Wir werden Ihnen die vertrauenswürdige Hilfe für jede Vorbereitungsstufe der HP HPE0-V25 Prüfung bieten. Falls Sie die HP HPE0-V25 Prüfung nicht wunschgemäß bestehen, geben wir Ihnen volle Rückerstattung zurück, um Ihren finanziellen Verlust zu kompensieren.

## HPE Hybrid Cloud Solutions HPE0-V25 Prüfungsfragen mit Lösungen (Q42-Q47):

### 42. Frage

Your customer runs a small datacenter and their storage requirements change on a month-to-month basis. They want to easily monitor their Cloud costs/usage and grow their resources.

Which self-service platform will fill their requirements?

- A. HPE GreenLake Data Services Cloud Console
- **B. HPE GreenLake central**
- C. HPE InfoSight
- D. HPE Compute Ops Management

**Antwort: B**

Begründung:

HPE GreenLake Central is a self-service platform that gives customers a consistent cloud experience for all their applications and data, across edges, colocations, and data centers. Some of the features of HPE GreenLake Central include:

- Easily monitor cloud costs and usage: HPE GreenLake Central provides customers with visibility and control over their cloud

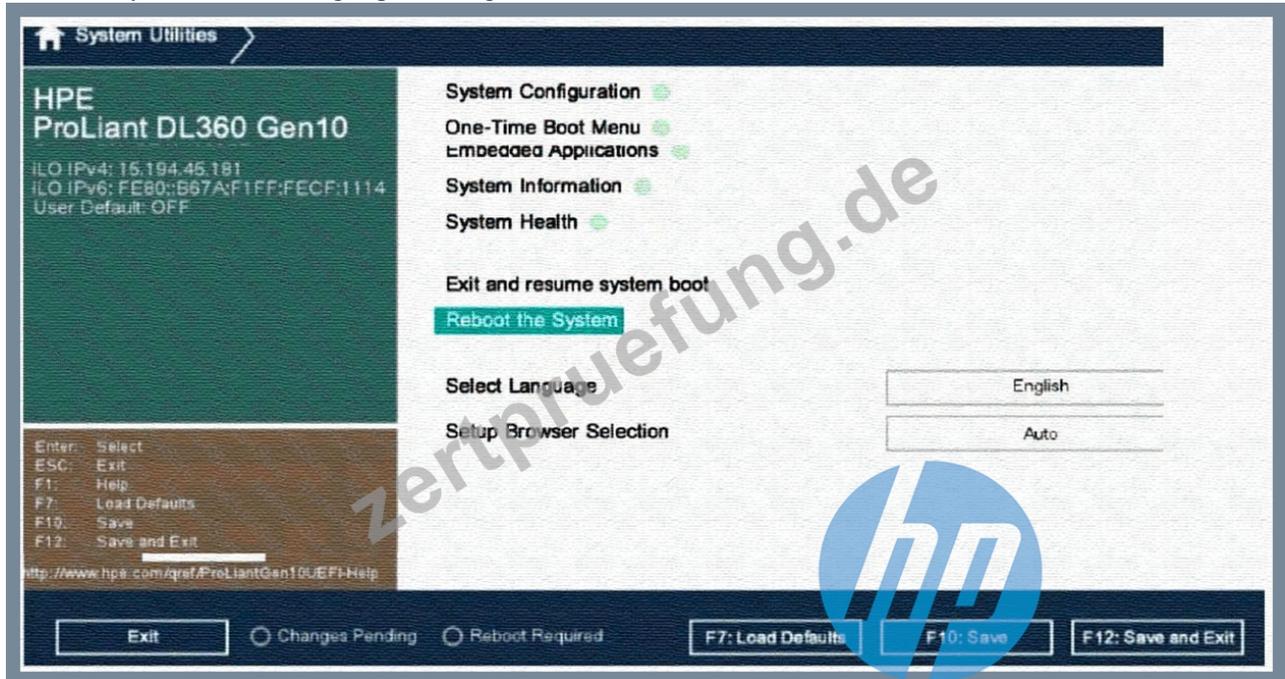

spending and consumption across hybrid environments. Customers can view their usage and costs by service, location, application, or business unit. They can also set budgets, alerts, and policies to optimize their cloud resources and expenses.

- Grow resources as needed: HPE GreenLake Central enables customers to scale up or down their cloud services and resources as their business needs change. Customers can access a catalog of cloud services from HPE and partners through a self-service portal and order them with a few clicks. They can also leverage buffer capacity that is ready to use in minutes, not months.

