Are you still feeling distressed for expensive learning materials? Are you still struggling with complicated and difficult explanations in textbooks? Do you still hesitate in numerous tutorial materials? HPE0-V25 study guide can help you to solve all these questions. HPE0-V25 certification training is compiled by many experts over many years according to the examination outline of the calendar year and industry trends. With HPE0-V25 Study Guide, you only need to spend 20 to 30 hours practicing to take the exam. In addition, HPE0-V25 certification training has a dedicated expert who updates all data content on a daily basis and sends the updated content to the customer at the first time. Therefore, using HPE0-V25 guide torrent, you don't need to worry about missing any exam focus.

HP HPE0-V25 (HPE Hybrid Cloud Solutions) Certification Exam is a professional certification program designed to validate the skills and knowledge of IT professionals in the field of hybrid cloud solutions. HPE Hybrid Cloud Solutions certification is offered by Hewlett Packard Enterprise (HPE), a leading provider of technology solutions for businesses and individuals worldwide. The HPE0-V25 Exam encompasses a wide range of topics related to hybrid cloud solutions, including architecture, deployment, configuration, management, and security.

## **Certification HP HPE0-V25 Exam | HPE0-V25 Instant Discount**

With passing rate up to 98 to 100 percent, the quality and accuracy of our HPE0-V25 training materials are unquestionable. You

may wonder their price must be equally steep. While it is not truth. On the contrary everyone can afford them easily. By researching on the frequent-tested points in the real exam, our experts have made both clear outlines and comprehensive questions into our HPE0-V25 Exam Prep. So our HPE0-V25 practice engine is easy for you to understand.

## HPE Hybrid Cloud Solutions Sample Questions (Q67-Q72):

### NEW QUESTION # 67

Which switch does Aruba recommend for an access layer role?

- A. Aruba CX 8300
- B. Aruba CX 8400
- C. Aruba CX 6400
- **D. Aruba CX 6100**

**Answer: D**

### NEW QUESTION # 68

Match the RAID level to the number of drive failures an array can handle without losing data. (Each option may be used once, more than once, or not at all.)

**Answer:**

Explanation:

Explanation:

RAID 1: any single drive

RAID 1 ADM: any two drives

RAID 5: any single drive

RAID 6: any two drives

RAID 1: This is a level of RAID that uses mirroring to create an exact copy of data on two or more disks. It can tolerate the failure of any single drive without losing data, as long as the other drive is still functional.

RAID 1 ADM: This is a level of RAID that uses advanced data mirroring to create two copies of data on three disks. It can tolerate the failure of any two drives without losing data, as long as the third drive is still functional.

RAID 5: This is a level of RAID that uses striping with parity to distribute data and parity information across three or more disks. It can tolerate the failure of any single drive without losing data, as long as the other drives can reconstruct the data from the parity information.

RAID 6: This is a level of RAID that uses striping with double parity to distribute data and two sets of parity information across four or more disks. It can tolerate the failure of any two drives without losing data, as long as the other drives can reconstruct the data from the double parity information.

### NEW QUESTION # 69

your customer wants to purchase a new HPE MSA controller enclosure fully populated With SSD fives. They have four existing expansion enclosures from their previous solution that they want to connect to the new controller.

Two expansion enclosures are fully populated with SFF disks, and the other two are populated with LFF drives.  
which storage controller enclosure solution should you recommend?

- A. HPE MSA 1060
- B. HPF MSA 1060 with Advanced Data Service (ADS) suite LTLJ
- C. HPE MSA 2060
- **D. HPF MSA 2060 with Advanced Data service (ADS) suite LTU**

**Answer: D**

Explanation:

HPE MSA 2060 Storage solution supports a mixture of 3.5 inch LFF and 2.5 inch SFF expansion enclosures for a maximum of 9 enclosures (10 total including the array). This means that it can accommodate the four existing expansion enclosures from the previous solution that have different disk sizes.

The HPE MSA 2060 also delivers up to 395,000 IOPS, which is up to 80% faster than its prior generation1.

This would be beneficial for a customer who wants to fully populate the controller enclosure with SSD drives, which are faster than

HDD drives.

The Advanced Data service (ADS) suite LTU is a license that enables features such as snapshot, replication, performance tiering, virtual disk groups, and thin provisioning on the HPE MSA 20602. These features can enhance the performance, availability, and efficiency of the storage system.

#### NEW QUESTION # 70

Is HPE GreenLake a consumption-based model for IT resources?

- A. Yes
- B. No

**Answer: A**

Explanation:

HPE GreenLake is a consumption-based model that allows organizations to pay for their IT resources based on actual usage. It provides a flexible and scalable approach to IT resource provisioning, enabling organizations to align their IT spending with their business needs. HPE GreenLake provides a range of services, including infrastructure-as-a-service (IaaS), platform-as-a-service (PaaS), and software-as-a-service (SaaS).

#### NEW QUESTION # 71

A customer has a large database stored on a DL380 server that is configured with a large RAID 6 set. What can the customer install that will directly improve the existing storage performance bottleneck?

- A. Physical Memory
- B. SmartCache
- C. Second CPU
- D. GPU accelerator

**Answer: B**

Explanation:

SmartCache: HPE SmartCache is a controller-based caching solution that caches the most frequently accessed data ("hot" data) onto lower latency SSDs to improve the performance of read-intensive applications like databases. This is particularly effective for large RAID sets where disk I/O performance can be a bottleneck.
