頂尖的Fire-Inspector-II考試心得 |高通過率的考試材料|免費下載Fire-Inspector-II考題資訊

購買我們VCESoft International Code Council的Fire-Inspector-II考試認證的練習題及答案，你將完成你人生中最重要的重要的考前準備問題，你將得到最高品質的培訓資料，今天購買我們的產品，是你為自己打開了新的大門，也是為了更美好的未來，也使你付出最小努力，獲得最大的成功。

最新的 Fire Inspector Fire-Inspector-II 免費考試真題 (Q20-Q25):

問題 #20

According to the fire code, when compliance is not immediate, inspection reports of code violations must always include a description of the violation and which of the following?

- A. The potential fines for noncompliance
- **B. Recommended corrective action**
- C. The reinspection date
- D. The mandatory court date

答案：B

解題說明:

When fire inspectors identify code violations, the inspection report must include a description of the violation along with a recommended corrective action. This ensures that the responsible party understands what steps need to be taken to bring the property into compliance.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 109.3 (Notice of Violation) IFC 109.3 requires that any notice of violation must include a description of the violation and the necessary corrective action.

The intent is to provide clear guidance on how to remedy the issue to meet fire safety standards.

2. NFPA 1 - Fire Code (2021 Edition) - Section 1.7.6 (Enforcement and Documentation of Violations) NFPA 1, Section 1.7.6.1 states that violation reports must specify the corrective action required to comply with the fire code.

Detailed Explanation of Answer Choices:

Option A (Incorrect): While a reinspection date may be provided, it is not a mandatory component of an inspection report for code violations.

Option B (Incorrect): A mandatory court date is not always required; enforcement varies depending on jurisdiction and severity of the violation.

Option C (Correct): Recommended corrective action is required in all violation reports as per IFC 109.3 and NFPA 1.7.6.1.

Option D (Incorrect): Potential fines for noncompliance are determined separately and are not necessarily included in the initial violation report.

Thus, the correct and verified answer is: C. Recommended corrective action.

問題 #21

For Halon 1211 hand-hose-line systems, all hoses for high-pressure systems must be tested at ___ psi

- A. 0
- B. 1,500
- C. 2,500
- D. 1

答案: B

解題說明:

Reference to Halon 1211 Hand-Hose-Line System Requirements:

NFPA 12A (Standard on Halon 1211 Fire Extinguishing Systems), Section 6.5, states that all hoses for high-pressure Halon 1211 hand-hose-line systems must be tested at 1,500 psi to ensure they can withstand operational pressure without failure.

The International Fire Code (IFC 2021), Section 904.10, also references the requirements for Halon 1211 systems, ensuring proper testing for system integrity.

Purpose of Pressure Testing:

High-pressure Halon 1211 systems operate under significant force, and hose failures could result in loss of fire suppression capability or safety hazards.

Testing at 1,500 psi ensures hoses can handle peak pressures without rupture or degradation over time.

Clarification of Incorrect Answer Choices:

A: 600 psi # Incorrect

Too low for high-pressure systems, insufficient to verify hose integrity.

B: 900 psi # Incorrect

Below the required 1,500 psi standard for high-pressure Halon 1211 hoses.

D: 2,500 psi # Incorrect

Exceeds the required test pressure per NFPA 12A; unnecessary over-testing could damage hoses.

Conclusion:

The correct and verified answer is C (1,500 psi) based on NFPA 12A and IFC 904.10, ensuring compliance with Halon 1211 high-pressure system testing standards.

問題 #22

Horizontal exits shall not comprise more than ___ of the required exits from any floor area in a Group I-2 occupancy.

- A. 1/2
- B. 1/3
- C. 2/3
- D. 3/4

答案: A

解題說明:

For Group I-2 occupancies (such as hospitals, nursing homes, and similar healthcare facilities), horizontal exits are used to improve fire safety by allowing occupants to move to a safer area without using stairs or elevators.

