您準備好CIPS L4M7考試嗎？是否了解最新的認證考試資訊呢？無論是您需要準備什麼IT認證考試，Testpdf都能幫助您成功通過首次嚴格的考試。針對L4M7認證考試，我們專業的IT講師研究出最適合考試使用的CIPS L4M7考古題資料，包括當前最新的考題題目。在我們網站，您可以享受100%安全的購物體驗，對於購買L4M7考古題的客戶，我們還提供一年的免費線上更新服務，一年之內，如果您購買的產品更新了，我們會免費發送您更新版本的L4M7考古題。

最新的 Level 4 Diploma in Procurement and Supply L4M7 免費考試真題 (Q229-Q234):

問題 #229

In inventory management, the cost of insurance and taxes are included in which group?

- A. Inventory carrying cost
- B. Acquisition costs
- C. Costs of shortage
- D. Set up costs

答案: A

解題說明:

Direct and indirect costs of holding inventory include the following:

1. Acquisition costs
2. Holding costs (carrying costs) are the costs associated with the storage and handling of physical stock. There are two different types of holding costs:
 - a. Costs related to the value of the goods: financial costs (i.e. the interest on the working capital tied up in inventory, which may be the bank borrowing rate or the company's target for return on capital); cost of insurance; losses due to product deterioration; losses due to obsolescence and redundancy of inventory; losses due to theft, accidental damage etc.
 - b. Costs related to the physical characteristics of the inventory include the following: storage space; power, heat and lighting of the store; movement equipment; labour costs; administration costs.
3. Costs of stockouts

問題 #230

Which of the following is the correct statement about total ordering cost?

- A. Equal the number of orders placed times the cost of placing an order
- B. Rise as the order quantity rises
- C. Rise as the average stock level rises
- D. Fall with the per period usage rate

答案: A

解題說明:

Typically, ordering costs include expenses for a purchase order, labor costs for the inspection of goods received, labor costs for placing the goods received in stock, labor costs for issuing a supplier's invoice and labor costs for issuing a supplier payment. These costs are irrelevant from the size of the order and are incurred every time a firm places an order.

The total ordering cost will be equal to ordering cost per order multiply with number of orders.

問題 #231

Zemora Clothing Inc. receives high-priced garments with devices hidden inside the lining. This is done to avoid possible fraudulent removal of the garments from the shop. These tags are activated when the items arrive at the stores. When a garment is moved by a customer from a display area, security employees receive an initial alert. An alarm rings if the customer passes through the doors of the shop without paying for the items. Which of the following order tracking technology is used by this company?

- A. Bar coding system
- B. Electronic resource planning
- C. Electronic data interchange
- D. Radio frequency identification

答案: D

問題 #232

Which of the following lists all components, ingredients, and materials required to produce the final product?

- A. Purchase order
- B. Master schedule
- **C. Bill of materials**
- D. Engineering change notice

答案： C

解題說明：

Master production schedule (MPS) plans items that have "direct" demand, or "independent demand." With independent demand, the demand comes from sales orders, service orders, or forecasts, and the demand comes directly from customer or forecasted requirements. It is the list that provides the timing of the production schedule and shows how much each machine can produce, how many shifts are used, etc.

A bill of materials (BOM) is a comprehensive inventory of the raw materials, assemblies, subassemblies, parts and components, as well as the quantities of each, needed to manufacture a product.

問題 #233

A supplier delivers large quantities of inventory to its customer's store, but only charges for the goods as and when they are used. This can be described as...?

- A. Components inventory
- **B. Consignment stock**
- C. Multi-echelon stock
- D. Multi-stage inventory

答案： B

解題說明：

Consignment stock is stock legally owned by one party, but held by another, meaning that the risk and rewards regarding to the said stock remains with the first party while the second party is responsible for distribution or retail operations. Ownership of consignment stock is passed only when the stock is used (issued or sold in the case of a shop). Unused stock in a warehouse may be returned to the supplier when it concerns standard manufactured products. With customer specific items, agreements concerning returning products, should be negotiated.
