Our AZ-104 exam torrent is available in different versions. Whether you like to study on a computer or enjoy reading paper materials, our test prep can meet your needs. Our PDF version of the AZ-104 quiz guide is available for customers to print. You can print it out, so you can practice it repeatedly conveniently. And our AZ-104 exam torrent make it easy for you to take notes on it so that your free time can be well utilized and you can often consolidate your knowledge. Everything you do will help you successfully pass the exam and get the card. The version of APP and PC of our AZ-104 Exam Torrent is also popular. They can simulate real operation of test environment and users can test AZ-104 test prep in mock exam in limited time. They are very practical and they have online error correction and other functions. The characteristic that three versions of AZ-104 exam torrent all have is that they have no limit of the number of users, so you don't encounter failures anytime you want to learn our AZ-104 quiz guide. The three different versions can help customers solve any questions and meet their all needs.

Microsoft AZ-104 exam questions are the best because these are so realistic! It feels just like taking a real Microsoft AZ-104 exam, but without the stress! Our Microsoft AZ-104 Practice Test software is the answer if you want to score higher on your real Microsoft AZ-104 certification exam and achieve your academic goals.

2026 Latest 100% Free AZ-104 – 100% Free Exam Demo | Exam AZ-104

Collection Pdf

In the matter of quality, our AZ-104 practice engine is unsustainable with reasonable prices. Despite costs are constantly on the rise these years from all lines of industry, our AZ-104 learning materials remain low level. That is because our company beholds customer-oriented tenets that guide our everyday work. The achievements of wealth or prestige is no important than your exciting feedback about efficiency and profession of our AZ-104 Practice Engine. So our AZ-104 practice materials are great materials you should be proud of and we are!

Microsoft Azure Administrator Sample Questions (Q261-Q266):

NEW QUESTION # 261

You have an Azure virtual machine that runs Windows Server 2019 and has the following configurations:

- * Name: VM1
- * Location: West US
- * Connected to: VNET1
- * Private IP address: 10.1.0.4
- * Public IP address: 52.186.85.63
- * DNS suffix in Windows Server: Adatum.com

You create the Azure DNS zones shown in the following table.

Name	Type	Location
Adatum.pri	Private	West Europe
Contoso.pri	Private	Central US
Adatum.com	Public	West Europe
Contoso.com	Public	North Europe

You need to identify which DNS zones you can link to VNET1 and the DNS zones to which VM1 can automatically register. Which zones should you identify? To answer, select the appropriate options in the answer area.

DNS zones that you can link to VNET1:

- Adatum.com only
- Adatum.pri and adatum.com only
- The private zones only
- The public zones only

DNS zones to which VM1 can automatically register:

- Adatum.com only
- Adatum.pri and adatum.com only
- The private zones only
- The public zones only

Answer:

Explanation:

DNS zones that you can link to VNET1:

- Adatum.com only
- Adatum.pri and adatum.com only
- The private zones only
- The public zones only

DNS zones to which VM1 can automatically register:

- Adatum.com only
- Adatum.pri and adatum.com only
- The private zones only
- The public zones only

NEW QUESTION # 262

You are configuring serverless computing in Azure.

You need to receive an email message whenever a resource is created in or deleted from a resource group. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create an Azure Event Grid trigger

Create an Azure Service Bus namespace

Create conditions and actions

Create an Azure Logic App

Create an event subscription

Answer Area

Answer:

Explanation:

Actions

Create an Azure Event Grid trigger

Create an Azure Service Bus namespace

Create conditions and actions

Create an Azure Logic App

Create an event subscription

Answer Area

Create an Azure Logic App

Create an Azure Event Grid trigger

Create conditions and actions

<https://docs.microsoft.com/en-us/azure/event-grid/monitor-virtual-machine-changes-event-grid-logic-app>

NEW QUESTION # 263

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that an Azure Active Directory (Azure AD) user named Admin1 is assigned the required role to enable Traffic Analytics for an Azure subscription.

