Some people prefer to read paper materials rather than learning on computers. Of course, your wish can be fulfilled in our company. We have PDF version Analytics-DA-201 exam guides, which are printable format. You can print it on papers after you have downloaded it successfully. If you want to change the fonts, sizes or colors, you can transfer the Analytics-DA-201 exam torrent into word format files before printing. There are many advantages of the PDF version. Firstly, there are no restrictions to your learning. You can review the Analytics-DA-201 Test Answers everywhere. You spare time can be made good use. Secondly, you can make notes on your materials, which will accelerate your understanding of the Analytics-DA-201 exam guides. In a word, our company seriously promises that we do not cheat every customer.

Salesforce Certified Tableau Data Analyst Sample Questions (Q152-Q157):

NEW QUESTION # 152

You have the following chart that sorts states by the number of products each state has purchased. Which formula should you use to include a number with the position of each state within each region?

- A. LOOKUP (SUM ([Quantity]))
- **B. INDEX ()**
- C. FIRST ()
- D. WINDOW_SUM(SUM ([Quantity]))

Answer: B

Explanation:

The LOOKUP function is used to return the value of a specified field in a different row, which can be defined relative to the current row. In this context, it can be used to include a number with the position of each state within each region by looking up the SUM([Quantity]) in each respective position. References: The information is inferred from general Tableau knowledge as well as the following sources:

- * Tableau Functions (Alphabetical)
- * LOOKUP
- * Tableau Certified Data Analyst Exam Guide

NEW QUESTION # 153

You have the following line chart that shows the average sales by month.

Average sales by month in year 2019

Which month had the biggest increase in swage sales compared to me previous month in 2019?

- A. August
- B. October
- **C. November**
- D. December

Answer: C

Explanation:

Based on the line chart provided, each point on the line chart represents the average sales for a given month, and the percentage values indicate the change in average sales compared to the previous month. The month of November shows a significant increase from the month of October, indicated by a large upward spike on the chart and a high percentage increase.

NEW QUESTION # 154

A Data Analyst has the following worksheet, with Profit data for Category and Sub-Category.

The analyst executed the following calculated field at the Total level:

COUNTD(IF (INCLUDE [Sub-Category]: SUM([Profit]) < 0 THEN [Category] END) What is the result?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

NEW QUESTION # 155

You want to create the following dashboard that will contain two sheets.

What should you do?

- A. Drag both sheets to the dashboard and add a border to each sheet.
- B. Add a border to both sheets and add both sheets to a horizontal object.
- C. Drag both sheets to the dashboard and add a background to each sheet.
- **D. Add both sheets to a horizontal container and add a border to the container.**

Answer: D

NEW QUESTION # 156

You have the following dataset in Microsoft Excel.

You are using Data interpreter to clean the dataset. Data interpreter provides the following results.

How many rows of data will be ingested into Tableau as values?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Data interpreter is a feature that helps you clean and structure your data in Excel before importing it into Tableau. It detects and removes any headers, footers, subtotals, or other elements that are not part of the actual data. It also splits any merged cells and fills in any missing values. In this case, data interpreter provides the following results:

* It removes the first three rows and the last two rows that contain headers and footers.

* It splits the merged cells in column A and fills in the missing values with "Fiction" or "Non-Fiction".

* It does not remove or change any other rows or cells.

Therefore, the number of rows of data that will be ingested into Tableau as values is 17, which is the number of rows left after removing the headers and footers. References: https://help.tableau.com/current/pro/desktop/en-us/importing_cleaning_up_data.htm https://help.tableau.com/current/pro/desktop/en-us/importing_data_interpreter.htm

Based on the Data Interpreter's results and the provided Excel dataset screenshot, the number of rows of data that will be ingested into Tableau as values is 17. The Data Interpreter has identified and excluded headers and footers, and the rows with actual data are considered for analysis.

NEW QUESTION # 157

.....

In addition to the Salesforce Analytics-DA-201 PDF dumps, we also offer Salesforce Analytics-DA-201 practice exam software. You will find the same ambiance and atmosphere when you attempt the real Salesforce Analytics-DA-201 exam.
