Trustable Authentic SAFe-SPC Exam Questions & Leader in Certification Exams Materials & Unparalleled Reliable SAFe-SPC Test Experience

The Scaled Agile SAFe-SPC certification exam offers a great opportunity for professionals to demonstrate their expertise and knowledge level. In return, they can become competitive and updated with the latest technologies and trends. To do this they just need to enroll in Scaled Agile SAFe-SPC Certification Exam and have to put all efforts and resources to pass this challenging SAFe-SPC exam.

Scaled Agile SAFe-SPC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Launching an Agile Release Train: This section of the exam measures skills of the Scrum Master and focuses on the activities required to launch an Agile Release Train. It explains the preparation work, the training of teams, and the launch activities that bring the ART to life. Lesson 10 emphasizes readiness and alignment between teams.
Topic 2	<ul style="list-style-type: none"> • Building Solutions with Agile Product Delivery: This section of the exam measures skills of the Product Owner and focuses on delivering customer centric value. It explains design thinking, backlog prioritization, and program increment planning in a clear manner. It also covers developing on cadence and releasing on demand, followed by an overview of the continuous delivery pipeline with DevOps. Lesson 4 guides learners on building solutions that align with user needs.

Topic 3	<ul style="list-style-type: none"> Accelerating to Business Agility: This section of the exam measures skills of the Organizational Development Specialist and presents the key practices that accelerate Business Agility. It explains how to establish organizational agility and create a continuous learning culture. This final section helps learners understand how enterprises sustain improvement and adapt to future challenges.
Topic 4	<ul style="list-style-type: none"> Reaching the SAFe Tipping Point: This section of the exam measures skills of the Transformation Champion and addresses the earliest stages of change. It explains how to establish a clear vision for change and how to build a strong guiding coalition. Lesson 8 highlights the importance of commitment and sponsorship at the start of a transformation journey.
Topic 5	<ul style="list-style-type: none"> Becoming a Lean Agile Leader: This section of the exam measures skills of the Team Leader and focuses on the mindset required to lead with Lean Agile values. It explains the Lean Agile mindset, reviews SAFe core values, and presents SAFe principles in simple and practical terms. Lesson 2 helps leaders understand how their actions influence team culture and continuous improvement.
Topic 6	<ul style="list-style-type: none"> Enhancing the Portfolio: This section of the exam measures skills of the Enterprise Architect and addresses the scaling of value delivery. It discusses launching additional ARTs and value streams, strengthening enterprise solution delivery, and improving portfolio operations. It also reviews Lean governance and the ongoing work of LPM implementation. Lesson 12 focuses on expanding organizational capability.
Topic 7	<ul style="list-style-type: none"> Thriving in the Digital Age and Business Agility: This section of the exam measures skills of the Agile Team Member and covers the foundations of thriving in a digital environment. It introduces how SAFe functions as an operating system for Business Agility and highlights the essential core competencies needed for modern enterprises. Lesson 1 guides learners on how organizations adapt, innovate, and remain competitive in fast changing markets.

Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q102-Q107):

NEW QUESTION # 102

(Select 4) Lean-Agile Leaders _____.

- A. Facilitate relentless improvement
- B. Run successful Agile Release Trains.
- C. Lead the teams
- D. Embrace the values of Lean.
- E. Manage the most critical day-to-day activities of team members.
- F. Proactively eliminate impediments.

Answer: A,C,D,F

Explanation:

Lean-Agile Leaders:

A: Provide leadership and vision (lead, not manage day-to-day).

B: Proactively eliminate impediments, enabling teams.

D: Facilitate relentless improvement, driving a culture of learning.

E: Embrace and model Lean values.

Running ARTs (C) is the responsibility of the RTE, not all leaders. Managing day-to-day tasks (F) is command-and-control, not Lean-Agile leadership.

SPC 6.0 Guide: "Lean-Agile leaders lead by example, embrace Lean values, enable teams, and drive improvement."

NEW QUESTION # 103

What should a Supplier using a traditional methodology do when working with ARTs in a Value Stream?

- A. Attend key Value Stream events.
- B. Develop her own Vision and Roadmap.
- C. Demonstrate working software at each Solution Demo.

Answer: C

NEW QUESTION # 104

You are invited to help an Agile Release Train that has struggled through multiple PIs. They just finished the second Iteration in the current PI and have nothing to demonstrate at the System Demo. Program stakeholders are really concerned. What would you do?

- A. Re-plan the current PI: De-scope to leave enough time to integrate what you've built during the IP Iteration.
- B. Find a vendor that specializes in integrating system increments from multiple teams.
- C. Re-architect the system so that there are no dependencies between the teams and integration is not needed.
- D. Stop working on any new functionality and fully integrate and test the system; adjust scope based on learnings.
- E. Have every team demonstrate their team increment to the stakeholders separately in the team branch.

Answer: D

Explanation:

When the ART cannot show integrated value at the System Demo, it indicates that teams are not continuously integrating and testing, leading to lack of transparency and feedback. SAFe emphasizes continuous integration and working, tested systems at every iteration. The best immediate action is to stop new work and focus on integrating and testing what has been built, learning from this to improve future practices. This will help restore trust with stakeholders and reveal root causes for future improvements.

"When the system is not integrated, the team should stop developing new functionality and invest in integration and testing. This enables learning, ensures stakeholder visibility, and helps restore the regular cadence of System Demos." (Source: SAFe 6.0 Framework: System Demo, Continuous Integration; SPC 6.0 Guide, "Coaching ART Execution")

NEW QUESTION # 105

Multiple ARTs in a Value Stream typically require coordination at the Value Stream Level.

- A. True
- B. False

Answer: A

Explanation:

In SAFe, when a solution requires more capacity than a single ART (Agile Release Train) can provide, multiple ARTs are grouped into a Solution Train. These ARTs work together within a Value Stream. The Value Stream level provides coordination, additional roles, and artifacts to align the multiple ARTs toward delivering larger, complex solutions.

"When multiple ARTs collaborate to build a solution, coordination at the Value Stream level is required. The Solution Train roles and events support alignment and integration of the work across ARTs and Suppliers." References:

NEW QUESTION # 106

How does a team calculate its initial velocity during its first PI Planning meeting when teams don't have historic data?

- A. Assign 10 points per team member (not counting the Scrum Master and Product Owner) and subtract 1 point for each holiday or vacation day.
- B. Assign 8 points per team member (not counting the Scrum Master and Product Owner) and subtract 1 point for each holiday or vacation day.
- C. It is not recommended to calculate velocity until the team has completed its first PI.
- D. Allow teams to establish their own velocity and then roll them up to calculate the velocity of the train.

Answer: A

Explanation:

SAFe's guidance for new teams without historical velocity is to assign 8-12 points per team member (typically 10) except Scrum Master and Product Owner, subtracting points for planned absences.

"For initial velocity, a simple guideline is to assume 8-12 points per team member (excluding Scrum Master and Product Owner), then subtract 1 point for each day of vacation or holiday." (Source: SAFe 6.0 Framework: PI Planning Preparation)

NEW QUESTION # 107

.....

Our website provides the most up-to-date and accurate SAFe-SPC dumps torrent which are the best for passing certification test. It will help you to accelerate your knowledge and improve your professional ability by using our SAFe-SPC VCE Dumps.
