

# ExamDumpsVCE Offers Three Formats of Updated Nutanix NCP-EUC Exam Questions

## How to Get Ready for the Nutanix NCP-CI-AWS Exam Quickly?

In today's challenging IT sector, earning the Nutanix NCP-CI-AWS certification helps you accelerate your career. The Nutanix Certified Professional NCP-CI-AWS certification proves your technical expertise and also bolsters your credibility in the industry. Furthermore, success in the NCP-CI-AWS certification exam differentiates you from a pool of thousands of job seekers and enhances your chances of landing well-paid jobs and promotions. However, many applicants encounter problems such as a short time and a lack of self-assessment while preparing for the Nutanix Certified Professional - Cloud Integration - AWS v6.7 NCP-CI-AWS exam. If you are also facing these challenges, don't worry and choose JustCerts, which is dedicated to providing actual and the latest NCP-CI-AWS exam questions in three formats. With the help of these real [Nutanix Dumps](#), you can get ready for the exam in a short time.

## Authentic (Valid) Details Regarding The Nutanix NCP-CI-AWS Exam Questions

- VENDOR: (Nutanix)
- EXAM CODE: (NCP-CI-AWS)
- EXAM NAME: (Nutanix Certified Professional - Cloud Integration - AWS v6.7)
- Number OF Questions: (75)
- Certification Name: (Nutanix Certified Professional)
- Exam Language: (ENGLISH)
- Promo Code For Nutanix NCP-CI-AWS Exam Questions: "SAVE25"

*Limited Time Huge Sale Offer On All Exams! 25% Extra OFF! Use Coupon Code: Save25*

2026 Latest ExamDumpsVCE NCP-EUC PDF Dumps and NCP-EUC Exam Engine Free Share: <https://drive.google.com/open?id=1d0EhUOwpSPzRpg3Zom71nMOL2oJ3b8RW>

Our test engine is an exam simulation that makes our candidates feel the atmosphere of NCP-EUC actual test and face the difficulty of certification exam ahead. It reminds you of your mistakes when you practice NCP-EUC vce dumps next time and you can set your test time like in the formal test. Our NCP-EUC Training Materials cover the most content of the real exam and the accuracy of our NCP-EUC test answers is 100% guaranteed.

Nutanix Certified Professional - End-User Computing (NCP-EUC) exam is designed to test the skills and knowledge of IT professionals in deploying and managing Nutanix end-user computing solutions. NCP-EUC exam is intended for individuals who have experience in virtualization, desktop and application delivery, and data center operations. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification demonstrates their proficiency in designing, implementing, and maintaining Nutanix-based EUC solutions.

The NCP-EUC Certification Exam is intended for IT professionals who are responsible for managing EUC solutions in their organizations. This includes administrators, architects, engineers, and consultants. NCP-EUC exam covers a wide range of topics related to EUC, including virtual desktop infrastructure (VDI), desktop as a service (DaaS), application virtualization, and user experience (UX). By passing NCP-EUC exam, you can demonstrate your expertise in these areas and enhance your career prospects.

## Latest Braindumps NCP-EUC Book, New NCP-EUC Exam Pdf

We have always taken care to provide the best Nutanix NCP-EUC exam dumps to our customers. That's why we offer many other benefits with our product. We provide a demo version of the real product to our customers to clear their doubts about the truthfulness and accuracy of Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) preparation material. You can try the product before you buy it.

### Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q127-Q132):

#### NEW QUESTION # 127

Refer the exhibit.

Which statement is true?

- A. Five instances are running on every Weekday from 00:00am till 24:00 pm
- B. Five instances are running on every Weekday from 09:00am till 05:00 pm
- **C. Five instances are running Tuesday and Thursday from 00:00am till 24:00 pm**
- D. Five instances are running Tuesday and Thursday from 09:00 am till 05:00 pm

**Answer: C**

Explanation:

The schedule has two rows: one for Weekdays and one for Tuesday and Thursday.

Each row has a column for Instances, which indicates how many instances should be running during that time range.

Each row also has a column for Time Range, which indicates the start and end time for running the instances.

The time range is expressed in 24-hour format, where 00:00 means midnight and 24:00 means midnight of the next day.

According to the exhibit, the schedule Dev has the following settings:

On Weekdays (Monday to Friday), five instances are running from 09:00 am till 05:00 pm.

On Tuesday and Thursday, five instances are running from 00:00 am till 24:00 pm.

#### NEW QUESTION # 128

In Frame, what occurs when the minimum value in the capacity settings is set to less than the Quick Publish value specified?

- A. The administrator will receive an error notification.
- **B. Quick Publish value settings are ignored, and regular publishing is performed.**
- C. Regular publish value settings are ignored and Quick Publish values are performed.
- D. A user will not be able to launch their Frame Desktop or Application

**Answer: B**

Explanation:

Nutanix Frame allows administrators to configure capacity settings for their virtual machines (VMs) that run virtual apps and desktops.

Capacity settings include:

Default capacity, which defines how many VMs are turned on when there is no user activity on the account. This setting helps reduce costs by turning off unused VMs.

Active capacity, which defines how many VMs are turned on when there is user activity on the account.