### 43. Frage

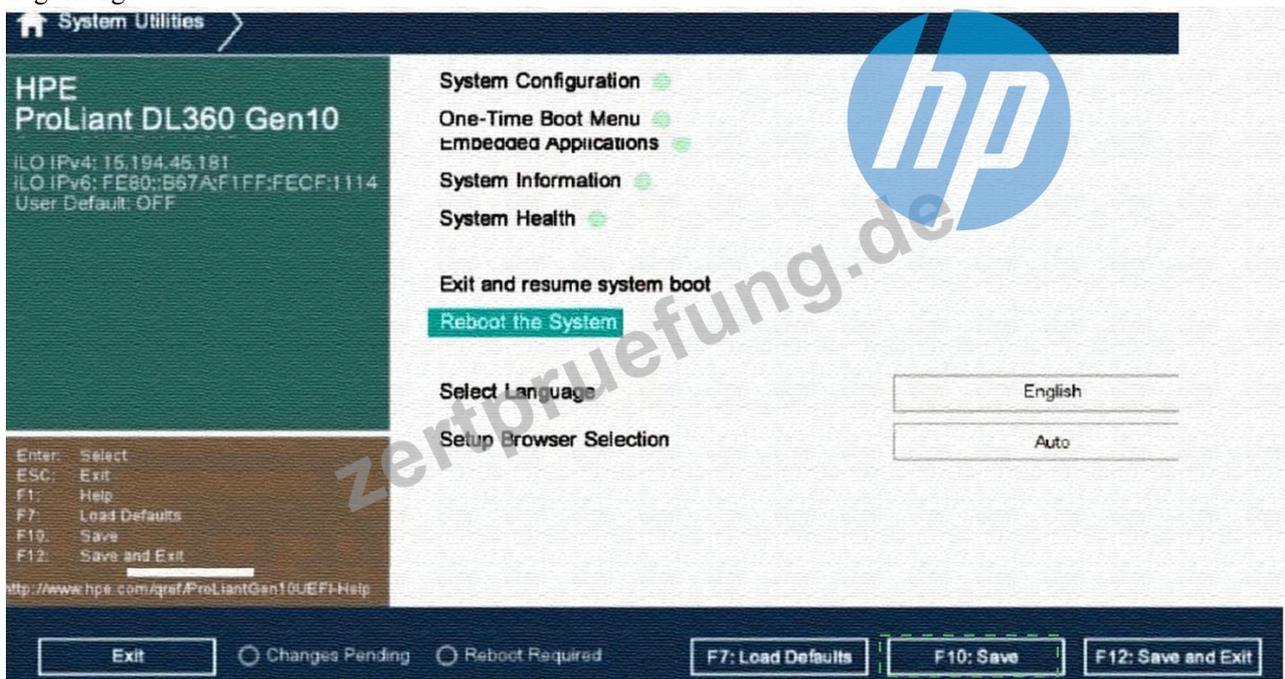

Review the exhibit.

Click where you can access intelligent provisioning.

Antwort:

Begründung:

Explanation:

F10 Save

#### 44. Frage

Your customer has run out of storage on their Virtual environment.  
How does migrating to HPE GreenLake help this customer?

- A. by automatically ordering more storage when capacity levels reach 90%
- **B. by enabling the customer to use an installed buffer and only pay for what they use**
- C. by implementing a reserve level to ensure there is always storage available
- D. by allowing the customer to over-provision their storage

**Antwort: B**

Begründung:

HPE GreenLake for storage is a storage-as-a-service solution that provides a cloud-like experience for on-premises storage. The solution offers:

Workload-optimized data services for file, block, backup, and disaster recovery  
A cloud-based management console for simplified operations and provisioning  
A consumption-based model that aligns costs with usage  
A buffer capacity that is installed but not activated until needed  
A pay-per-use billing that only charges for the capacity used above the reserve level  
By migrating to HPE GreenLake for storage, the customer can avoid running out of storage on their virtual environment by using the buffer capacity as needed and only paying for what they use. The customer can also benefit from the flexibility, scalability, and performance of the storage services offered by HPE GreenLake.

#### 45. Frage

Your customer has a large DL380 Gen10 and DL385 Gen10 Plus server farm. They only have a small staff monitoring and managing these servers. You need to recommend a management service that will allow them to free up resources and automate management.

What HPE management service should they use?

- A. iLO5 Lifecycle Management
- B. HPE InfoSight
- C. HPE CloudPhysics
- **D. HPE GreenLake Compute Ops Manager**

**Antwort: D**

Begründung:

This is because HPE GreenLake Compute Ops Management is a cloud-based service that provides a unified and automated way to monitor, manage and update servers remotely through a web console.

It can help customers free up resources and automate management tasks such as firmware updates, compliance checks, server health monitoring and troubleshooting. It can also support servers across different locations and platforms, whether on premises, at the edge or in the cloud.

#### 46. Frage

You need to provide a centralized platform for TapeAssure Advanced reporting and Data Verification analysis. Remote management, diagnostics, and configuration for all MSL devices are also required.

What HPE utility should you use?

- A. Command View for Tape Libraries
- **B. Library and Tape Tools**
- C. HPE StoreOnce
- D. Smart Storage Administrator

**Antwort: B**

Begründung:

Library and Tape Tools (L&TT): HPE Library and Tape Tools is a diagnostic and management utility designed for tape storage products. It provides a centralized platform for TapeAssure Advanced reporting, data verification analysis, remote management, diagnostics, and configuration for all MSL (Modular Smart Libraries) devices.
