Our Plat-Arch-202 practice materials have been well received mainly for the advantage of high pass rate as 99% to 100%.

## Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q208-Q213):

### NEW QUESTION # 208

Universal Containers (UC) has developed extensions of Salesforce Service Cloud for the use of its customer service teams using the change set development model.

Recently, UC acquired a company that develops extensions of an AppExchange app. The development team of the acquired company uses the org development model. The Universal Containers CTO wants both teams to work on a single org and follow the

same set of processes.

Which development model should the architect recommend to be used by the consolidated development team?

- A. Package development model, because it allows packages to be created and deployed using declarative (point-and-click) development tools, without writing code.
- B. Org development model, because the acquired company's team is already using it, and it is better than the change set development model.
- C. Change set development model, because UC is already using it, so it will face less resistance.
- D. Package development model, so teams can build release artifacts that can be tested and released independently from artifacts for other projects.

**Answer: D**

#### **NEW QUESTION # 209**

Universal Containers (UC) wants to shorten their deployment time to production by controlling which tests to run in production. UC's Architect has suggested that they run only subsets of tests. Which two statements are true regarding running specific tests during deployments? Choose 2 answers

- A. run a subset of tests ,set the RunLocalTests test level on the DeployOptions object and pass it as an argument to deploy() call.
- B. To run a subset of tests, set the Run Specified Tests test level on the DeployOptions objects and pass it as an argument to deploy() call.
- C. Specifying the test method is supported in DeployOptions, therefore specify only the test classes that are required to be executed.
- D. Specify both test classes and individual test methods that are required to be executed as both are supported in DeployOptions.

**Answer: B,C**

#### **NEW QUESTION # 210**

There are many types of quality assurance techniques that can help minimize defects in software projects.

Which two techniques should an architect recommend, for Universal Containers to incorporate into its overall CI/CD pipeline? Choose 2 answers

- A. Static code quality analysis
- B. Business verification testing
- C. Stress testing
- D. Automated browser testing

**Answer: A,D**

#### **NEW QUESTION # 211**

Universal Containers is a Salesforce AppExchange partner and they are planning to launch recommended that they use a partner development org for development. New app. The technical architect What are the three benefits of using a partner development org over an individual development org in this scenario?

Choose 3 answers

- A. Partner development org never expires.
- B. Partner development org has a greater number of licenses available for the team.
- C. Only partner development org supports managed beta testing.
- D. Partner development org offers higher API limit.
- E. Partner development org offers more storage.

**Answer: B,D,E**

#### **NEW QUESTION # 212**

What are two advantages of automated test data loads over manual data loads Choose 2 answers
