### BCS Practitioner Certificate in Business Analysis Practice v5.0 Sample Questions (Q67-Q72):

#### NEW QUESTION # 67

A PESTLE analysis is being conducted for a small manufacturing company The following has been discovered.

The company's electricity provider is planning changes to the way in which electricity usage is calculated, it is likely that this will lead to increased electricity costs.

An amendment to the Data Protection Act has recently been introduced It states that information held about employees' payroll can now be held for more than six years, as long as the individual remains an employee How will this information be categorised in the PESTLE analysis? Select the TWO that apply

- A. Legal
- B. Environmental.
- C. Economic
- D. Political
- E. Technological

**Answer: A,C**

Explanation:

A PESTLE analysis is a technique for identifying and evaluating the political, economic, social, technological, legal and environmental factors that affect an organisation or project. It helps to assess the opportunities and threats that arise from the external environment. Therefore, options A and B are correct answers, as they are categories of factors that can be included in a PESTLE analysis for a small manufacturing company. They describe different aspects of the external environment that influence the company's situation and prospects. Option A describes a legal factor, which is a factor related to laws, regulations, standards or policies that govern an organisation or project. An example of a legal factor is an amendment to the Data Protection Act, which affects how information about employees' payroll can be held by an organisation. Option B describes an economic factor, which is a factor related to money, markets, trade or resources that affect an organisation or project. An example of an economic factor is a change in electricity usage calculation by an electricity provider, which affects how much electricity costs for an organisation. Option C is not a correct answer, as political is not a factor that has been discovered in the investigation for the PESTLE analysis. A political factor is a factor related to government, politics, power or conflict that affect an organisation or project. Option D is not a correct answer, as technological is not a factor that has been discovered in the investigation for the PESTLE analysis. A technological factor is a factor related to science, innovation, invention or discovery that affect an organisation or project. Option E is not a correct answer, as environmental is not a factor that has been discovered in the investigation for the PESTLE analysis. An environmental factor is a factor related to nature, ecology, climate or geography that affect an organisation or project.

#### NEW QUESTION # 68

A company is reviewing its critical success factors and key performance indicators So far. it has key performance indicators for the following The time to deliver orders for products Consumer satisfaction with products Wastage in product production The qualifications of production employees Which area of Kaplan and Norton's balanced business scorecard has NOT been considered?

- A. Financial
- B. Customer
- C. Learning and growth
- D. Internal business process

**Answer: A**

Explanation:

Explanation

Kaplan and Norton's balanced business scorecard is a strategic management tool that helps organisations to measure their performance across four perspectives: financial, customer, internal business process and learning and growth. The financial perspective focuses on how the organisation creates value for its shareholders and stakeholders. It includes measures such as revenue, profit, return on investment and cash flow. The customer perspective focuses on how the organisation meets the needs and expectations of its customers. It includes measures such as customer satisfaction, loyalty, retention and market share. The internal business process perspective focuses on how the organisation delivers its products and services to its customers. It includes measures such as quality, efficiency, productivity and innovation. The learning and growth perspective focuses on how the organisation develops its capabilities and competencies to achieve its goals. It includes measures such as employee skills, knowledge, motivation and empowerment. Therefore, option D is the correct answer, as financial measures have not been considered in the given list of key performance indicators. Option A is not correct, as learning and growth measures have been considered in the qualifications of production employees.

Option B is not correct, as internal business process measures have been considered in the time to deliver orders for products and wastage in product production. Option C is not correct, as customer measures have been considered in consumer satisfaction with products.

### NEW QUESTION # 69

Efua is planning to use Design Thinking to improve the m-store customer experience. She has asked you to suggest good techniques to help with the different stages.

Looking at the list of techniques and stages below which THREE combinations SHOULD be of benefit to Efua?

- A. Define Current user needs or problems.
- B. Create Personas
- C. Empathise Customer Journey Map
- D. Prototype: Scenario Analysis
- E. Evaluate Mind Mapping

**Answer: A,B,C**

Explanation:

Design Thinking is an approach for solving complex problems by focusing on human needs and desires. It involves five stages: empathise, define, ideate, prototype and test. Therefore, options B, D and E are correct answers, as they suggest good techniques to help with the different stages of Design Thinking. Empathise is the stage where the problem is explored from the perspective of the users and their emotions, motivations and pain points are understood. A good technique to help with this stage is Customer Journey Map, which is a visual representation of the steps and emotions that a user goes through when interacting with a product or service. It helps to identify the pain points and opportunities for improvement in the user experience. Create is the stage where the users are represented by creating personas, which are fictional characters that embody the characteristics, goals and needs of a typical user group. Personas help to empathise with the users and design solutions that suit their preferences and expectations. Define is the stage where the problem is clearly defined and articulated based on the insights gained from the empathise stage. A good technique to help with this stage is Current user needs or problems, which is a statement that summarises what the users need or want to achieve and what prevents them from doing so. It helps to focus on the core problem and set the direction for ideation. Option A is not a correct answer, as Prototype is not a stage of Design Thinking, but a technique that can be used in the Prototype stage. Prototype is the stage where the ideas are turned into tangible and testable prototypes that can be used to demonstrate and evaluate the solutions. A good technique to help with this stage is Scenario Analysis, which is a technique that explores how different scenarios or situations could affect the outcomes of the solutions. It helps to test the feasibility and desirability of the prototypes. Option C is not a correct answer, as Evaluate is not a stage of Design Thinking, but a technique that can be used in the Test stage. Test is the stage where the prototypes are tested with real users and feedback is collected and analysed to refine and improve the solutions. A good technique to help with this stage is Mind Mapping, which is a technique that organises and visualises information in a hierarchical and associative way. It helps to capture and structure feedback and identify patterns and insights.

