

Updated C_CPI_2506 Test Cram & C_CPI_2506 Premium Exam

[Pass SAP C_CPI_2506 Exam | Latest C_CPI_2506 Dumps & Practice Exams - Cert007](#)

Exam : C_CPI_2506

Title : SAP Certified Associate - Integration Developer

https://www.cert007.com/exam/c_cpi_2506/

1 / 5

P.S. Free & New C_CPI_2506 dumps are available on Google Drive shared by Test4Engine: https://drive.google.com/open?id=1k_2n9DxAsNOTG6w9F9QtPjGpI6T6kJ2H

The Test4Engine SAP Certified Associate - Integration Developer (C_CPI_2506) exam dumps are ready for quick download. Just choose the right Test4Engine SAP Certified Associate - Integration Developer (C_CPI_2506) exam questions format and download it after paying an affordable Test4Engine SAP Certified Associate - Integration Developer (C_CPI_2506) practice questions charge and start this journey. Best of luck in SAP C_CPI_2506 exam and career!!!

SAP Certified Associate - Integration Developer C_CPI_2506 actual dumps will help you in clearing doubts about the SAP C_CPI_2506 certification test. There are multiple benefits if you buy Test4Engine actual Exam Questions today. You will receive 365 days updates. We will provide you with these free updates if the C_CPI_2506 Real Exam content changes after your buying. All users can also download a free demo of our C_CPI_2506 actual dumps before buying. Buy Test4Engine updated C_CPI_2506 dumps today and get these excellent offers.

C_CPI_2506 Premium Exam - Reliable C_CPI_2506 Test Online

Among global market, SAP Certified Associate guide question is not taking up such a large share with high reputation for nothing.

And we are the leading practice materials in this dynamic market. To facilitate your review process, all questions and answers of our C_CPI_2506 test question is closely related with the real exam by our experts who constantly keep the updating of products to ensure the accuracy of questions, so all C_CPI_2506 guide question is 100 percent assured. We make C_CPI_2506 exam prep from exam candidate perspective, and offer high quality practice materials with reasonable prices but various benefits. The more times you choose us, the more discounts you may get. To make your whole experience more comfortable, we also provide considerate whole package services once you make decisions of our C_CPI_2506 Test Question. If you have any questions related to our C_CPI_2506 exam prep, pose them and our employees will help you as soon as possible.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 2	<ul style="list-style-type: none"> SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 3	<ul style="list-style-type: none"> Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 4	<ul style="list-style-type: none"> SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP Certified Associate - Integration Developer Sample Questions (Q56-Q61):

NEW QUESTION # 56

Which functionalities are used by OData?

- A. TCP, AtomPub, and JSON
- B. SOAP, AtomPub, and JSON
- C. **HTTP, AtomPub, and JSON**

Answer: C

Explanation:

OData uses HTTP, AtomPub, and JSON as its core functionalities. OData is an open protocol that allows the creation and consumption of queryable and interoperable RESTful APIs in a simple and standard way. OData builds on HTTP as the application protocol for transferring data between clients and servers. OData uses AtomPub as one of the formats for representing data feeds and entries in XML. OData also uses JSON as another format for representing data feeds and entries in a lightweight and human-readable way. Reference: Introducing OData - SAP Learning, OData Overview | OData - The Best Way to REST

NEW QUESTION # 57

You want to send messages over an SOAP adapter to an integration flow. Which method do you use to send the messages?

- A. PATCH
- B. GET
- C. UPDATE

- D. POST

Answer: D

Explanation:

When sending messages to an integration flow via SOAP adapter:

The request follows standard SOAP protocol semantics.

Messages are sent using HTTP POST, since SOAP messages are enclosed in an XML envelope carried in the HTTP request body. GET, UPDATE, PATCH are not applicable for SOAP operations.

Thus, the correct method is POST.

NEW QUESTION # 58

Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Debug
- B. Error
- C. Trace
- D. Info

Answer: C

Explanation:

To examine the payload at specific processing steps in an integration flow, you must use the Trace log level. The Trace log level provides the most detailed information about the message processing, including the payload content and the headers at each step. You can use the Message Processing Log to view the trace logs for a specific message. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 59

What must you do to find out which entity sets are available in the OData V2.0 interface?

- A. Search in the Global Directory of all available OData interfaces.
- B. Retrieve the metadata document from the interface.
- C. Retrieve the service document from the interface.
- D. Contact the OData interface manufacturer.

Answer: B

Explanation:

In SAP Integration Development, particularly when working with OData V2.0 interfaces, the correct way to identify the available entity sets is by retrieving the metadata document from the OData service. The metadata document, accessible via the \$metadata endpoint of the OData service, provides a comprehensive description of the service's data model, including all entity sets, entity types, properties, associations, and navigation properties. This document is formatted in XML (CSDL - Conceptual Schema Definition Language) and is essential for understanding the structure and capabilities of the OData service.

