

Latest Cisco 300-445 Exam Forum, Certification 300-445 Torrent

What's more, part of that Exam4PDF 300-445 dumps now are free: <https://drive.google.com/open?id=1KMAPA9VenNb7DtK2m5EjrCN-whhDjPz1>

In order to allow you to safely choose Exam4PDF, part of the best Cisco certification 300-445 exam materials provided online, you can try to free download to determine our reliability. We can not only help you pass the exam once for all, but also can help you save a lot of valuable time and effort. Exam4PDF can provide you with the real Cisco Certification 300-445 Exam practice questions and answers to ensure you 100% pass the exam. When having passed Cisco certification 300-445 exam your status in the IT area will be greatly improved and your prospect will be good.

Cisco 300-445 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Platforms and Architecture: This domain covers understanding monitoring agent types and placement, active versus passive monitoring, and ThousandEyes WAN Insights. It addresses Cisco platform integrations, metric baselines, and selecting appropriate integration methods and assurance platforms based on business requirements.
Topic 2	<ul style="list-style-type: none">• Insights and Alerts: This domain addresses configuring alert rules based on network conditions and end-user experience factors. It covers selecting metrics for stakeholders, validating alerts, and recommending network optimization for capacity planning.
Topic 3	<ul style="list-style-type: none">• Data Analysis: This domain encompasses diagnosing network issues like packet loss, congestion, routing, and jitter, plus end-device problems. It includes analyzing web application performance and identifying security threats such as DDoS attacks, DNS hijacking, and BGP hijacking.
Topic 4	<ul style="list-style-type: none">• Data Collection Implementation: This domain focuses on deploying enterprise and endpoint agents across infrastructure and end-user devices. It covers configuring network, DNS, voice, web, and endpoint tests using ThousandEyes and Meraki Insights, along with implementing synthetic web tests and authentication methods.

Hot Latest 300-445 Exam Forum Free PDF | High-quality Certification 300-445 Torrent: Designing and Implementing Enterprise Network Assurance

Our 300-445 practice dumps compiled by the most professional experts can offer you with high quality and accuracy practice materials for your success. Up to now, we have more than tens of thousands of customers around the world supporting our 300-445 Exam Questions. If you are unfamiliar with our 300-445 study materials, please download the free demos for your reference, and to some unlearned exam candidates, you can master necessities by our 300-445 training guide quickly.

Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q62-Q67):

NEW QUESTION # 62

What is the primary function of a synthetic user agent in network assurance?

- A. Analyzing server logs
- **B. Generating simulated traffic**
- C. Configuring firewalls
- D. Monitoring physical hardware

Answer: B

Explanation:

Synthetic user agents generate simulated traffic to assess network performance and identify potential issues.

NEW QUESTION # 63

What feature of Thousand Eyes WAN Insights allows for predicting network performance trends?

- **A. Historical data analysis**
- B. Predictive modeling
- C. User behavior analysis
- D. Real-time packet capture

Answer: A

Explanation:

Thousand Eyes WAN Insights utilizes historical data analysis to predict network performance trends, enabling proactive optimization and resource allocation.

NEW QUESTION # 64

Which type of test are we using for these dashboards (Executive and IT Operations)?

- A. Agent to server
- B. HTTP server
- **C. Page Load**
- D. FTP

Answer: C

Explanation:

According to the Designing and Implementing Enterprise Network Assurance (300-445 ENNA) data analysis guidelines, identifying the underlying test type is the first step in interpreting a dashboard. By observing the metrics displayed across both the Executive and IT Operations dashboards, we can definitively identify the test type as Page Load (Option B).

A Page Load test is a Web-layer test that uses a browser engine (Chromium) to fully render a page and collect advanced metrics beyond simple availability. Evidence for this test type in the dashboards includes:

* Page Completion Time: Displayed on the Executive dashboard map, this metric is specific to how much of the page successfully rendered.

* DOM Load Time: Found in the IT Operations dashboard, the Document Object Model (DOM) time is a browser-centric metric that measures when the page structure has finished loading.

* Waterfall Charts: While not a specific answer option, these are the foundation of Page Load tests, allowing for the timing of individual web components.

Simple HTTP Server tests (Option A) only measure availability and response codes, missing the rendering metrics seen here. Agent to server (Option C) is a network-layer test that provides path visualization but no browser-level data. FTP (Option D) is a protocol-specific test not used for web application monitoring.

Therefore, the presence of DOM and Page Completion metrics confirms the Page Load test type.

NEW QUESTION # 65

What is the primary objective of synthetic testing in network assurance?

- A. Analyzing server logs
- B. Monitoring hardware health
- C. Simulating user interactions
- D. Identifying network vulnerabilities

Answer: C

Explanation:

The primary objective of synthetic testing is to simulate user interactions with applications, enabling proactive monitoring and performance optimization in network assurance.

NEW QUESTION # 66

In the IT operations dashboard, while comparing the latest metrics, what is the time difference between Page Load time and DOM time?

- A. 125.3 ms
- B. 150.4 ms
- C. 120.6 ms
- D. 100 ms

Answer: A

Explanation:

Detailed Explanation:

This analysis requires extracting two specific browser-rendering metrics from the IT Operations Dashboard.

By placing the cursor over the latest metrics data points:

* Page Load time: 1479.6 ms.

* DOM load time: 1354.3 ms.

By subtracting the DOM time from the Page Load time ($1479.6 \text{ ms} - 1354.3 \text{ ms} = 125.3 \text{ ms}$), the engineer identifies the duration spent rendering the page after the initial document structure was established.

NEW QUESTION # 67

.....

Our Cisco 300-445 qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the 300-445 Study Tool. You can trust us and let us be your honest cooperators in your future development. Here are several

advantages about our Cisco 300-445 exam for your reference.