This setting helps improve performance by ensuring enough VMs are available for user sessions.

Quick Publish, which defines how many VMs are updated with the latest changes when publishing a new version of an app or desktop. This setting helps speed up the publishing process by updating only a subset of VMs instead of all of them.

According to Nutanix Frame documentation<sup>1</sup>, Quick Publish value should be equal to or less than the active capacity value for each instance type.

If Quick Publish value is set higher than active capacity value, then Frame will ignore Quick Publish value and perform regular publishing instead.

<https://docs.frame.nutanix.com/platform/admin/capacity/>

#### NEW QUESTION # 129

An administrator is asked to configure a container to support 2000 non-persistent linked clone desktops. What is the optimal configuration of this container?

- A. Compression and Deduplication
- **B. Compression Only**
- C. Compression, Deduplication, and ECX
- D. Deduplication Only

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix storage best practices for Virtual Desktop Infrastructure (VDI), the optimal configuration for Linked Clones is Compression Only.

\* **Linked Clones and Data Efficiency:** In a Linked Clone environment, the Virtual Machines (VMs) already share a common base image (replica disk) at the hypervisor level. Because the identical operating system data is already shared via the cloning technology, the Nutanix Distributed Storage Fabric (DSF) manages this duplicate data efficiently without needing the Deduplication feature enabled on the container.

\* **Redundancy of Deduplication:** Nutanix technical documentation explicitly states that for Linked Clones or Nutanix VAAI clones, deduplication provides no additional benefit because the data is already single-instanced. Enabling deduplication in this scenario would introduce unnecessary metadata overhead without delivering significant capacity savings.

\* **Role of Compression:** Inline Compression is recommended for almost all workloads, including VDI. It effectively reduces the size of the unique data written to the delta disks (user data, temp files, and logs) associated with non-persistent desktops, maximizing storage efficiency without the performance cost of deduplication.

\* **Shadow Clones:** For the read-heavy workload of 2000 desktops accessing the same base image, Nutanix utilizes Shadow Clones (enabled by default) to cache the "hot" replica disk locally on every node, ensuring high performance during boot storms, rendering the need for "performance tier deduplication" redundant for linked clones.

Summary of Best Practice:

\* Full Clones / Persistent Desktops: Compression + Deduplication.

\* Linked Clones / Non-Persistent Desktops: Compression Only.

### NEW QUESTION # 130

An administrator is supporting two Nutanix Io-node AHV clusters (Cluster01 and Cluster02) dedicated for VDI workloads. The administrator has started receiving complaints regarding the performance of several full clone virtual desktops within Cluster01, upon review of both clusters, below are the discovered utilization metrics:

Cluster01 utilizations:

\* Cluster CPU:85%

\* Cluster Memory: 94%

\* storage:50%

Cluster02 utilizations:

\* Cluster CPU:30%

\* Cluster Memory:35%

\* storage:40%

Datacenter policy requires 20% resource overhead.

Which action should the administrator take to resolve this issue?

- A. Review the Hardware dashboard.
- B. Use X-Ray to migrate the virtual desktops.
- C. Review the VM Overview dashboard.
- **D. use a Recovery Plan to migrate the virtual desktops.**

**Answer: D**

Explanation:

administrator can take to resolve the issue of performance for several full clone virtual desktops within Cluster01 by migrating them to Cluster02.

a recovery plan is a set of steps that defines how to recover guest VMs from a disaster. A recovery plan can be used to migrate VMs between Nutanix clusters at the same or different availability zones1.

### NEW QUESTION # 131

An administrator has added a tagged VLAN to virtual switch vs1 to support virtual machine traffic. While troubleshooting network utilization, it is observed that only one of the physical NICs in the bond is carrying VM traffic. What can be done to better balance VM traffic?

- A. Move VM traffic to the default virtual switch.
- **B. Update the virtual switch to Active-Active.**
- C. Add a second vNIC to the virtual machine.
- D. Increase the MTU to allow jumbo frames.

**Answer: B**

Explanation:

In Nutanix AHV networking, the default bond mode for a virtual switch is Active-Backup. In this mode, all traffic flows through a single active physical uplink, while other uplinks remain in standby mode to be used only in the event of a failure. This explains the observation that "only one of the physical NICs... is carrying VM traffic." To utilize multiple physical uplinks simultaneously and balance the traffic, the administrator must change the bond mode to an Active-Active configuration. In AHV, this is achieved by configuring the bond mode to Balance-SLB (Source Load Balancing) or Balance-TCP (LACP). These modes distribute VM traffic across all available physical interfaces in the bond, thereby balancing the load.

### NEW QUESTION # 132

.....

In order to make sure your whole experience of buying our NCP-EUC prep guide more comfortable, our company will provide all people with 24 hours online service. The experts and professors from our company designed the online service system for all customers. If you decide to buy the NCP-EUC study braindumps from our company, we can make sure that you will have the opportunity to enjoy the best online service provided by our excellent online workers. If you purchasing the NCP-EUC Test Practice files designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period. If you have any questions about our study materials, you can send an email to us, and then the online workers from our company will help you solve your problem in the shortest time. So do not hesitate to buy our NCP-EUC prep guide.
