If you are still troubled for the F5 F5CAB3 Certification Exam, then select the ActualVCE's training materials please. ActualVCE's F5 F5CAB3 exam training materials is the best training materials, this is not doubt. Select it will be your best choice. It can guarantee you 100% pass the exam. Come on, you will be the next best IT experts.

The bundle has an F5 F5CAB3 exam questions and answers, desktop practice software, and web-based software. All the preparation products have been designed carefully with advice from hundreds of professional F5 certified experts. This F5 F5CAB3 exam questions preparation material has everything to achieve success in the BIG-IP Administration Data Plane Configuration exam on the first attempt. The unique features of ActualVCE F5CAB3 Preparation products have been noted. The F5CAB3 pdf exam questions by ActualVCE have the most realistic F5 F5CAB3 exam questions. This F5CAB3 pdf covers all the F5CAB3 Exam Questions from the previous exam as well as the upcoming BIG-IP Administration Data Plane Configuration exam. You don't need to consult different books for the F5 certification exam with the ActualVCE.

F5 Accurate F5CAB3 Answers: BIG-IP Administration Data Plane Configuration - ActualVCE High Pass Rate

Successful companies are those which identify customers' requirements and provide the solution to F5CAB3 exam candidate needs and to make those dreams come true, we are in continuous touch with the exam candidates to get more useful ways. We have favorable quality reputation in the mind of exam candidates these years by trying to provide high quality F5CAB3 Study Guide with the lowest prices while the highest quality. So you can't miss our F5CAB3 learning prep.

F5 F5CAB3 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Apply procedural concepts required to modify and manage virtual servers: This domain covers managing virtual servers including applying persistence, encryption, and protocol profiles, identifying iApp objects, reporting iRules, and showing pool configurations.
Topic 2	<ul style="list-style-type: none">Apply procedural concepts required to modify and manage pools: This domain addresses managing server pools including health monitors, load balancing methods, priority groups, and service port configurations.

F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q62-Q67):

NEW QUESTION # 62

In a pool there are 2 pool members out of the 5 members that are older servers. The number of connections these can handle is less than the other 3 pool members. Which load balancing method would allow more traffic to be directed to the newer servers?

- A. Global Availability
- **B. Weighted Least Connections (member)**
- C. Least Connections (member)
- D. Round Robin

Answer: B

Explanation:

When dealing with heterogeneous server hardware where some servers are more powerful than others, a dynamic load balancing method that accounts for both current load and server capacity is required. The Weighted Least Connections (member) method is the most appropriate choice. This method works by tracking the number of active connections to each pool member and then "weighting" that number based on a user-defined Ratio value assigned to the member. For example, the administrator can assign a higher Ratio to the three newer, more powerful servers and a lower Ratio to the two older servers. The BIG-IP then uses a formula to calculate which server should receive the next connection, ensuring that the newer servers handle a proportionately larger share of the total concurrent connections.

Standard Round Robin (Option C) would be ineffective because it distributes connections strictly sequentially (1, 2, 3, 4, 5) without regard for the servers' capacity or current load, which would eventually overwhelm the older servers. Least Connections (member) (Option D) is better than Round Robin because it picks the server with the fewest active connections, but it still assumes all servers are equal; it would try to keep the connection counts identical across all 5 servers, which would still stress the older hardware more than the new. Global Availability (Option B) is a GSLB (DNS-based) method used for multi-site redundancy, not for local pool member load balancing. By using Weighted Least Connections, the administrator achieves a balance where the more capable servers take the brunt of the work while the older servers are utilized only to their specific safe capacity.

NEW QUESTION # 63

Which Virtual Server type prevents the use of a default pool?

- **A. Forwarding (IP)**
- B. Standard
- C. Performance (Layer 4)
- D. Performance (HTTP)

Answer: A

Explanation:

Forwarding (IP) virtual servers operate at Layer 3 and forward traffic based on routing, not pools.

NEW QUESTION # 64

Where in the configuration utility should the BIG-IP Administrator verify the pool member currently assigned to a pool is on port 80?

- **A. Local Traffic > Pools: Pool List. Select the pool in question, select the Members tab, view the configured Service Port.**
- B. Local Traffic > Pools: Pool List. Select the pool in question, select Members tab, view the configured Health Monitor.
- C. Local Traffic > Nodes: Node List. Select the node in question, view the Health Monitor next to Configuration.

Answer: A

Explanation:

The BIG-IP Configuration Utility (GUI) organizes information hierarchically to allow for granular management of application objects. A Pool is a collection of backend servers (pool members) that provide the same service. To verify the specific network parameters—such as the IP address and the service port—of the servers within a pool, the administrator must navigate to the specific pool's configuration.

The standard procedural path to verify this is Local Traffic > Pools: Pool List, where the administrator selects the specific pool name. Once inside the pool's configuration, the Members tab displays a list of all IP addresses and service ports associated with that pool. Under the "Service Port" column, the administrator can confirm if the member is listening on port 80 (HTTP).

Options A and B are incorrect for this specific verification task. While Nodes (Option A) show the health of a physical server, a node represents only an IP address and does not have a "Service Port" associated with it until it is defined as a pool member.

Verifying the Health Monitor (Option B) would tell the administrator how the system is checking the member's status, but it does not definitively show the port on which the member is actually receiving application traffic. In a BIG-IP environment, a pool member is uniquely identified by the combination of its Node IP and its Service Port, and the Members tab is the primary interface for managing and auditing these specific member attributes.

NEW QUESTION # 65

A BIG-IP Administrator creates a new Virtual Server to load balance SSH traffic. Users are unable to log on to the servers. What should the BIG-IP Administrator do to resolve the issue?

- A. Set Destination Address/Mask to 0.0.0.0/0
- B. Set Protocol to UDP
- C. Set HTTP Profile to None
- D. Set Source Address to 10.1.1.2

Answer: C

Explanation:

SSH is a TCP Layer 4 protocol. Applying an HTTP profile causes BIG-IP to expect HTTP headers, breaking SSH sessions. Removing the HTTP profile allows raw TCP forwarding.

NEW QUESTION # 66

A Standard Virtual Server for a web application is configured with SNAT Automap. The original client IP must be known by backend servers.

What should the BIG-IP Administrator configure?

- A. HTTP Transparent profile
- B. SNAT pool using client IP
- C. Performance (HTTP) Virtual Server
- D. HTTP profile with X-Forwarded-For

Answer: D

Explanation:

X-Forwarded-For inserts the original client IP into HTTP headers while SNAT is enabled.

NEW QUESTION # 67

.....

Choosing our F5CAB3 learning guide is not only an enrichment of learning content, but also an opportunity to improve our own discovery space. Our F5CAB3 study guide materials could bring huge impact to your personal development, because in the process of we are looking for a job, hold a F5CAB3 certificate you have more advantage than your competitors, the company will be a greater probability of you. After using our F5CAB3 Study Guide materials, users can devote more time and energy to focus on their major and makes themselves more and more prominent in the professional field.
