Almost those who work in the IT industry know that it is very difficult to prepare for H13-624_V5.5. Although our VCE4Plus cannot reduce the difficulty of H13-624_V5.5 exam, what we can do is to help you reduce the difficulty of the exam preparation. Once you have tried our technical team carefully prepared for you after the test, you will not fear to H13-624_V5.5 Exam. What we have done is to make you more confident in H13-624_V5.5 exam.

Huawei H13-624_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.

Topic 2	<ul style="list-style-type: none"> • Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.
Topic 3	<ul style="list-style-type: none"> • Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.
Topic 4	<ul style="list-style-type: none"> • Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.

Reliable Huawei H13-624_V5.5 Exam Topics - Exam H13-624_V5.5 Introduction

Both theories of knowledge as well as practice of the questions in the H13-624_V5.5 practice quiz will help you become more skillful when dealing with the exam. Our experts have distilled the crucial points of the exam into our H13-624_V5.5 Training Materials by integrating all useful content into them. And you will find that it is easy to understand the content of the H13-624_V5.5 learning guide for our experts have simplified the questions and answers.

Huawei HCIP-Storage V5.5 Sample Questions (Q42-Q47):

NEW QUESTION # 42

What are the correct statements about Huawei OceanStor 18810 V5 products ()

- A. Huawei OceanStor 18810 v5 supports FC single link upgrade without host multipath perception
- B. Huawei OceanStor 18810 v5 supports front-end and back-end shared interface cards, using a fully interconnected hardware framework Structure
- C. SmartMatrix3.0 supported by Huawei OceanStor 18810 v5 can make Cache mirror Image and business pressure are more balanced
- D. Huawei OceanStor 18810 v5 supports controller 4 cups and 3 functions

Answer: A,B,C

NEW QUESTION # 43

A company purchased a set of Huawei horizontally extended file storage for the video surveillance system, and enabled the read and write fault tolerance of the InfoRevive feature. The mode provides data fault tolerance and configures the data protection level of EC to 4+1. If 2 pieces of data are invalid, How does InfoRevive feature guarantee business continuity and availability

- A. For the write operation, only 3 copies return a write success response, and the 2 copies that fail to write are no longer filled with 0s, and they are processed according to the striped write success.
- B. For the read operation, the system only successfully read 3 copies, and returns 3 copies of data that were successfully read, and the 2 copies that failed to read are all filled with 0s.
- C. For the read operation, the system only successfully read 3 copies, and returns 3 copies of successfully read data, and the 2 copies that failed to read pass the check data recover
- D. For the write operation, only 3 copies return a write success response, and the 2 copies that failed to write are all filled with 0s, and the write succeeds according to the section

Answer: C,D

NEW QUESTION # 44

For Huawei flash storage, a user can configure the DME IQ service for upload logs, including performance logs and disk health analysis (DHA) logs. DHA logs refer to routine run logs of disks, which contain collected disk health and I/O statistics.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

The *HCIP-Storage V5.5 Training Material (Module 5: Storage System Maintenance and Troubleshooting)* describes DME IQ: "DME IQ is a cloud-based management service that supports uploading performance logs and Disk Health Analysis (DHA) logs from Huawei flash storage. DHA logs include routine disk run data, such as health status and I/O statistics, used for predictive maintenance." This confirms the statement is true.

HCIP-Storage V5.5 Training Material, Module 5: Storage System Maintenance and Troubleshooting, Section 5.23: DME IQ and Log Management*, Huawei Technologies Co., Ltd.

NEW QUESTION # 45

After testing, the bandwidth of the two data centers of the customer is 155Mbit/s, the peak write bandwidth of an application is 9.8MB/s, and the average The write bandwidth is 300KB/s, the average write I/O size is 4KB., and the bandwidth utilization rate is 70%. Colleagues choose active and standby synchronous remote replication for disaster recovery Scheme, the scheme:

- A. Not feasible, 200Mbit/s is required to calculate the bandwidth.
- B. Feasible, because the conditions meet the requirements of the primary and standby synchronous remote replication disaster recovery program
- C. Not feasible. The primary and standby synchronous remote replication disaster recovery solution requires that the bandwidth utilization rate must be >80%.
- D. Not feasible. The primary and standby synchronous remote replication disaster recovery solution requires that the write I/O size must be less than 2KB.

Answer: B

NEW QUESTION # 46

An enterprise plans to purchase a set of storage equipment, and its business has different requirements for storage performance. Which of the following descriptions is wrong when performing hard disk selection, planning and design

- A. The performance layer uses SAS hard drives
- B. Enterprises have different requirements for storage performance. Considering the cost issue, it is recommended to use tiered storage
- C. It is recommended to use SS hard disks for the high-performance tier
- D. The capacity layer uses SATA HDD hard disks

Answer: A

NEW QUESTION # 47

.....

VCE4Plus is here to provide you with H13-624_V5.5 exam dumps. These Huawei H13-624_V5.5 practice test materials will help you secure the H13-624_V5.5 credential on the first attempt. VCE4Plus resolves every problem of the test aspirants with reliable Huawei H13-624_V5.5 Practice Test material. This H13-624_V5.5 practice exam imitates the Huawei H13-624_V5.5 real exam pattern. Thus, it helps you kill Huawei H13-624_V5.5 exam anxiety.
