## CrowdStrike Test CCFA-200b Sample Online: CrowdStrike Certified Falcon Administrator - 2024 Version - PassLeaderVCE High-quality Products for you

Our CCFA-200b study guide provides free trial services, so that you can learn about some of our topics and how to open the software before purchasing. During the trial period of our CCFA-200b study materials, the PDF versions of the sample questions are available for free download, and both the pc version and the online version can be illustrated clearly. You can contact us at any time if you have any difficulties on our CCFA-200b Exam Questions in the purchase or trial process. We will provide professional personnel to help you remotely on the CCFA-200b training guide.

## CrowdStrike Certified Falcon Administrator - 2024 Version Sample Questions (Q81-Q86):

### NEW QUESTION # 81

You are tasked with creating a "Workstations" host group to encompass all workstations in your environment. Which dynamic grouping criteria will most efficiently accomplish this task?

- A. OU Workstation

- B. Type: Workstation
- C. Platform Windows
- D. Grouping Tags Workstation

**Answer: B**

Explanation:

The most efficient dynamic grouping criterion is Type: Workstation . Host type is specifically intended to distinguish categories such as workstation, server, or domain controller. Using OU may work only if Active Directory structure is perfectly aligned and consistently maintained, which is not guaranteed. Grouping tags require prior tag assignment during installation or post-install configuration, adding administrative dependency. Platform Windows would include Windows servers and possibly other Windows systems that are not workstations. The CCFA group creation topic emphasizes using the most precise available host attribute for dynamic group membership. Since the desired group is all workstations, Type: Workstation directly maps to the requirement and avoids broader or manually dependent criteria.

#### NEW QUESTION # 82

What is the purpose of the "Auto - Latest" setting in a sensor update policy?

- A. This setting will cause all assigned hosts to be updated to the most current version as soon as it becomes available
- B. This setting overrides any user confirmation/interaction and applies the selected policy
- C. This setting automatically assigns new hosts that come online to this policy
- D. This setting automatically assigns the latest Indicator of Attack (IOA) profiles and Next-Gen Antivirus (NGAV) machine learning to the selected endpoints ensuring the highest level of security

**Answer: A**

#### NEW QUESTION # 83

Why would you assign hosts to a static group instead of a dynamic group?

- A. You do not want the group membership to change automatically
- B. You are managing more than 1000 hosts
- C. You want the group to contain hosts from multiple operating systems
- D. You need hosts to be automatically assigned to a group

**Answer: A**

Explanation:

The reason why you would assign hosts to a static group instead of a dynamic group is that you do not want the group membership to change automatically. A Static Group is a group that requires manual assignment or removal of hosts. A Static Group will not update its membership based on any criteria or filters. This way, you can have more control over which hosts belong to the group and prevent any unwanted changes.

#### NEW QUESTION # 84

Which role allows a Falcon user to create Real Time Response Custom Scripts?

- A. Real Time Responder - Active Responder
- B. Real Time Responder - Read Only Analyst
- C. Real Time Responder - Script Developer
- D. Real Time Responder - Administrator

**Answer: D**

Explanation:

The role that allows a Falcon user to create Real Time Response custom scripts is Real Time Responder - Administrator . Falcon separates RTR permissions into three default responder roles. Read Only Analyst can run reconnaissance-style commands. Active Responder can run read-only commands plus additional response commands, including commands that modify host state and certain approved custom scripts. However, creating custom scripts, uploading files for the put command, and directly running executables with run are reserved for the RTR Administrator role. This distinction is important because custom scripts can perform powerful

host-level actions and must be restricted to experienced incident response personnel. The course guide also notes that users must have an RTR role to access RTR functionality at all; Falcon Administrator alone does not automatically include RTR access. "Real Time Responder - Script Developer" is not one of the standard RTR roles. Reference topics: User Management, Real Time Response Roles, Custom Scripts, RTR Role Permissions.

#### NEW QUESTION # 85

What type of information is provided in sensor health report?

- A. Local performance metrics
- **B. Current operational status**
- C. User login history
- D. Network traffic patterns

**Answer: B**

Explanation:

Sensor health reporting provides current operational status of sensors. Its purpose is to help administrators identify whether sensors are online, offline, in reduced functionality, properly reporting, or otherwise in a state requiring attention. User login history belongs to account or identity-related telemetry, not sensor health.

Local performance metrics may be relevant during troubleshooting but are not the primary sensor health report objective. Network traffic patterns are investigated through event search, network telemetry, or other dashboards, not basic sensor health. CCFA dashboards and reports topics emphasize using sensor health and sensor reports to monitor deployment status, operational readiness, sensor connectivity, and coverage across the environment so that administrators can quickly locate hosts requiring remediation.

#### NEW QUESTION # 86

.....

These questions will familiarize you with the CCFA-200b exam format and the content that will be covered in the actual test. You will not get a passing score if you rely on outdated practice questions. PassLeaderVCE has assembled a brief yet concise study material that will aid you in acing the CrowdStrike Certified Falcon Administrator - 2024 Version (CCFA-200b) exam on the first attempt. This prep material has been compiled under the expert guidance of 90,000 experienced CrowdStrike professionals from around the globe.
