

# Pass-Sure Original OGEA-101 Questions & Leading Provider in Qualification Exams & Fantastic OGEA-101 Exam Certification

BTW, DOWNLOAD part of TorrentExam OGEA-101 dumps from Cloud Storage: [https://drive.google.com/open?id=1WyzbX5zp71w8Ywd\\_bkvrz\\_mi5tt26P-f](https://drive.google.com/open?id=1WyzbX5zp71w8Ywd_bkvrz_mi5tt26P-f)

The Open Group OGEA-101 exam dumps certification will not only improve the quality of your resume, but it can open the door to new opportunities for employment. It is compulsory to prepare with reliable and valid OGEA-101 dumps that ensures 100% success on the very first attempt. There is nothing more valuable than being awarded the TOGAF Enterprise Architecture Part 1 Exam Certification Exam that can allow you to earn an impressive position in the industry of The Open Group. We hope you will be able to enjoy a positive experience making preparations with our latest and valid OGEA-101 Exam Questions And Answers.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Implementation Governance: This topic of The Open Group OGEA-101 Exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>

## Original OGEA-101 Questions Reliable IT Certifications | OGEA-101: TOGAF Enterprise Architecture Part 1 Exam

If someone who can pass the exam, they can earn a high salary in a short time. If you decide to beat the exam, you must try our OGEA-101 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our TOGAF Enterprise Architecture Part 1 Exam prep torrent as the studying materials. So it is worthy for them to buy our product. We provide the introduction of the features and advantages of our OGEA-101 Test Prep as follow so as to let you have a good understanding of our product before your purchase.

### The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q132-Q137):

#### NEW QUESTION # 132

Which of the following statements about architecture partitioning is correct?

- A. Partitions reflect the organization's structure.
- B. Partitions are equivalent to architecture levels.
- **C. Partitions are used to simplify the management of the Enterprise Architecture.**
- D. Partitions are defined and assigned to agile Enterprise Architecture teams.

**Answer: C**

Explanation:

Based on the web search results, architecture partitioning is a technique that divides the Enterprise Architecture into smaller and manageable segments or groups, based on various classification criteria, such as subject matter, time, maturity, volatility, etc.<sup>12</sup> Architecture partitioning is used to simplify the development and management of the Enterprise Architecture, by reducing complexity, improving governance, enhancing reusability, and increasing alignment and agility<sup>12</sup>. Therefore, the statement that partitions are used to simplify the management of the Enterprise Architecture is correct.

The other statements are incorrect because:

\*Partitions are not equivalent to architecture levels. Architecture levels are different layers of abstraction that describe the Enterprise Architecture from different perspectives, such as strategic, segment, and capability<sup>3</sup>.

Partitions are subsets of architectures that are defined within or across the levels, based on specific criteria<sup>1</sup>.

\*Partitions do not necessarily reflect the organization's structure. The organization's structure is one possible criterion for partitioning the architecture, but it is not the only one. Other criteria, such as business function, product, service, geography, etc., can also be used to partition the architecture<sup>12</sup>.

\*Partitions are not defined and assigned to agile Enterprise Architecture teams. Agile Enterprise Architecture is an approach that applies agile principles and practices to the architecture work, such as iterative development, frequent feedback, adaptive planning and continuous delivery<sup>4</sup>. Partitions are not a specific feature of agile Enterprise Architecture, but a general technique that can be applied to any architecture method or framework, including TOGAF<sup>12</sup>.

#### NEW QUESTION # 133

What does the TOGAF ADM recommend for use in developing an Architecture Vision document?

- **A. Business Scenarios**
- B. Requirements Management
- C. Architecture Principles
- D. Gap Analysis

**Answer: A**

Explanation:

Business scenarios are a technique recommended by the TOGAF ADM for use in developing an Architecture Vision document<sup>12</sup>. Business scenarios are a means of capturing the business requirements and drivers, the processes and actors involved, and the desired outcomes and measures of success<sup>34</sup>. Business scenarios help to create a common vision and understanding among the stakeholders, and to identify and validate the architecture requirements. Business scenarios also provide a basis for analyzing the impact and value of the proposed architecture. Reference:

#### NEW QUESTION # 134

What are the following activities part of?

