NEW QUESTION # 19

How does carrier selection functionality in SAP TM optimize freight management in the global logistics network? Note: There are 2 correct answers to this question.

- A. Improves production planning for transported materials
- B. Ensures transparency in transportation processes
- C. Focuses on the lowest cost option available
- D. Automates international procurement processes

Answer: B,C

Explanation:

Solution:

The two correct benefits of the carrier selection functionality in SAP TM are:

1. Ensures transparency in transportation processes - The system provides a ranked list of eligible carriers, displaying real carrier rates, availability, and constraints, which promotes clarity in decision making.
2. Focuses on the lowest cost option available - During carrier selection, SAP TM uses optimization algorithms to find the most cost-effective carrier, taking into account constraints such as cost, priority, and equipment capacity.

Therefore, the correct answers are:

- * A. Focuses on the lowest cost option available
- * C. Ensures transparency in transportation processes

NEW QUESTION # 20

How does the demand forecasting module in SAP IBP assist enterprises in handling market changes and organizing supply chain execution effectively?

- A. Enhances financial planning with limited demand changes.
- B. Relies on past sales data without market changes.
- C. Automates procurement processes to support preliminary plans.
- D. Creates demand forecasts and coordinates order fulfillment actions,

Answer: D

Explanation:

Solution:

The correct answer based on learning.sap.com is:

* D. Creates demand forecasts and coordinates order fulfillment actions. The SAP IBP demand forecasting module doesn't just rely on historical data—it actively generates accurate demand forecasts, and then triggers coordinated execution actions across supply chain processes. This ensures companies can respond dynamically to market changes and align order fulfillment efficiently with anticipated demand.
