Pass Guaranteed 300-425 - Updated Designing Cisco Enterprise Wireless Networks Exam Collection Pdf

By practicing under the real exam scenario of this Cisco 300-425 web-based practice test, you can cope with exam anxiety and appear in the final test with maximum confidence. You can change the time limit and number of questions of this Cisco 300-425 web-based practice test. This customization feature of our Designing Cisco Enterprise Wireless Networks (300-425) web-based practice exam aids in practicing as per your requirements. You can assess and improve your knowledge with our Cisco 300-425 practice exam.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q141-Q146):

NEW QUESTION # 141

An enterprise is using the wireless network as the main network connection for corporate users and guests. To wireless network availability. Two Standalone controllers are installed in the head office. APs are connected to the controllers using a round-robin approach to load balance the traffic. After a power cut, the wireless clients disconnect while roaming. An engineer tried eping from the controller but fails. Which protocol needs to be allowed between the networks that the controllers are installed?

- A. IP Protocol 87
- B. IP Protocol 77
- C. IP Protocol 67
- **D. IP Protocol 97**

Answer: D

Explanation:

The protocol that needs to be allowed between the networks where the controllers are installed is IP Protocol 97, which is used for encapsulating IP within IP, often used in network mobility and IP tunneling.

NEW QUESTION # 142

An engineer has successfully configured high availability and SSO using two Cisco 5508 Wireless LAN Controllers. The engineer can access the Active Primary WLC, but the Secondary Standby WLC is not accessible. Which two methods allow access to the standby unit? (Choose two.)

- A. SSH to the redundancy management interface of the primary WLC
- **B. via the console connection**
- C. SSH to the management interface of the primary WLC
- **D. SSH to the service port interface**
- E. SSH to the virtual interface of the secondary WLC

Answer: B,D

Explanation:

In a high availability setup with Cisco 5508 Wireless LAN Controllers, the standby controller can be accessed via the console connection and the service port interface. The console provides direct access, while the service port interface allows for network-

based access to the standby unit for management purposes.

NEW QUESTION # 143

A medium-sized hospitality company with 50 hotels needs to upgrade the existing WLAN in each hotel to 802.11n. During the site surveys for each hotel, what needs to be taken into consideration when determining the locations for each AP?

- A. Selecting locations that make visual assessment of the AP operation easy.
- **B. Selecting locations that are easily accessed so maintenance and upgrades can be performed quickly.**
- C. Selecting AP locations where power is already available.
- D. Selecting APs that can be hidden in ceiling panels to provide a secure and clean aesthetic look.

Answer: B

Explanation:

When conducting site surveys for WLAN upgrades to 802.11n, it's important to consider AP locations that allow for easy access. This facilitates quick maintenance and upgrades, ensuring minimal downtime and disruption to the network. While aesthetics and power availability are also considerations, the primary focus should be on maintaining the network's performance and reliability. NEW QUESTION # 144

An engineer must decide the cell overlap for a wireless voice deployment. Which Cisco measurement recommendation should be considered?

- A. The edge of the cell should be below 35 RSSI.
- B. The measurement should be done on the 2.4-GHz band.
- C. One AP should be deployed per 3000 square feet.
- **D. The edge of the cell should be -67 dBm.**

Answer: D

Explanation:

NEW QUESTION # 145

Refer to the exhibit.

Which two statements about Cisco Prime Infrastructure are true? (Choose two.)

- **A. It shows the planning mode feature in Cisco Prime Infrastructure.**
- B. Planning mode requires a special license in Cisco Prime Infrastructure.
- C. Controllers must be synchronized with Cisco Prime Infrastructure for planning mode to work.
- D. It shows the map editor feature in Cisco Prime Infrastructure.
- **E. It presents the recommended number of APs for the selected coverage area based on the selections made.**

Answer: A,E

Explanation:

NEW QUESTION # 146

.....

In line with the concept that providing the best service to the clients, our company has forged a dedicated service team and a mature and considerate service system. We not only provide the free trials before the clients purchase our 300-425 training materials but also the consultation service after the sale. We provide multiple functions to help the clients get a systematical and targeted learning of our 300-425 Certification guide. So the clients can trust our 300-425 exam materials without doubt.