Why Option B is Correct:

* Metadata Document Role: The metadata document is a standard feature of OData V2.0 services, as defined by the OData protocol. It exposes the schema of the service, listing all entity sets and their properties. For example, accessing [https://<service-url>/\\$metadata](https://<service-url>/$metadata) returns an XML document detailing the entity sets, such as Customers, Orders, or other resources exposed by the service.

* SAP Reference: According to SAP documentation, such as the SAP Gateway Developer Guide and OData V2.0 Protocol Specification, the metadata document is the primary source for discovering the structure of an OData service. In SAP Gateway, which is commonly used for OData services in SAP environments, the \$metadata endpoint is automatically generated when an OData service is created using the Service Builder (transaction SEGW).

* Practical Usage: In SAP Integration Suite or SAP Cloud Integration, developers use the metadata document to configure integration flows (iFlows) that interact with OData services. Tools like SAP Business Application Studio or Eclipse with SAP plugins allow developers to import this metadata to generate client code or configure adapters.

Why Other Options are Incorrect:

* A. Retrieve the service document from the interface: The service document (accessed via the root URL of the OData service, e.g., <https://<service-url>/>) provides a list of entity sets but only includes their names and URLs, not the detailed structure (e.g., properties, types, or relationships). While it's useful for navigating to entity sets, it lacks the comprehensive schema information

provided by the metadata document, making it insufficient for fully understanding the entity sets' structure.

- * C. Search in the Global Directory of all available OData interfaces: There is no such thing as a "Global Directory" for OData interfaces in SAP or the broader OData ecosystem. OData services are specific to individual systems or applications, and their discovery is typically done via the service's metadata or service document, not a centralized directory.
- * D. Contact the OData interface manufacturer: This option is not practical or standard. OData is a protocol, not a product with a "manufacturer." The metadata document is the standard, self-contained way to explore an OData service, and no external contact is required.

SAP Integration Developer Workflow Example:

- * Access the OData Service: In an SAP environment, an Integration Developer identifies the OData service URL (e.g., https://<host>:<port>/sap/opu/odata/sap/<service_name>).
- * Retrieve Metadata: Append / \$metadata to the service URL to download the metadata XML. For example, [https://<host>:<port>/sap/opu/odata/sap/ZCUSTOMER_SRV/\\$metadata](https://<host>:<port>/sap/opu/odata/sap/ZCUSTOMER_SRV/$metadata).
- * Analyze Entity Sets: Parse the <EntitySet> elements in the metadata XML to identify available entity sets, their properties, and navigation paths.
- * Use in Integration: In SAP Cloud Integration, import the metadata into an iFlow's OData adapter to configure operations like querying or updating specific entity sets.

References:

SAP Help Portal: SAP Gateway Developer Guide - "OData Service Metadata" section, which explains the role of the \$metadata endpoint in exposing entity sets and their schema.

OData V2.0 Specification: Section 2.2.3.7.1, "Metadata Document," which mandates that OData services provide a metadata document describing entity sets and other resources.

SAP Integration Suite Documentation: "OData Adapter" section, which details how metadata is used to configure integration flows for OData services.

SAP Community Blogs: Articles on OData development in SAP Gateway, such as "Building OData Services with SAP Gateway," emphasize using the metadata document for service exploration.

NEW QUESTION # 60

You use an outbound HTTP adapter with basic authentication .In SAP Integration Suite, Monitor Integrations Manage Security, where must you set up and store a user and password?

- A. Security Material
- B. Access policies
- C. PGP Keys
- D. Keystore

Answer: A

Explanation:

To use basic authentication for outbound HTTP connections, you must store the user and password as credentials in the security material of SAP Integration Suite. Credentials are a type of security artifact that can be used to authenticate against external systems. You can create and manage credentials in the Monitor Integrations Manage Security Security Material section of SAP Integration Suite. Reference: Setting Up Outbound HTTP Connections with Basic Authentication | SAP Help Portal, Security Artifact Renewal for HTTPS-Based Communication | SAP Help Portal

NEW QUESTION # 61

.....

By using Test4Engine C_CPI_2506 questions pdf, you will be able to understand the real exam C_CPI_2506 scenario. It will help you get verified C_CPI_2506 answers and you will be able to judge your C_CPI_2506 preparation level for the C_CPI_2506 exam. More importantly, it will help you understand the real SAP Certified Associate - Integration Developer exam feel. You will be able to check the real exam scenario by using this specific C_CPI_2506 Exam PDF questions. Our C_CPI_2506 experts are continuously working on including new C_CPI_2506 questions material and we provide a guarantee that you will be able to pass the C_CPI_2506 exam on the first attempt.
