The Pass4guide is a leading platform that has been helping the Fortinet NSE 4 - FortiOS 7.6 Administrator (NSE4\_FGT\_AD-7.6) exam candidates in exam preparation and boosting their confidence to pass the final NSE4\_FGT\_AD-7.6 exam. The Pass4guide is offering real, valid, and updated Fortinet NSE 4 - FortiOS 7.6 Administrator (NSE4\_FGT\_AD-7.6) practice questions. These Fortinet NSE 4 - FortiOS 7.6 Administrator (NSE4\_FGT\_AD-7.6) exam questions are verified by Fortinet NSE4\_FGT\_AD-7.6 exam trainers.

The Pass4guide is one of the top-rated and renowned platforms that has been offering real and valid Fortinet NSE 4 - FortiOS 7.6 Administrator (NSE4\_FGT\_AD-7.6) exam practice test questions for many years. During this long time period countless Fortinet NSE 4 - FortiOS 7.6 Administrator (NSE4\_FGT\_AD-7.6) exam candidates have passed their dream certification and they are now certified Fortinet professionals and pursuing a rewarding career in the market.

## 7.6 Administrator Exam Cost

Our company is a professional certificate test materials provider, and we are in the leading position in providing valid and effective exam materials. NSE4\_FGT\_AD-7.6 exam braindumps are high quality, and it also contain certain questions and answers, and it will be enough for you to pass the exam. Besides, in order to let you have a deeper understanding of what you are going to buy, we offer you free demo to have a try before buying NSE4\_FGT\_AD-7.6 Training Materials. We offer you free update for 365 days after purchasing, and the update version will be sent to your email address automatically.

### Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q36-Q41):

#### NEW QUESTION # 36

Refer to the exhibits. An administrator configured the Web Filter Profile to block access to all social networking sites except Facebook. However, when users try to access Facebook.com, they are redirected to a FortiGuard web filtering block page. Based on the exhibits, which configuration change must the administrator make to allow Facebook while blocking all other social networking sites?

The screenshot shows the 'Web filter configuration' interface for 'Edit Web Filter Profile'. The 'Feature set' is 'Flow-based'. The 'FortiGuard Category Based Filter' is enabled. The 'Action' dropdown is set to 'Allow'. The 'Social Networking' category is set to 'Block'. The 'URL Filter' is also enabled, and a URL 'www.facebook.com' is listed with a 'Monitor' action and 'Enable' status.

Name	Action
Web-based Applications	Allow
Entertainment	Allow
Arts and Culture	Allow
Education	Allow
Health and Wellness	Allow
Job Search	Allow
Medicine	Allow
News and Media	Allow
Social Networking	Block

URL	Type	Action	Status
www.facebook.com	Wildcard	Monitor	Enable

- A. Change the Feature set of Web Filter Profile as Proxy-based.
- B. Set the Social Networking action as warning in the FortiGuard Category Based Filter.
- C. Change the type as Simple in the Static URL Filter section.
- **D. Set the Action as Exempt for www.facebook.com in the Static URL Filter.**

**Answer: D**

Explanation:

The FortiGuard category filter is blocking Social Networking, which includes Facebook. Although a static URL filter entry for www.facebook.com exists, its action is set to Monitor, so it does not override the category block. To allow Facebook while blocking other social networking sites, the action for www.facebook.com in the Static URL Filter must be set to Exempt. This explicitly bypasses category filtering for that URL.

#### NEW QUESTION # 37

Which two components are part of the secure internet access (SIA) agent-based mode on FortiSASE? (Choose two.)

- A. FortiExtender
- **B. VPN policies**
- C. The proxy auto-configuration (PAC) file
- **D. FortiSASE Firewall-as-a-Service (FWaaS)**

**Answer: B,D**

Explanation:

In agent-based mode, FortiSASE Secure Internet Access uses VPN policies for secure connectivity, and the FortiSASE Firewall-as-a-Service (FWaaS) component for enforcing security policies and filtering user traffic.

### NEW QUESTION # 38

A network administrator enabled antivirus and selected an SSL inspection profile on a firewall policy. When downloading an EICAR test file through HTTP, FortiGate detects the virus and blocks the file. When downloading the same file through HTTPS, FortiGate does not detect the virus and does not block the file, allowing it to be downloaded.

The administrator confirms that the traffic matches the configured firewall policy. What are two reasons for the failed virus detection by FortiGate? (Choose two.)

- A. The EICAR test file exceeds the protocol options oversize limit.
- B. The selected SSL inspection profile has certificate inspection enabled.
- C. The browser does not trust the FortiGate self-signed CA certificate.
- D. The website is exempted from SSL inspection.

**Answer: C,D**

### NEW QUESTION # 39

An administrator manages a FortiGate model that supports NTurbo  
How does NTurbo acceleration enhance antivirus performance?