### NEW QUESTION # 70

A business case contains the following in its management summary:

'The recommended option meets the new regulatory requirements. It will ensure our products remain in the marketplace and be the first to receive compliance certification, which will enhance our reputation as the market leader. New business policies and processes will be introduced, which may temporarily reduce productivity. The action plan will be communicated to all staff at the next monthly meeting.'

Which TWO categories of costs and benefits are described in this extract?

- A. Intangible costs.
- B. Intangible benefits
- C. Irregular costs
- D. Tangible costs
- E. Tangible benefits

**Answer: A,B**

Explanation:

A cost is an expenditure or sacrifice incurred or expected to be incurred as a result of a business change. A benefit is an advantage or improvement that is gained or expected to be gained as a result of a business change. Costs and benefits can be classified as tangible or intangible, depending on whether they can be measured in monetary terms or not. Therefore, options B and D are correct answers, as they describe intangible costs and benefits that are not easily quantified or valued. Intangible costs include the temporary reduction in productivity due to the introduction of new business policies and processes. Intangible benefits include the enhancement of the company's reputation as the market leader due to being the first to receive compliance certification. Option A is not a correct answer, as tangible costs are not described in the extract. Tangible costs are those that can be measured in monetary terms, such as the cost of purchasing new equipment or hiring new staff. Option C is not a correct answer, as tangible benefits are not described in the extract. Tangible benefits are those that can be measured in monetary terms, such as the increase in revenue or decrease in expenses.

### NEW QUESTION # 71

Maria is a business analyst working for a large supermarket chain, where she has been asked to work on a project exploring the potential opportunities of wearable technology. This work has led her to visit parts of the organisation that she has never come into contact with before and whilst observing and interviewing staff working in various stores and warehouses, she has identified a number of concerns, including noticeable gaps in staff training, stores and warehouses that seem to require extensive repair, and store management worries about cash flow. Maria is aware that these concerns are not directly related to the project she has been assigned to. However, she feels she has a responsibility to make her management team aware of these issues. As a way of enabling her organisation to fully explore these concerns and understand if any further intervention is required, which of the following would be the MOST valuable?

- A. Porter's Five Forces model
- B. PESTLE
- C. Resource audit
- D. SWOT.

**Answer: D**

Explanation:

Explanation

A SWOT analysis is a technique for identifying and evaluating the strengths, weaknesses, opportunities and threats that affect an organisation or project. It helps to assess the internal and external factors that influence the performance and potential of the organisation or project. Therefore, option B is the correct answer, as a SWOT analysis would be the most valuable technique for enabling the organisation to fully explore the concerns and understand if any further intervention is required. A SWOT analysis would help to identify the strengths and weaknesses of the organisation's current situation, such as the gaps in staff training, the state of the stores and warehouses, and the cash flow issues. It would also help to identify the opportunities and threats that arise from the external environment, such as the market trends, customer preferences, competitors' actions, and regulatory changes. A SWOT analysis would provide a comprehensive picture of the organisation's situation and help to prioritise the areas that need improvement or attention. Option A is not a correct answer, as a resource audit is a technique for identifying and evaluating the resources that an organisation has or needs to achieve its objectives. It helps to assess the availability and quality of the organisation's resources, such as human, physical, financial and intangible resources. A resource audit would not be sufficient to fully explore the concerns and understand if any further intervention is required, as it would only focus on one aspect of the organisation's situation and not consider the external factors that affect it. Option C is not a correct answer, as a PESTLE analysis is a technique for identifying and evaluating the political, economic, social, technological, legal and environmental factors that affect an organisation or project. It helps to assess the opportunities and threats that arise from the external environment. A PESTLE analysis would not be sufficient to fully explore the concerns and understand if any further intervention is required, as it would only focus on one aspect of the organisation's situation and not consider the internal factors that affect it. Option D is not a correct answer, as Porter's Five Forces model is a technique for analysing the competitive forces that shape an industry or market. It helps to assess the attractiveness and profitability of an industry or market by examining five forces: rivalry among existing competitors, threat of new entrants, threat of substitute products or services, bargaining power of suppliers, and bargaining power of buyers. Porter's Five Forces model would not be relevant to fully explore the concerns and understand if any further intervention is required, as it would not address the issues that affect the

organisation internally.
