

100% Pass Rate Cisco Reliable 350-701 Exam Voucher - 350-701 Free Download

P.S. Free & New 350-701 dumps are available on Google Drive shared by Real4test: <https://drive.google.com/open?id=1leRA2iscnmltwV5mDKCwuvnFwAv6DOT>

Our staff will be on-line service 24 hours a day. I believe that you have also contacted a lot of service personnel, but I still imagine you praise the staff of our 350-701 study engine. They have the best skills and the most professional service attitude on the 350-701 Practice Questions. He can solve any problems you have encountered while using 350-701 exam simulating for all of our staffs are trained to be professional to help our customers. And they are kind and considerate.

Exam Topics

The candidates for the Cisco 350-701 Exam are required to develop a good comprehension of the topics covered in its content before attempting the test. The detailed outline of knowledge and skills measured in the exam can be downloaded from the official website. A brief description of the domains of the 350-701 certification test is provided below:

Security Concepts – 25%

- Describing DNAC APIs for network optimization, provisioning, monitoring, and troubleshooting;
- Explaining security intelligence consumption, sharing, and authoring;
- Describing North Bound & South Bound APIs within the SDN architecture;
- Explaining the most common threats against the Cloud as well as on-premises environments;
- Interpreting the elementary Python scripts that are utilized to call Cisco Security appliances APIs;
- Describing the function of the endpoint in the protection of humans from phishing & social engineering attacks;
- Comparing the most often security vulnerabilities, such as weak and hardcoded passwords, software bugs, SQL injection, path traversal, buffer overflow, missing encryption, and cross-site scripting/forgery;
- Describing the functionality of the cryptography elements, such as encryption, hashing, NAT-T IPv4 for IPsec, SSL, PKI, IPsec, pre-shared key & certificate-based authorization;

350-701 Reliable Exam Simulations & 350-701 Test Certification Cost

Our 350-701 study materials are very popular in the international market and enjoy wide praise by the people in and outside the circle. We have shaped our 350-701 exam questions into a famous and top-ranking brand and we enjoy well-deserved reputation among the clients. Our 350-701 study materials boast many outstanding and superior advantages which other same kinds of products don't have. The clients can try out and download our study materials before their purchase. They can immediately use our 350-701 training guide after they pay successfully.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q183-Q188):

NEW QUESTION # 183

Where are individual sites specified to be blacklisted in Cisco Umbrella?

- A. security settings
- B. application settings
- C. destination lists
- D. content categories

Answer: C

Explanation:

A destination list is a list of internet destinations that can be blocked or allowed based on the administrative preferences for the policies applied to the identities within your organization. A destination is an IP address (IPv4), URL, or fully qualified domain name. You can add a destination list to Umbrella at any time; however, a destination list does not come into use until it is added to a policy. Reference: <https://docs.umbrella.com/deployment-umbrella/docs/working-with-destination-lists>

NEW QUESTION # 184

With which components does a southbound API within a software-defined network architecture communicate?

- A. appliances
- B. devices such as routers and switches
- C. applications
- D. controllers within the network

Answer: B

Explanation:

The Southbound API is used to communicate between Controllers and network devices.

NEW QUESTION # 185

A Cisco Secure Cloud Analytics administrator is setting up a private network monitor sensor to monitor an on-premises environment. Which two pieces of information from the sensor are used to link to the Secure Cloud Analytics portal? (Choose two.)

- A. Private IP address
- B. NAT ID
- C. Unique service key
- D. Public IP address
- E. SSL certificate

Answer: B,C

NEW QUESTION # 186

What is the difference between EPP and EDR?

- A. Having an EDR solution gives an engineer the capability to flag offending files at the first sign of malicious behavior.
- B. EPP focuses primarily on threats that have evaded front-line defenses that entered the environment.
- C. EDR focuses solely on prevention at the perimeter.
- D. Having an EPP solution allows an engineer to detect, investigate, and remediate modern threats.

Answer: A

Explanation:

EPP and EDR are two types of endpoint security solutions that have different goals and capabilities. EPP stands for endpoint protection platform, which is a suite of technologies that work together to prevent, detect, and remediate security threats on

endpoints. EPP solutions use techniques such as antivirus, firewall, application control, and patch management to block known and unknown malware and malicious activity.

EDR stands for endpoint detection and response, which is a solution that provides real-time visibility into endpoint activities and enables security teams to detect, investigate, and respond to advanced threats that may have bypassed EPP defenses. EDR solutions use techniques such as behavioral analysis, threat intelligence, and incident response to flag offending files at the first sign of malicious behavior, contain and isolate compromised endpoints, and remediate the damage caused by the attack. Therefore, the correct answer is D, as having an EDR solution gives an engineer the capability to flag offending files at the first sign of malicious behavior.

The other options are incorrect because:

- * A is false, as EPP focuses primarily on threats that have evaded front-line defenses that entered the environment, not EDR.
- * B is false, as having an EPP solution allows an engineer to detect, investigate, and remediate modern threats, not EDR.
- * C is false, as EDR focuses on detection and response at the endpoint level, not prevention at the perimeter. References:

NEW QUESTION # 187

Drag and drop the deployment models from the left onto the explanations on the right.

Answer:

Explanation:

□ Explanation:

NEW QUESTION # 188

Why do we need so many certifications? One thing has to admit, more and more certifications you own, it may bring you more opportunities to obtain a better job, earn more salary. This is the reason why we need to recognize the importance of getting the test 350-701 certification. Our passing rate is 98%-100% and there is little possibility for you to fail in the exam. But if you are unfortunately to fail in the exam we will refund you in full immediately. Some people worry that if they buy our 350-701 Exam Questions they may fail in the exam and the procedure of the refund is complicated.
