100 gram packets, then 200 gram packets  
200 gram packets, then 100 gram packets, then 50 gram packets

**NEW QUESTION # 71**

You need to resolve the shop supervisor's issue. Which options should you use? To answer, select the appropriate option in the answer area. NOTE: Each correct selection is worth one point.

Step	Action
Step 1	<ul style="list-style-type: none"><li>Cancel the planning job.</li><li>Set the job status to in progress.</li><li>Set the job status to not planned.</li><li>Issue a new Kanban card.</li></ul>
Step 2	<ul style="list-style-type: none"><li>Modify the time fence.</li><li>Rerun the master plan.</li><li>Enable auto-firming.</li></ul>

**Answer:**

Explanation:

Step	Action
Step 1	<ul style="list-style-type: none"><li>Cancel the planning job.</li><li>Set the job status to in progress.</li><li>Set the job status to not planned.</li><li>Issue a new Kanban card.</li></ul>
Step 2	<ul style="list-style-type: none"><li>Modify the time fence.</li><li>Rerun the master plan.</li><li>Enable auto-firming.</li></ul>

Explanation:

Step	Action
Step 1	<ul style="list-style-type: none"> <li>Cancel the planning job.</li> <li>Set the job status to in progress.</li> <li>Set the job status to not planned.</li> <li>Issue a new Kanban card.</li> </ul>
Step 2	<ul style="list-style-type: none"> <li>Modify the time fence.</li> <li>Rerun the master plan.</li> <li>Enable auto-firming.</li> </ul>

### NEW QUESTION # 72

A company uses engineering change management in Dynamics 365 Supply Chain Management. The Product readiness checks feature is turned off.

An existing engineering product must be reconfigured for a new product readiness policy.

You need to change the product readiness policy.

Where should you make this change?

- A. released product
- B. shared product
- C. engineering category
- D. default order settings
- E. product configuration model

**Answer: C**

Explanation:

\* Product readiness policies are assigned to products at the released product level<sup>1</sup>. A released product is a product that has been released to one or more legal entities and can be used in transactions<sup>2</sup>.

\* To change the product readiness policy for an existing engineering product, you must go to the Product readiness tab on the Released product details page and select a different policy from the Readiness policy field<sup>1</sup>.

\* The other options are not correct, because they are not related to product readiness policies. Default order settings are used to define how a product is ordered, received, and sold<sup>2</sup>. A shared product is a product that is defined in the shared product master and can be released to multiple legal entities<sup>2</sup>. An engineering category is a category that is used to group engineering products by their characteristics<sup>3</sup>.

A product configuration model is a model that defines the options and rules for configuring a product.

### NEW QUESTION # 73

A customer produces light projection toys for holiday decorations throughout the year. The production process creates the projection toy at the following work cells: stands, main assembly, electric, visuals, and packaging.

Vendors must create templates for each toy they produce each season. They must manage the transfer of templates to the warehouse. Each transfer for each vendor must use the same purchase agreement.

You need to configure the subcontracted transfer activity.

What should you do?

- A. Set the transfer activity Freight by value to Shipper. Ensure that purchase agreements include the vendor ID of the vendor.
- B. Set the transfer activity Freight by value to Recipient. Ensure that purchase agreements include the vendor ID of the warehouse.
- C. Set the transfer activity Freight by value to Carrier. Ensure that purchase agreements include the vendor ID of the warehouse.

- D. Set the transfer activity Freight by value to Recipient. Ensure that purchase agreements include the vendor ID of the vendor.
- E. Set the transfer activity Freight by value to Shipper. Ensure that purchase agreements include the vendor ID of the warehouse.
- F. Set the transfer activity Freight by value to Carrier. Ensure that purchase agreements include the vendor ID of the vendor.

**Answer: D**

**NEW QUESTION # 74**

An automobile manufacturer leases cars to companies for use as company cars.

A car leased to a company breaks down and requires repairs.

You must open a maintenance request and replace the car with an equivalent model until the original car is repaired and returned to the company. When the manufacturer receives and inspects the car, the replacement car can be released to the company.

You need to select the maintenance request components to use.

Which components should you use? To answer, drag the appropriate components to the correct assets. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

**Answer:**

**Explanation:**

**Explanation:**

To select the maintenance request components to use, you should use the following:

\* The leased car that must be repaired: You should use the Inbound asset component. An inbound asset is an asset that is received from a customer or vendor for maintenance or repair<sup>1</sup>. You can use the Inbound assets page to create and manage inbound assets in Asset Management<sup>2</sup>. You can also create a maintenance request for an inbound asset and link it to a work order<sup>3</sup>.

\* The replacement car for the leased car: You should use the Outbound asset component. An outbound asset is an asset that is sent to a customer or vendor as a temporary replacement for an asset that is being maintained or repaired<sup>1</sup>. You can use the Outbound assets page to create and manage outbound assets in Asset Management. You can also link an outbound asset to an inbound asset or a work order.

1: Inbound and outbound assets 2: Inbound assets 3: Create a maintenance request for an inbound asset : [Outbound assets]

**NEW QUESTION # 75**

.....

Our product's passing rate is 99% which means that you almost can pass the test with no doubts. The reasons why our MB-335 study materials' passing rate is so high are varied. Firstly, our test bank includes two forms and they are the PDF test questions which are selected by the senior lecturer, published authors and professional experts and the practice test software which can test your mastery degree of our MB-335 Study Materials at any time. The two forms cover the syllabus of the entire test. Our questions and answers include all the questions which may appear in the exam and all the approaches to answer the questions. So we provide the strong backing to help clients to help them pass the test.
