With great outcomes of the passing rate upon to 98-100 percent, our NCP-EUC practice engine is totally the perfect ones. We never boost our achievements on our NCP-EUC exam questions, and all we have been doing is trying to become more effective and perfect as your first choice, and determine to help you pass the NCP-EUC Study Materials as efficient as possible. Just to try on our NCP-EUC training guide, and you will love it.

Earning the NCP-EUC certification is a valuable achievement for IT professionals who want to expand their skills and knowledge in end-user computing and stay current with the latest industry trends. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification can help professionals stand out in the job market and open up new career opportunities. Additionally, Nutanix certification holders gain access to exclusive resources, such as training materials, webinars, and networking events, which can help them stay up-to-date with the latest developments in the field.

Nutanix NCP-EUC Certification is a valuable asset to IT professionals who want to demonstrate their proficiency in Nutanix EUC solutions. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is recognized globally and is highly sought after by employers. It is also a great way to enhance your career prospects and improve your earning potential.

Exam NCP-EUC Overviews, NCP-EUC Latest Study Guide

We present our NCP-EUC real questions in PDF format. It is beneficial for those applicants who are busy in daily routines. The Nutanix NCP-EUC PDF QUESTIONS contains all the exam questions which will appear in the real test. You can easily get ready for the examination in a short time by just memorizing NCP-EUC Actual Questions. Lead2Passed PDF questions can be printed. And this document of NCP-EUC questions is also usable on smartphones, laptops and tablets. These features of the Nutanix NCP-EUC PDF format enable you to prepare for the test anywhere, anytime.

The NCP-EUC exam is a computer-based exam that consists of 60 multiple-choice questions. Candidates have 90 minutes to complete NCP-EUC exam, and the passing score is 300 out of 500. NCP-EUC Exam is available in English and Japanese, and

candidates can take NCP-EUC exam at Pearson VUE testing centers worldwide.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q73-Q78):

NEW QUESTION # 73

An administrator would like to apply a group of base settings to Citrix-based VDI users at each logon. which user profile type would best fit the scenario?

- A. Roaming Profiles
- B. Local Profiles
- **C. Mandatory Profiles**
- D. Virtual disk-based Profiles

Answer: C

Explanation:

A mandatory profile is a type of roaming profile that is read-only and does not save any changes made by users during their sessions. A mandatory profile can be applied to a group of users who share a common desktop environment and do not need to customize their settings or preferences.

A mandatory profile can ensure that a group of base settings are applied to Citrix-based VDI users at each logon, regardless of any changes they make during their sessions. A mandatory profile can also improve performance, security, and consistency of the VDI environment.

To use a mandatory profile with Citrix Virtual Apps and Desktops, you need to create a template profile on a reference machine, rename its NTUSER.DAT file to NTUSER.MAN, and copy it to a network share. Then you need to configure Profile Management policies or Active Directory settings to point to the network share location for your users.

NEW QUESTION # 74

An administrator is unable to open Citrix Studio and sees the following error message:

"The host server cannot be contacted. Check that the connection has a valid host address, and that the host server is powered on and working properly. The request was aborted: Could not create SSL/TLS secure channel." What must the administrator do to successfully open Citrix Studio?

- **A. Install the Nutanix AHV Plugin for Citrix**
- B. Install the Nutanix VirtIO for Windows
- C. Restart the Citrix Configuration Logging Service
- D. Restart the Citrix Configuration Service

Answer: A

Explanation:

The error message "Could not create SSL/TLS secure channel" when attempting to connect Citrix Studio to a Nutanix AHV cluster indicates a protocol mismatch between the Citrix Delivery Controller and the Nutanix Prism interface.

Nutanix AOS enforces strict TLS 1.2 security standards. To communicate effectively with the Nutanix cluster, the Citrix Delivery Controllers must have the correct version of the Nutanix AHV Plugin for Citrix installed. This plugin manages the hosting connection and ensures that the communication utilizes the required TLS 1.2 protocols and cipher suites. If the plugin is missing, outdated, or corrupted, the secure channel cannot be established, resulting in this specific error. Installing or upgrading to the latest supported plugin resolves the communication failure.

NEW QUESTION # 75

What are the two types Of Launchpads that exist in Frame? (Choose two.)

- A. VDI Launchpad
- **B. Desktop Launchpad**
- **C. Application Launchpad**
- D. user Launchpad

Answer: B,C

NEW QUESTION # 76

A Citrix administrator is creating a new machine catalog on AHV for a new cluster. After validating the AHV plugin is installed, the catalog is unable to be created because no resources were found.

Which step must be completed first to resolve this issue?

- A. Install VirtIO drivers.
- B. Create a delivery group.
- C. Use a Nutanix Playbook to update the target config.
- **D. Create a new hosting connection in Citrix Studio.**

Answer: D

Explanation:

In the Citrix Studio workflow, before a Machine Catalog can be created for a specific infrastructure, a Hosting Connection (or Host Connection) must be established. This connection links the Citrix control plane to the specific hypervisor (Nutanix AHV) and defines the resources (such as storage containers and networks) available for provisioning.

If the administrator is setting up a "new cluster" and attempts to create a catalog but finds that "no resources were found," it indicates that either no Hosting Connection exists for that new cluster, or the existing connection does not include the storage/network resources of the new cluster. Therefore, the immediate resolution is to create a new hosting connection in Citrix Studio that points to the new AHV cluster, ensuring the appropriate networks and containers are selected as available resources.

NEW QUESTION # 77

A company is planning to implement Citrix Virtual Apps and Desktops on Nutanix clusters running AHV.

The initial implementation will be sized for 1000 virtual desktops with Windows 11, Microsoft Office 2021 and Adobe Creative Cloud All Apps installed.

What is the correct prerequisite to implement a successful installation of the Nutanix AHV MCS Plug-in?

- **A. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Broker.**
- B. Nutanix data services IP address is reachable.
- C. Nutanix cluster virtual IP address is reachable.
- D. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Storefront.

Answer: A

Explanation:

The Nutanix AHV MCS Plug-in is a tool that enables Citrix Virtual Apps and Desktops Delivery Controllers (also called Brokers) to create and manage Citrix-provisioned VMs in a Nutanix AHV infrastructure environment. The plug-in is based on the Citrix-defined plug-in framework2.

To install the Nutanix AHV MCS Plug-in, you need to meet some prerequisites, such as:

The Delivery Controller version must be 7.15 LTSR CU3 or later.

The Delivery Controller must be able to communicate with Prism Element (PE) using HTTPS port 9440.

The Delivery Controller must have PowerShell 5.1 or later installed.

The user running the installer must have administrator privileges on the Delivery Controller2.
