Customized C_CPI_2506 Lab Simulation & C_CPI_2506 Certification Exam Infor

We provide 3 versions of our SAP Certified Associate - Integration Developer exam torrent and they include PDF version, PC version, APP online version. Each version's functions and using method are different and you can choose the most convenient version which is suitable for your practical situation. For example, the PDF version is convenient for you to download and print our C_CPI_2506 test torrent and is suitable for browsing learning. If you use the PDF version you can print our C_CPI_2506 Guide Torrent on the papers and it is convenient for you to take notes. You learn our C_CPI_2506 test torrent at any time and place. The PC version can simulate the real exam's environment, is stalled on the Windows operating system and runs on the Java environment. You can use it at any time to test your own exam stimulation tests scores and whether you have mastered our C_CPI_2506 guide torrent or not.

SAP Certified Associate - Integration Developer Sample Questions (Q27-Q32):

NEW QUESTION # 27

You are creating an API in the API management capability within SAP Integration Suite using Edit in API Designer. What is the next step to consolidate the resources?

- A. Generate the database tables.
- **B. Generate the server stubs**
- C. Generate the client stubs
- D. Generate the microservices.

Answer: B

Explanation:

After creating an API in the API management capability within SAP Integration Suite using Edit in API Designer, the next step to consolidate the resources is to generate the server stubs. Server stubs are code snippets that implement the API operations on a server-side application. They can be generated in different languages and frameworks, such as Java, Node.js, Python, or Spring Boot. Generating server stubs can help you to quickly prototype and test your API functionality without writing much code.

NEW QUESTION # 28

Why does the API Management capability of the SAP Integration Suite require API providers?

- A. To create APIs
- **B. To incorporate APIs from source systems**
- C. To create authenticated API instances

Answer: B

Explanation:

In API Management (Integration Suite):

API Providers represent backend systems (e.g., SAP S/4HANA, SuccessFactors, third-party APIs).

They are required to connect and incorporate APIs from those systems into API Management.

Once defined, API Proxies are created from API Providers to expose APIs securely.

Other options:

Authentication is handled via policies, not API Providers.

APIs are created as API Proxies, not directly by Providers.

Thus, the purpose of API Providers is to incorporate APIs from source systems.

NEW QUESTION # 29

What kind of editor can you use to manipulate integration flows?

- A. Code editor
- B. Command-line editor
- **C. Graphical editor**

Answer: C

Explanation:

To manipulate integration flows, you can use a graphical editor that is provided by SAP Integration Suite. The graphical editor allows you to visualize and edit your integration flows using a drag-and-drop interface. It also provides a palette of icons that represent different integration components and actions, such as senders, receivers, routers, mappers, transformers, and so on. You can use the graphical editor to design and configure complex integration scenarios in a user-friendly way. Reference: Overview of Integration Flow Editor | SAP Help Portal, Design and Deploy Your First Integration Flow | SAP Tutorials

NEW QUESTION # 30

You want to build an architecture that is largely asynchronous. Which design do you use to exchange notifications between the partners involved?

- A. Hexagonal design
- B. Event-driven design
- C. Serverless design
- D. Request-driven design

Answer: B

Explanation:

You can use an OData adapter to implement a synchronous call to a remote HTTP API as an integration flow component. An OData adapter allows you to send and receive messages using the OData protocol. OData stands for Open Data Protocol and is a standard for exposing and consuming data over HTTP or HTTPS. You can use an OData adapter to communicate with OData services that support CRUD (Create, Read, Update, Delete) operations on resources. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 31

In the SAP Integration Suite, where can you change the virtual host name?

- A. Design APIs
- B. Configure ? APIs
- C. Discover - APIs
- D. Settings APIs

Answer: D

Explanation:

In the SAP Integration Suite, you can change the virtual host name in the Settings APIs. The Settings APIs allow you to configure various aspects of your API provider, such as the virtual host name, the base path, the authentication method, and the CORS settings. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 32

.....

Countless SAP Certified Associate - Integration Developer C_CPI_2506 exam candidates have already passed their C_CPI_2506 certification exam and they all got help from top-notch C_CPI_2506 pdf questions and practice tests. You should not ignore it and must try real C_CPI_2506 exam questions today. The Exam-Killer is committed to making the SAP Certified Associate - Integration Developer C_CPI_2506 exam preparation process simple, quick, and smart in all aspects. To avail this objective the Exam-Killer is offering valid, updated, and real C_CPI_2506 practice test questions in three easy-to-use and high-in-demand formats. These formats are SAP PDF Questions files, desktop practice test software, and web-based C_CPI_2506 Practice Test software. All these three SAP Certified Associate - Integration Developer C_CPI_2506 exam question formats are designed and verified by experienced and qualified SAP C_CPI_2506 certification exam trainers. So you can trust SAP Certified Associate - Integration Developer C_CPI_2506 practice test questions and start C_CPI_2506 exam preparation without wasting further time.
