This feature will help you identify where you need the most improvement so you can focus your efforts and boost your score the next time you take the Microsoft Azure Administrator (AZ-104) practice test.

Microsoft Azure Administrator Sample Questions (Q380-Q385):

NEW QUESTION # 380

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company registers a domain name of contoso.com.

You create an Azure DNS named contoso.com and then you add an A record to the zone for a host named www that has an IP address of 131.107.1.10.

You discover that Internet hosts are unable to resolve www.contoso.com to the 131.107.1.10 IP address.

You need to resolve the name resolution issue.

Solution: You modify the name server at the domain register.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/azure/dns/dns-delegate-domain-azure-dns> Delegate the domain Now that the DNS zone is created and you have the name servers, you need to update the parent domain with the Azure DNS name servers. Each registrar has its own DNS management tools to change the name server records for a domain.

NEW QUESTION # 381

You have an Azure Storage account named storage1 that uses Azure Blob storage and Azure File storage.

You need to use AzCopy to copy data to the blob storage and file storage in storage1.

Which authentication method should you use for each type of storage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Blob storage:	<div style="display: flex; align-items: center;"><div style="width: 20px; height: 20px; background-color: #f08080; margin-right: 5px;"></div><div style="width: 20px; height: 20px; background-color: #90ee90; margin-right: 5px;"></div><div style="width: 20px; height: 20px; background-color: #add8e6; margin-right: 5px;"></div><div style="width: 20px; height: 20px; background-color: #ff8c00; margin-right: 5px;"></div><div style="border: 1px solid black; padding: 5px;"><p>Azure Active Directory (Azure AD) only</p><p>Shared access signatures (SAS) only</p><p>Access keys and shared access signatures (SAS) only</p><p>Azure Active Directory (Azure AD) and shared access signatures (SAS) only</p><p>Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)</p></div></div>
File storage:	<div style="border: 1px solid black; padding: 5px;"><p>Azure Active Directory (Azure AD) only</p><p>Shared access signatures (SAS) only</p><p>Access keys and shared access signatures (SAS) only</p><p>Azure Active Directory (Azure AD) and shared access signatures (SAS) only</p><p>Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)</p></div>

Answer:

Explanation:

Blob storage:

Dropdown menu for Blob storage authorization options:

- Azure Active Directory (Azure AD) only
- Shared access signatures (SAS) only
- Access keys and shared access signatures (SAS) only
- Azure Active Directory (Azure AD) and shared access signatures (SAS) only**
- Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)

File storage:

Dropdown menu for File storage authorization options:

- Azure Active Directory (Azure AD) only
- Shared access signatures (SAS) only**
- Access keys and shared access signatures (SAS) only
- Azure Active Directory (Azure AD) and shared access signatures (SAS) only
- Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)

Explanation:

You can provide authorization credentials by using Azure Active Directory (AD), or by using a Shared Access Signature (SAS) token.

Box 1:

Both Azure Active Directory (AD) and Shared Access Signature (SAS) token are supported for Blob storage.

Box 2:

Only Shared Access Signature (SAS) token is supported for File storage.

NEW QUESTION # 382

You have an Azure subscription that contains the resources shown in the following table:

Name	Type	Resource group	Tag
RG6	Resource group	Not applicable	None
VNET1	Virtual network	RG6	Department: D1

You assign a policy to RG6 as shown in the following table:

To RG6, you apply the tag: RGroup: RG6.

You deploy a virtual network named VNET2 to RG6.

Which tags apply to VNET1 and VNET2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Dropdown menus for VNET1 and VNET2 tag selection:

VNET1:

- None
- Department: D1 only
- Department: D1, and RGroup: RG6 only
- Department: D1, and Label: Value1 only
- Department: D1, RGroup: RG6, and Label: Value1

VNET2:

- None
- RGroup: RG6 only
- Label: Value1 only
- RGroup: RG6, and Label: Value1

Explanation:

<https://learn.microsoft.com/en-us/azure/azure-resource-manager/management/tag-policies>

NEW QUESTION # 383

You have an Azure subscription that contains an Azure Storage account named storage1 and the users shown in the following table.

You plan to monitor storage1 and to configure email notifications for the signals shown in the following table.

You need to identify the minimum number of alert rules and action groups required for the planned monitoring.

How many alert rules and action groups should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 384

You implement the planned changes for NSG1 and NSG2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 1, Litware, inc.

Overview

Litware, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The Montreal office has 2,000 employees. The Seattle office has 1,000 employees. The New York office has 200 employees.

All the resources used by Litware are hosted on-premises.

Litware creates a new Azure subscription. The Azure Active Directory (Azure AD) tenant uses a domain named

Litware.onmicrosoft.com. The tenant uses the P1 pricing tier.

Existing Environment

The network contains an Active Directory forest named Litware.com. All domain controllers are configured as DNS servers and host the Litware.com DNS zone.

Litware has finance, human resources, sales, research, and information technology departments. Each department has an organizational unit (OU) that contains all the accounts of that respective department. All the user accounts have the department attribute set to their respective department. New users are added frequently.

Litware.com contains a user named User1.

All the offices connect by using private links.

Litware has data centers in the Montreal and Seattle offices. Each data center has a firewall that can be configured as a VPN device.

All infrastructure servers are virtualized. The virtualization environment contains the servers in the following table.

Litware uses two web applications named App1 and App2. Each instance on each web application requires 1GB of memory.

The Azure subscription contains the resources in the following table.

The network security team implements several network security groups (NSGs).

Planned Changes

Litware plans to implement the following changes:

- * Deploy Azure ExpressRoute to the Montreal office.

- * Migrate the virtual machines hosted on Server1 and Server2 to Azure.

- * Synchronize on-premises Active Directory to Azure Active Directory (Azure AD).

- * Migrate App1 and App2 to two Azure web apps named webApp1 and WebApp2.

Technical Requirements

Litware must meet the following technical requirements:

- * Ensure that WebApp1 can adjust the number of instances automatically based on the load and can scale up to five instance*.

- * Ensure that VM3 can establish outbound connections over TCP port 8080 to the applications servers in the Montreal office.

- * Ensure that routing information is exchanged automatically between Azure and the routers in the Montreal office.

- * Enable Azure Multi-Factor Authentication (MFA) for the users in the finance department only.

- * Ensure that webapp2.azurewebsites.net can be accessed by using the name app2.Litware.com

- * Connect the New Your office to VNet1 over the Internet by using an encrypted connection.

- * Create a workflow to send an email message when the settings of VM4 are modified.

- * Create a custom Azure role named Role1 that is based on the Reader role.

- * Minimize costs whenever possible.

NEW QUESTION # 385

.....

Without bothering to stick to any formality, our Microsoft Azure Administrator AZ-104 learning quiz can be obtained within five minutes. No need to line up or queue up to get our AZ-104 practice materials. They are not only efficient on downloading aspect, but can expedite your process of review. No harangue is included within Microsoft AZ-104 Training Materials and every page is written by our proficient experts with dedication.
