- A. 0
- B. 1
- C. 2
- D. 3

**Answer: D**

Explanation:

Nine test cases are required to test all pairs using the pairwise testing technique based on the classification tree. Pairwise testing is a technique that tests all possible pairs of inputs for a given scenario using a mathematical algorithm to reduce the number of combinations. The inputs for this scenario are:

- \* Power Unit: Petrol, Electric, Hybrid

Each department operates its own software package.

A new release has been scheduled which includes an improved user interface to the patient capture application as well as changes to the patient data to meet new regulatory requirements.

You are the test analyst for this release, working alongside a Technical Test Analyst. Which of the following requirements MOST align to your responsibilities to test as a Test Analyst?