- . Risk classification
  - . Risk identification
  - . Initial risk assessment
- A. Phase A
  - B. Security Architecture
  - C. Phase G
  - **D. Risk Management**

**Answer: D**

Explanation:

Risk management is a generic technique that can be applied across all phases of the Architecture Development Method (ADM), as well as in the Preliminary Phase and the Requirements Management Phase2. Risk management involves the following steps1:

\* Risk identification: This step involves identifying the potential risks that may affect the architecture project, such as technical, business, organizational, environmental, or legal risks. The risks can be identified through various sources, such as stakeholder interviews, workshops, surveys, checklists, historical data, or expert judgment.

\* Risk classification: This step involves categorizing the risks based on their nature, source, impact, and priority. The risks can be classified according to different criteria, such as time, cost, scope, quality, security, or compliance. The classification helps in prioritizing the risks and allocating resources and efforts to address them effectively.

\* Initial risk assessment: This step involves assessing the likelihood and impact of each risk, and determining the initial level of risk. The likelihood is the probability of the risk occurring, and the impact is the severity of the consequences if the risk occurs. The initial level of risk is the product of the likelihood and impact, and it indicates the urgency and importance of the risk. The initial risk assessment helps in identifying the most critical risks that need immediate attention and mitigation.

#### NEW QUESTION # 135

Consider the following ADM phases objectives.

Objective

1-Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value

2-Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

3-Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

4-Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders Which phase does each objective match?

- A. 1E-2F-3E-4F
- **B. 1G-2E-3F-4F**
- C. 1E-2E-3F-4F
- D. 1F-2E-3F-4G

**Answer: B**

Explanation:

According to the TOGAF standard, the objectives of each ADM phase are as follows1:

\*Phase E: Opportunities and Solutions

oDetermine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous

business value oIdentify and group major work packages within the Architecture Roadmap oIdentify and group major

implementation projects to realize the Architecture Roadmap oIdentify dependencies between increments and projects oEstimate

cost, benefit, and risk at a high level for each increment and project  
oConduct initial prioritization and sequencing of the Architecture Roadmap and projects

**\*Phase F: Migration Planning**

oGenerate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D  
oConfirm the Transition Architectures with relevant stakeholders  
oCreate the Implementation and Migration Plan, including Transition Architectures, work packages, projects, and other activities  
oConfirm and agree the Architecture Roadmap and Implementation and Migration Plan with relevant stakeholders

**\*Phase G: Implementation Governance**

oFinalize the Architecture Roadmap and the supporting Implementation and Migration Plan  
oEnsure conformance with the Target Architecture by implementation projects  
oPerform appropriate Architecture Governance functions for the solution and any implementation-driven architecture Change Requests  
oEnsure that the architecture lifecycle is maintained  
oEnsure that the Architecture Governance Framework is executed

**\*Phase H: Architecture Change Management**

oEnsure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders  
oManage risks and issues related to the Architecture Roadmap and Implementation and Migration Plan  
oMonitor the implementation projects and Transition Architectures  
oManage changes to the architecture baseline  
oManage changes to the Architecture Capability  
Therefore, the correct matching of the objectives and the phases is:

\*1G: Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value

\*2E: Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

\*3F: Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

\*4F: Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders

### NEW QUESTION # 136

Complete the following sentence. In the ADM, documents which are under development and have not undergone any formal review and approval process are called \_\_\_\_\_. Documents which have been reviewed and approved are called \_\_\_\_\_.

- A. "draft"- "finalized"
- B. "concept"- "deliverable"
- C. "draft"- "approved"
- D. "Version 0.1"- "Version 1.0"

**Answer: C**

Explanation:

According to the TOGAF Standard, 10th Edition, documents which are under development and have not undergone any formal review and approval process are called draft documents, while documents which have been reviewed and approved are called approved documents 1. Draft documents are typically marked with a version number of 0.x, indicating that they are incomplete or provisional. Approved documents are typically marked with a version number of 1.0 or higher, indicating that they have been finalized and authorized. The other options are not correct, as they are not the terms used by the TOGAF Standard to distinguish between documents under development and documents that have been reviewed and approved. The terms "finalized", "concept", "deliverable", and "Version 0.1" and "Version 1.0" are not specific to the TOGAF Standard, and they may have different meanings or interpretations in different contexts. References: 1: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 7: Applying Iteration to the ADM, Section 7.2.3 Document Categorization.

### NEW QUESTION # 137

.....

Only 20-30 hours are needed for you to learn and prepare our OGEA-101 test questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn. But you buy our OGEA-101 Exam Materials you will save your time and energy and focus your attention mainly on your most important thing. And you can master the most important OGEA-101 exam torrent in the shortest time and finally pass the OGEA-101 exam successfully with our excellent OGEA-101 learning prep.
