Valid Chrome-Enterprise-Administrator Test Dumps, Reliable Chrome-Enterprise-Administrator Exam Pattern

our experts have rewritten the textbooks according to the exam outline of Chrome-Enterprise-Administrator, and have gathered all the key difficulties and made key notes, so that you can review them in a centralized manner. Experts also conducted authoritative interpretations of all incomprehensible knowledge points through examples and other methods. The expressions used in Chrome-Enterprise-Administrator Learning Materials are very easy to understand. Even if you are an industry rookie, you can understand professional knowledge very easily. The Chrome-Enterprise-Administrator training torrent will be the best study guide for you to obtain your certification.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 2	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 3	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 4	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 5	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Chrome-Enterprise-Administrator - Professional Chrome Enterprise Administrator Certification Exam Newest Valid Test Dumps

Actual4Labs is a convenient website to provide training resources for Chrome-Enterprise-Administrator professionals to participate in the certification exam. Actual4Labs have different training methods and training courses for different candidates. With these Actual4Labs's targeted training, the candidates can pass the exam much easier. A lot of people who participate in the Chrome-Enterprise-Administrator professional certification exam was to use Actual4Labs's practice questions and answers to pass the exam, so Actual4Labs got a high reputation in the Chrome-Enterprise-Administrator industry.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12
An external entity is conducting a penetration test on an organization's Chrome Browser environment They report that a significant number of Manifest V2 (MV2) extensions are installed none of which are critical to business operations IT leadership has requested either block or upgrade How should an administrator proceed?

- **A. Configure the Manifest V2 availability policy**
- B. Configure the installation mode to reflect removed for each extension ID
- C. Collect the extension IDs and configure an installation policy of block
- D. Auto-upgrade the extensions from MV2 to MV3

Answer: A

Explanation:
Given that the MV2 extensions are not critical, and the requirement is to either block or upgrade, the most direct and efficient approach is to configure the "Manifest V2 availability" policy. This policy allows administrators to control the usage of Manifest V2 extensions, including blocking them entirely or allowing them until a specified date. Option A involves manually collecting and blocking each extension, which is less efficient. Option C ("removed") is not a standard installation mode policy. Option D is not a policy that an administrator can directly configure; the upgrade to MV3 is a developer-driven process.

NEW QUESTION # 13
How often do extensions update"?

- A. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- B. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- **C. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours Updates occur when users sign into the Chrome Web Store**
- D. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page

Answer: C

Explanation:
Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

NEW QUESTION # 14

An organization experiences a recent surge in account takeovers and suspicious activity Upon investigation a security team discovers that employees are falling victim to infostealer malware specifically designed to target Chrome browser cookies This malware is spreading through phishing emails and compromised websites, and it is capable of stealing session cookies, login credentials,and other sensitive information stored in the browser Which measure can an administrator implement using Chrome Enterprise Core to mitigate the risks posed by cookie theft?

- A. Block the use of third-party cookies
- B. Disallow Chrome Sync and Require Incognito mode
- C. Invalidate user's session cookies and tokens by resetting the sign-in cookies from the Google Admin console
- D. Require Enhanced Safe Browsing and enable Application Bound Encryption

Answer: D

Explanation:

To combat cookie theft from infostealer malware, requiring "Enhanced Safe Browsing" provides proactive protection against malicious websites and downloads that might distribute such malware. Enabling
"Application Bound Encryption" adds an extra layer of security to cookies and other sensitive data stored by Chrome, making them harder for malware to use even if stolen. Blocking third-party cookies (option A) can improve privacy but doesn't directly prevent malware from stealing first-party session cookies. Invalidating existing cookies (option C) is a reactive measure and doesn't prevent future theft. Disallowing Chrome Sync and requiring Incognito mode (option D) changes user behavior but doesn't inherently protect against malware on the local machine.

NEW QUESTION # 15

An administrator identifies that the next major Chrome release, Chrome 130, has an issue with one of their critical business applications. The company's Chrome browsers are currently on version 129.0.6568.91. The administrator needs to prevent browsers from updating to Chrome 130, while allowing continued updates within the Chrome 129 major version.
Which target version prefix should the administrator use in the updates setting to achieve this?

- A. 0
- B. 129(
- C. 129.
- D. 129'''

Answer: C

Explanation:

To target all updates within the 129 major version, the administrator should use the target version prefix `129.
`. This tells Chrome to stay within the 129 branch and accept minor updates (like 129.0.x.y to 129.1.x.y) but not to upgrade to the next major version (130). The other options are not the correct syntax for specifying a major version prefix for target updates.

NEW QUESTION # 16

What is the schedule for Chrome stable channel major releases'?

- A. Whenever new features are added
- B. Every 28 days (every four weeks)
- C. The second Tuesday of every month
- D. Once a quarter (every three months)

Answer: B

Explanation:

The Chrome release cycle for the Stable channel is approximately every four weeks. This consistent schedule allows administrators to anticipate and plan for new feature deployments and potential compatibility testing.
While security updates can occur more frequently and are often released on Tuesdays, major version updates follow this roughly monthly cadence.

NEW QUESTION # 17

......

There are three versions of Chrome-Enterprise-Administrator guide quiz. You can choose the most suitable version based on your own schedule. PC version, PDF version and APP version, these three versions of Chrome-Enterprise-Administrator exam materials you can definitely find the right one for you.