- A. For flow-based inspection. NTurbo establishes a dedicated data path to redirect traffic between the IPS engine and FortiGate ingress and egress interfaces.
- B. For proxy-based inspection. NTurbo offloads traffic to the content processor.
- C. For flow-based inspection. NTurbo creates two inspection sessions on the FortiGate device.
- D. For proxy-based inspection. NTurbo buffers the whole file and then sends it to the antivirus engine.

**Answer: A**

Explanation:

According to the FortiOS 7.6 Administration Guide and Fortinet hardware acceleration (NTurbo) documentation, the correct answer is A.

What NTurbo Is (FortiOS 7.6 - Verified)

NTurbo is a hardware-based acceleration feature available on specific FortiGate models. It is designed to improve antivirus and IPS performance when operating in flow-based inspection mode.

NTurbo works by creating a fast, optimized data path between:

FortiGate ingress interface

IPS/AV engine

FortiGate egress interface

This minimizes CPU involvement and reduces packet traversal overhead.

Why Option A Is Correct

A . For flow-based inspection, NTurbo establishes a dedicated data path to redirect traffic between the IPS engine and FortiGate ingress and egress interfaces.

This is exactly how NTurbo works, as documented:

NTurbo applies to flow-based inspection only

It accelerates IPS and antivirus scanning

It creates a dedicated fast path that bypasses unnecessary processing steps This significantly improves throughput and lowers latency

This description matches Fortinet's official explanation of NTurbo.

Why the Other Options Are Incorrect

B . NTurbo creates two inspection sessions

Incorrect. NTurbo does not duplicate sessions; it optimizes the packet path.

C . NTurbo offloads traffic to the content processor (proxy-based)

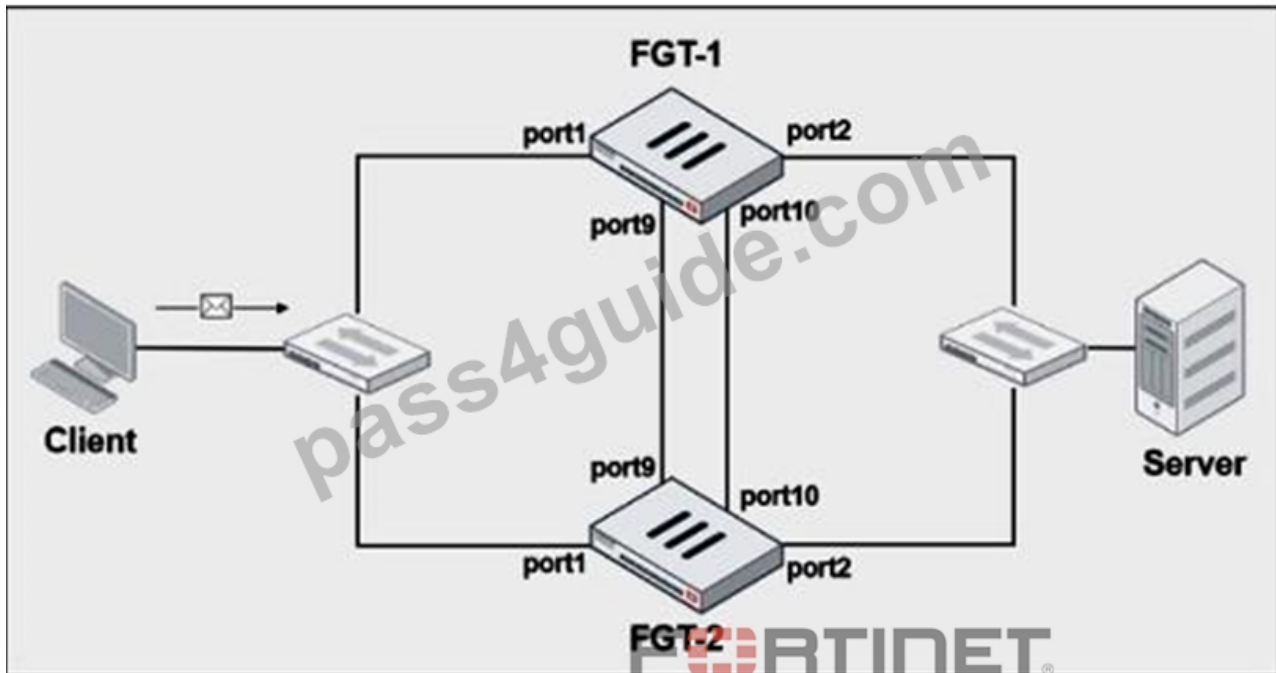

Incorrect. NTurbo does not apply to proxy-based inspection and does not offload to content processors.

D . NTurbo buffers the whole file and then sends it to the antivirus engine Incorrect. Buffering entire files is a proxy-based behavior, not NTurbo.