Solution: You assign the Owner role at the subscription level to Admin1.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

The Owner role is a very high-level role that grants full access to manage all resources in the scope, including the ability to assign roles to other users. This role does not follow the principle of least privilege, which means that you should only grant the minimum level of access required to accomplish the goal.

To enable Traffic Analytics for an Azure subscription, you need to have a role that grants you the following permissions at the subscription level:

Microsoft.Network/applicationGateways/read
Microsoft.Network/connections/read
Microsoft.Network/loadBalancers/read
Microsoft.Network/localNetworkGateways/read
Microsoft.Network/networkInterfaces/read
Microsoft.Network/networkSecurityGroups/read
Microsoft.Network/publicIPAddresses/read
Microsoft.Network/routeTables/read
Microsoft.Network/virtualNetworkGateways/read
Microsoft.Network/virtualNetworks/read
Microsoft.OperationalInsights/workspaces/*

Some of the built-in roles that have these permissions are Owner, Contributor, or Network Contributor1.

However, these roles also grant other permissions that may not be necessary or desirable for enabling Traffic Analytics. Therefore, the best practice is to use the principle of least privilege and create a custom role that only has the required permissions for enabling Traffic Analytics2.

Therefore, to meet the goal of ensuring that an Azure AD user named Admin1 is assigned the required role to enable Traffic Analytics for an Azure subscription, you should create a custom role with the required permissions and assign it to Admin1 at the subscription level.

NEW QUESTION # 264

The development team asks you to provision an Azure storage account for their use.

To remain in compliance with IT security policy, you need to ensure that the new Azure storage account meets the following requirements:

- Data must be encrypted at rest.
- Access keys must facilitate automatic rotation.
- The company must manage the access keys.

What should you do?

- A. Create a service endpoint between the storage account and a virtual network (VNet).
- B. Enable Storage Service Encryption (SSE) on the storage account.
- C. Require secure transfer for the storage account.
- **D. Configure the storage account to store its keys in Azure Key Vault.**

Answer: D

Explanation:

You should configure the storage account to store its keys in Azure Key Vault. Azure Key Vault provides a mechanism to store secrets, such as storage account keys, user credentials, and digital certificates, securely in the Microsoft Azure cloud. You can access the underlying Representational State Transfer (REST) application programming interface (API) to rotate or retrieve the secrets in your source code.

You should not enable SSE on the storage account for two reasons. First, SSE is enabled automatically on all Azure storage accounts and encrypts all storage account data at rest.

Second, SSE in its native form uses Microsoft-managed access keys, which violates the scenario constraint for customer-managed keys.

You should not require secure transfer for the storage account. Secure transfer forces all REST API calls to use HTTPS instead of HTTP. This feature has nothing to do with either access keys or their management and rotation.

You should not create a service endpoint between the storage account and a VNet. A service endpoint allows you limit traffic to a storage account from resources residing on an Azure VNet.

NEW QUESTION # 265

You have an Azure subscription that contains a policy-based virtual network gateway named GW1 and a virtual network named VNet1.

You need to ensure that you can configure a point-to-site connection from an on-premises computer to VNet1.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Reset GW1
- B. Add a connection to GW1
- **C. Create a route-based virtual network gateway**
- D. Add a public IP address space to VNet1
- **E. Delete GW1**
- F. Add a service endpoint to VNet1

Answer: C,E

Explanation:

Explanation

C: A VPN gateway is used when creating a VPN connection to your on-premises network.

Route-based VPN devices use any-to-any (wildcard) traffic selectors, and let routing/forwarding tables direct traffic to different IPsec tunnels. It is typically built on router platforms where each IPsec tunnel is modeled as a network interface or VTI (virtual tunnel interface).

E: Policy-based VPN devices use the combinations of prefixes from both networks to define how traffic is encrypted/decrypted through IPsec tunnels. It is typically built on firewall devices that perform packet filtering.

IPsec tunnel encryption and decryption are added to the packet filtering and processing engine.
