## Latest Salesforce Plat-Admn-202 Braindumps Pdf, Free Plat-Admn-202 Test Questions

Plat-Admn-202 test guide is not only the passbooks for students passing all kinds of professional examinations, but also the professional tools for students to review examinations. In the past few years, Plat-Admn-202 question torrent has received the trust of a large number of students and also helped a large number of students passed the exam smoothly. That is to say, there is absolutely no mistake in choosing our Plat-Admn-202 Test Guide to prepare your exam, you will pass your exam in first try and achieve your dream soon.

### Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>User Interface:</b> This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Data Modeling and Management:</b> This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>App Deployment:</b> This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Business Logic and Process Automation:</b> This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Salesforce Fundamentals:</b> This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.</li> </ul>

## Salesforce Certified Platform App Builder Sample Questions (Q79-Q84):

### NEW QUESTION # 79

Universal Containers assigns system access via permission sets and permission set groups to ensure each user has proper access. One department with varying levels of support staff has five consistent permission sets they require in order to complete their duties. Some higher-level staff have additional permission sets that are only required for them. How should an app builder recommend assigning permission sets to users?

- A. Utilize the Data Import Wizard to mass update the desired users with their full list of permission sets and permission set groups.
- B. Utilize the Data Loader to mass update the desired users with their full list of permission sets and permission set groups.
- C. Utilize the manage assignments button to assign each user with the same set of permission set groups and permission sets.
- **D. Utilize the manage assignments button to assign a permission set group and additional individual permission sets to each user.**

**Answer: D**

Explanation:

The app builder should recommend utilizing the manage assignments button to assign a permission set group and additional individual

permission sets to each user. This way, the app builder can assign the five consistent permission sets to all users in one permission set group, and then assign additional permission sets to higher-level staff as needed. Option B is incorrect because it will not account for the varying levels of support staff and their different permission sets. Option C is incorrect because the Data Import Wizard cannot be used to assign permission sets or permission set groups to users. Option D is incorrect because the Data Loader cannot be used to assign permission set groups to users.

#### NEW QUESTION # 80

An app builder at Cloud Kicks created a custom object and related fields in the schema builder. What next steps should the app builder take to ensure users can access the new object and fields?

- A. Create a permission set for access to the object and fields.
- **B. Add the fields to the page layout on the object.**
- C. Allow reporting for the object and fields.
- D. Assign data types to the fields on the object.

**Answer: B**

Explanation:

The app builder should add the fields to the page layout on the object to ensure users can access the new object and fields. The page layout determines which fields are visible and editable on the record detail page. Option A, B, and C are not necessary for this purpose.

#### NEW QUESTION # 81

An app builder wants to update a field on the parent record when a child record connected via lookup is deleted. What automation should the app builder use?

- A. Process Builder
- **B. Apex code**
- C. Workflow rule
- D. Screen flow

**Answer: B**

Explanation:

The app builder should use Apex code to update a field on the parent record when a child record connected via lookup is deleted. Apex code is a programming language that allows developers to execute complex logic on the Salesforce platform. Apex code can be triggered by certain events, such as insert, update, delete, or undelete of records. In this case, the app builder can write an Apex trigger that runs after a child record is deleted and updates a field on the parent record accordingly. Option A, B, and D are not automation tools that can perform this task.

#### NEW QUESTION # 82

The VP of Sales wants a Chatter post to the All-Sales private group when an opportunity goes to the closed won stage. What two tools should the app builder use to automate this process? Choose 2 answers

- A. Big Deal Alert
- B. Flow
- **C. Process Builder**
- **D. Workflow**

**Answer: C,D**

Explanation:

The app builder should use two tools to automate this process:

**Process Builder:** This is a type of automation tool that can execute actions based on certain criteria. In this case, the process builder can have a criteria that evaluates if an opportunity goes to the closed won stage, and then execute an action that posts a message to a Chatter group.

**Workflow:** This is another type of automation tool that can execute actions based on certain criteria. In this case, the workflow can have a criteria that evaluates if an opportunity goes to the closed won stage, and then execute an action that posts a message to a

Chatter group. Option A and C are not tools that can automate this process.

### NEW QUESTION # 83

The Service Manager provided the app builder with color code requirements for case age on open cases.

New cases populate a green circle

Day-old cases populate a yellow circle

Three-day-old cases populate a red circle

How should an app builder implement this requirement?

- A. Custom Button
- B. Lightning Web Component
- C. Quick Action
- **D. Formula Field**

**Answer: D**

Explanation:

A formula field is a read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change. You can use formula fields to display images based on certain conditions. In this case, a formula field can be used to display a green, yellow, or red circle image based on the case age.

### NEW QUESTION # 84

.....

The pass rate is 98.65% for the Plat-Admn-202 exam torrent, and we also pass guarantee and money back guarantee if you fail to pass the exam.
