## **Guidewire InsuranceSuite-Analyst Certification Exam & Certification InsuranceSuite-Analyst Exam Infor**

The Guidewire InsuranceSuite-Analyst online exam is the best way to prepare for the Guidewire InsuranceSuite-Analyst exam. ValidBraindumps has a huge selection of InsuranceSuite-Analyst dumps and topics that you can choose from. The InsuranceSuite-Analyst Exam Questions are categorized into specific areas, letting you focus on the Guidewire InsuranceSuite-Analyst subject areas

you need to work on.

## Guidewire Associate Certification - InsuranceSuite Analyst - Mammoth Proctored Exam Sample Questions (Q42-Q47):

### NEW QUESTION # 42

User story cards are filled out during elaboration and contain details about \_\_\_\_\_.

- A. Product configuration steps
- B. Validation and Business Rules
- C. Design elements including UI Mock up and Type-lists
- D. Guiding Principles

#### Answer: B

Explanation:

Comprehensive and Detailed Explanation:

During Elaboration Workshops, the primary goal is to define the behavior of the system required to satisfy the business need. This is captured on the User Story Card primarily through Validation and Business Rules (Option C).

\* Functional Logic: The core "detail" of a user story is the Acceptance Criteria. Acceptance Criteria are essentially a list of Business Rules (what the system must do) and Validations (what the system must check/prevent) to be considered "Done."

\* Analyst Role: The Business Analyst's main responsibility is to document these rules to ensure the developer builds the correct logic. Why other options are less correct:

\* B. Design elements: While UI Mockups and TypeLists are often attached or referenced, they represent the "Solution Design." The User Story Card itself focuses on the Requirement (The Rules). In Guidewire SurePath methodology, specific "Design" documents (like detailed UI specs) are often secondary to the functional Acceptance Criteria (Rules) defined in the story.

\* A & D: Guiding Principles are high-level project values, and Configuration Steps are developer tasks.

### NEW QUESTION # 43

Please select User Story Card best practices from the list below. (Choose two)

- A. Include field requirements in the UI Mock-up tab
- B. Include a requirement number for traceability
- C. Review every requirement with the team
- D. Change a requirement number after the story card has been published

#### Answer: B,C

Explanation:

Guidewire SurePath emphasizes consistency, clarity, and traceability when documenting User Story Cards.

Two key best practices that support these principles are including requirement numbers for traceability and reviewing every requirement with the team, making Options C and D correct.

Including a requirement number (Option C) is a critical best practice because it enables end-to-end traceability. Requirement numbers allow analysts to link business requirements to user stories, acceptance criteria, test cases, defects, and final delivery. This is especially important in regulated insurance environments and large Guidewire programs where scope control and auditability are essential.

Reviewing every requirement with the team (Option D) ensures shared understanding across Business Analysts, Developers, and Quality Analysts. These reviews help identify gaps, assumptions, and ambiguities early, reducing rework and defects later in the project. This collaborative approach aligns with Agile and Guidewire's emphasis on early validation.

The remaining options are not best practices. Field-level requirements should be documented in requirement or rules sections, not embedded in UI mockup tabs (Option A). Changing requirement numbers after publication (Option B) breaks traceability and creates confusion across dependent artifacts.

### NEW QUESTION # 44

\_\_\_\_\_ is a high-level sprint plan that is delivered at the end of Inception. It is used to provide guidance on which stories are prioritized based on value or risk.

- A. Pre-Inception Sprint Plan

- B. Development Sprint Plan
- C. Prioritized Sprint Plan
- D. Risk-based Sprint Plan
- E. Conceptual Sprint Plan

**Answer: E**

Explanation:

The Conceptual Sprint Plan is a key deliverable produced at the end of the Inception phase in Guidewire SurePath methodology. It provides high-level guidance on how user stories are expected to be sequenced across future sprints, typically based on business value, dependencies, and risk. It does not assign tasks or commit teams to detailed schedules but serves as a strategic roadmap for delivery.

This plan bridges business priorities and Agile execution and is essential for transitioning from Inception into Sprint Zero and active development.

**NEW QUESTION # 45**

Data Model Entities: Match the entity type with the appropriate description.

□

**Answer:**

Explanation:

Type key#A single reference to a value in a typelist

Foreign key#A single reference to the ID of another entity

Field#Atomic data stored about the entity (non-restricted values)

Array key#A set of references to another entity

In the Guidewire Data Model, entities consist of different types of columns/properties that define their structure and relationships:

\* Type key (B): This field creates a relationship between the entity and a Typelist (a pre-defined list of valid values, like a dropdown menu). For example, a Status field that can only be "Open", "Closed", or

"Pending" is a Type key pointing to the StatusType typelist. It references a single specific value from that list.

\* Foreign key (D): This creates a link to a specific instance of another entity. It stores the unique ID of that related object. This represents a "Many-to-One" or "One-to-One" relationship. For example, a Claim entity has a Foreign Key to a Policy entity (because one claim belongs to one specific policy).

\* Field (A): Often called a "Column" or "Atomic Field," this stores raw data such as Strings, Integers, Booleans, or Dates. It holds atomic data (e.g., "First Name", "Loss Date", "Coverage Amount") that is not restricted to a specific list of values like a Type key is.

\* Array key (C): This represents a "One-to-Many" relationship. It allows the parent entity to link to a collection (set) of child entities. For example, a Policy entity has an Array of Vehicle entities (because one policy can cover multiple vehicles).

**NEW QUESTION # 46**

Which team members are part of the Three Amigos meeting? (Select two)

- A. Business Analyst
- B. Subject Matter Expert
- C. Scrum Master
- D. Quality Analyst
- E. Project Manager

**Answer: A,D**

Explanation:

The Three Amigos meeting is a key Agile practice used in Guidewire projects to clarify user stories before development begins. It ensures shared understanding across execution roles and reduces defects caused by misinterpretation.

Two of the required participants in a Three Amigos session are the Business Analyst and the Quality Analyst, making Options A and B correct.

The Business Analyst represents business intent and functional requirements. They explain the user story, business rules, validations, and expected behavior.

The Quality Analyst represents the testing perspective. They focus on acceptance criteria, edge cases, and how the story will be validated to determine when it is "done." While Developers are typically the third "Amigo" in practice, they are not listed as an option in this question.

The Project Manager and Scrum Master facilitate delivery but do not play the execution-focused role of an Amigo. Subject Matter Experts provide input during elaboration but are not core participants in Three Amigos sessions.

## NEW QUESTION # 47

.....

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the test InsuranceSuite-Analyst certification can make them become that kind of people and if you are one of them buying our InsuranceSuite-Analyst Study Materials will help you pass the test smoothly with few efforts needed. Our InsuranceSuite-Analyst exam questions are valuable and useful and if you buy our product will provide first-rate service to you to make you satisfied.
