Microsoft AZ-500 exam is designed to test an individual's understanding and proficiency in various security aspects of the Azure platform. Microsoft Azure Security Technologies certification is suitable for security professionals, Azure architects, and anyone who is responsible for securing the Azure environment. It covers topics such as identity and access management, platform protection, data and application protection, and security management.

Microsoft AZ-500 Certification Exam is designed to test a candidate's knowledge and expertise in implementing security controls, maintaining the security posture, managing identity and access, and protecting data, applications, and networks in Microsoft Azure. AZ-500 exam is ideal for professionals who are responsible for managing and securing cloud environments.

## Microsoft Azure Security Technologies Sample Questions (Q446-Q451):

### NEW QUESTION # 446

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Azure Username: User1-10598168@ExamUsers.com

Azure Password: Ag1Bh9!#Bd

The following information is for technical support purposes only:

Lab Instance: 10598168

You need to add the network interface of a virtual machine named VM1 to an application security group named ASG1. To complete this task, sign in to the Azure portal.

**Answer:**

Explanation:

See the explanation below.

\* In the Search resources, services, and docs box at the top of the portal, begin typing the name of a virtual machine, VM1 that has a network interface that you want to add to, or remove from, an application security group.

\* When the name of your VM appears in the search results, select it.

\* Under SETTINGS, select Networking. Select Configure the application security groups, select the application security groups that you want to add the network interface to, or unselect the application security groups that you want to remove the network interface from, and then select Save.

**NEW QUESTION # 447**

You are evaluating the security of the network communication between the virtual machines in Sub2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Yes

NSG1 has the inbound security rules shown in the following table.

Box 2: Yes

Box 3: No

Note:

Sub2 contains the virtual machines shown in the following table.

**NEW QUESTION # 448**

You plan to implement an Azure function named Function1 that will create new storage accounts for containerized application instances.

You need to grant Function1 the minimum required privileges to create the storage accounts. The solution must minimize administrative effort.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 449**

You have an Azure Active Directory (Azure AD) tenant that contains the resources shown in the following table.

User2 is the owner of Group2.

The user and group settings for App1 are configured as shown in the following exhibit.

You enable self-service application access for App1 as shown in the following exhibit.

User3 is configured to approve access to Appl.  
You need to identify the owners of Group2 and the users of Appl.  
What should you identify? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/manage-self-service-access>

**NEW QUESTION # 450**

You are troubleshooting a security issue for an Azure Storage account.  
You enable the diagnostic logs for the storage account.  
What should you use to retrieve the diagnostics logs?

- A. Azure Storage Explorer
- B. Azure Security Center
- C. SQL query editor in Azure
- D. File Explorer in Windows

**Answer: A**

Explanation:

If you want to download the metrics for long-term storage or to analyze them locally, you must use a tool or write some code to read the tables. You must download the minute metrics for analysis. The tables do not appear if you list all the tables in your storage account, but you can access them directly by name. Many storage-browsing tools are aware of these tables and enable you to view them directly (see Azure Storage Client Tools for a list of available tools).

Microsoft provides several graphical user interface (GUI) tools for working with the data in your Azure Storage account. All of the tools outlined in the following table are free.