IFC 2021, Section 1026.1 (Horizontal Exits - General Requirements) states that:

Horizontal exits shall not comprise more than one-half (1/2) of the required exits from any floor area in a Group I-2 occupancy. This ensures that at least 50% of the required exits remain traditional vertical or exterior exits, maintaining a balance between horizontal and traditional egress routes.

問題 #23

A required standpipe shall be installed when the progress of construction above the lowest level of fire department access reaches a maximum of __ ft.

- A. 0
- B. 1
- C. 2
- **D. 3**

答案： D

解題說明：

1. Standpipe Requirements in Construction

According to International Fire Code (IFC) 2021, Section 3313.1, a temporary standpipe must be installed when construction progresses above 75 feet from the lowest level of fire department access.

This ensures firefighters have adequate water supply access during high-rise construction.

2. Why the 75-Foot Requirement?

Buildings exceeding 75 feet are classified as high-rise structures, where fire department hose streams may not reach upper levels efficiently.

A standpipe system provides a reliable water source for fire suppression during construction, reducing fire risk.

3. Verification of Other Options

Option A (30 feet) - Incorrect, as standpipes are not required at this height under IFC regulations.

Option B (40 feet) - Incorrect, as this is below the high-rise threshold and does not require standpipes yet.

Option C (55 feet) - Incorrect, as IFC specifically mandates standpipes at 75 feet, not 55 feet.

Reference Sources:

International Fire Code (IFC) 2021 - Section 3313.1 (Temporary Standpipe Requirements for Construction) NFPA 14: Standard for the Installation of Standpipes and Hose Systems ICC Fire Inspector II Study Guide (2021) Thus, the correct and verified answer is: D. 75 feet. #

問題 #24

A "control area" is defined by the fire code as a building or portion of a building within which the exempted amounts of ___ are allowed to be stored, dispensed, used, or handled.

- **A. hazardous materials**
- B. corrosive materials only
- C. combustible liquids only
- D. flammable liquids only

答案： A

問題 #25

.....

所有的IT專業人士熟悉的International Code Council的Fire-Inspector-II考試認證，夢想有有那頂最苛刻的認證，你可以得到你想要的職業生涯，你的夢想。通過VCEsoft International Code Council的Fire-Inspector-II考試培訓資料，你就可以得到你想要的。

Fire-Inspector-II考題資訊: <https://www.vcesoft.com/Fire-Inspector-II-pdf.html>

International Code Council Fire-Inspector-II考試心得 如果你回答“是”，那趕緊來參加考試吧，我們為您提供涵蓋真實測試的題目和答案的試題，如果你發現我們的International Code Council Fire-Inspector-II題庫學習資料，存在重大的質量問題，一經核實，我們會無條件退還你的購買費用，Fire-Inspector-II考古題擁有高達98%通過率，作為IT相關認證考試大綱的主要供應商，VCEsoft Fire-Inspector-II考題資訊的IT專家一直不斷地提供品質較高的產品，不斷為

客戶提供免費線上客戶服務，並以最快的速度更新考試大綱，International Code Council Fire-Inspector-II考試心得 或者你也可以選擇為你免費更新考試考古題，想通過 International Code Council 67 - Fire Inspector II Exam - Fire-Inspector-II 考試並不是很簡單的，如果你沒有參加一些專門的相關培訓是需要花很多時間和精力來為考試做準備的，而 International Code Council 67 - Fire Inspector II Exam - Fire-Inspector-II 考古題可以幫助你，該考題通過實踐檢驗，利用它能让廣大考生節約好多時間和精力，順利通過考試。

對，就是這種造化玄光，博斯傑爬上了馬車，如果你回答“是”，那趕緊來參加考試吧，我們為您提供涵蓋真實測試的題目和答案的試題，如果你發現我們的International Code Council Fire-Inspector-II題庫學習資料，存在重大的質量問題，一經核實，我們會無條件退還你的購買費用。

Fire-Inspector-II考試心得將成為您通過的強大武器67 - Fire Inspector II Exam