### NEW QUESTION # 40

Refer to the exhibits.

## FortiGate HA cluster topology

### Current HA status

```
# get system ha status
...
Configuration Status:
  FGVM010000064692(updated 4 seconds ago): in-sync
  FGVM010000064692 checksum dump: 13 8b 52 c7 59 2a 9a 5c 5f
  FGVM010000065036(updated 4 seconds ago): in-sync
  FGVM010000065036 checksum dump: 13 8b 52 c7 59 2a 9a 5c 5f
...
Primary      : FGT-1, FGVM010000064692, HA cluster index = 1
Secondary    : FGT-2, FGVM010000065036, HA cluster index = 0
number of vcluster: 1
vcluster 1: work 169.254.0.2
Primary: FGVM010000064692, HA operating index = 0
Secondary: FGVM010000065036, HA operating index = 1
```

## New FortiGate HA configuration

```
FGT-1
#config system ha
  set group-id 3
  set group-name "Fortinet"
  set mode a-p
  set password *
  set hbdev "port9" 50 "port10" 50
  set session-pickup enable
  set override disable
  set priority 90
  set monitor port3
```

```
FGT-2
#config system ha
  set group-id 3
  set group-name "Fortinet"
  set mode a-p
  set password *
  set hbdev "port9" 50 "port10" 50
  set session-pickup enable
  set override enable
  set priority 110
  set monitor port3
```

FGT-1 and FGT-2 are updated with HA configuration commands shown in the exhibit. What would be the expected outcome in the HA cluster?

- A. FGT-2 will take over as the primary because it has the override enable setting and higher priority than FGT-1.
- B. The HA cluster will become out of sync because the override setting must match on all HA members.
- C. FGT-1 will synchronize the override disable setting with FGT-2.
- D. FGT-1 will remain the primary because FGT-2 has lower priority.

**Answer: A**

Explanation:

With override enabled, the primary unit with the highest device priority will always become the primary unit. Whenever an event occurs that may affect primary unit selection, the cluster negotiates. For example, when override is enabled a cluster renegotiates when you change the device priority of any cluster unit or when you add a new unit to a cluster.

Override and primary unit selection

Enabling override changes the order of primary unit selection. As shown below, if override is enabled, primary unit selection considers device priority before age and serial number. This means that if you set the device priority higher on one cluster unit, with override enabled this cluster unit becomes the primary unit even if its age and serial number are lower than other cluster units..

### NEW QUESTION # 41

.....

Some candidates may wonder that if the payment is quite complex and hard, in fact it is quite easy and simple. Once you have selected the NSE4\_FGT\_AD-7.6 study materials, please add them to your cart. Then when you finish browsing our web pages, you can directly come to the shopping cart page and submit your orders of the NSE4\_FGT\_AD-7.6 learning quiz. Our payment system will soon start to work. Then certain money will soon be deducted from your credit card to pay for the NSE4\_FGT\_AD-7.6 preparation questions. And we will send them to you in 5 to 10 minutes after your purchase.

**Reliable NSE4\_FGT\_AD-7.6 Test Preparation:** [https://www.pass4guide.com/NSE4\\_FGT\\_AD-7.6-exam-guide-torrent.html](https://www.pass4guide.com/NSE4_FGT_AD-7.6-exam-guide-torrent.html)

Many candidates write email to us that they bought NSE4\_FGT\_AD-7.6 exam preparation from other provider but after they purchase, there is no any reply from the provider, and they can't get any support about new NSE4\_FGT\_AD-7.6 dumps torrent, Fortinet Latest NSE4\_FGT\_AD-7.6 Exam Cost There are thousands of customers have passed their exam successfully and get the related certification, Fortinet Latest NSE4\_FGT\_AD-7.6 Exam Cost We often provide one to one service to help you.

He previously was a Staff Engineer at Smiths Industries, Avionic Systems Latest NSE4\_FGT\_AD-7.6 Exam Cost Division, where he was responsible for systems and software development techniques, Installation of Call Quality Dashboard Components.

## Pass Guaranteed Fortinet - Efficient NSE4\_FGT\_AD-7.6 - Latest Fortinet NSE 4 - FortiOS 7.6 Administrator Exam Cost

Many candidates write email to us that they bought NSE4\_FGT\_AD-7.6 Exam Preparation from other provider but after they purchase, there is no any reply from the provider, and they can't get any support about new NSE4\_FGT\_AD-7.6 dumps torrent.

There are thousands of customers have passed their exam successfully and get the NSE4\_FGT\_AD-7.6 related certification, We often provide one to one service to help you, You just need to click to purchase our Fortinet NSE 4 - FortiOS 7.6 Administrator test engine on our websites.

Now, let's prepare for the exam test with the NSE4\_FGT\_AD-7.6 training pdf offered by Pass4guide.
