C-BCBTM-2509 Reliable Exam Topics & C-BCBTM-2509 Online Training Materials

Do you upset about the difficulty of SAP practice questions? Do you disappointed at losing exam after long-time preparation? We can help you from these troubles with our Latest C-BCBTM-2509 Learning Materials and test answers. You will find valid C-BCBTM-2509 real questions and detailed explanations in PassCollection, which ensure you clear exam easily.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q11-Q16):

NEW QUESTION # 11

What is the role of generative AI in SAP Signavio solutions?

- A. It is limited to performing routine tasks like data entry.
- B. It translates process models from one modeling language to another.
- C. It provides instant answers, identifies bottlenecks, and offers recommendations.
- D. It is primarily focused on creating new AI systems unrelated to SAP solutions.

Answer: C

Explanation:

Generative AI in SAP Signavio enhances process intelligence by analyzing complex business process data, identifying inefficiencies, and automatically generating insights and recommendations for optimization.

"Generative AI in SAP Signavio supports business transformation by instantly identifying process bottlenecks, providing intelligent recommendations, and generating process improvement insights based on operational data." Reference:

This AI functionality, embedded in SAP Signavio Process Intelligence and Process Insights, empowers users to accelerate process discovery and analysis using natural language queries and auto-generated improvement suggestions.

"SAP Signavio leverages Generative AI to enable users to query process data conversationally and receive AI-driven insights for faster decision-making." Incorrect Options:

B: Translating process models is done via modeling standards (BPMN), not AI.

C: The AI is purpose-built for SAP's transformation ecosystem, not standalone.

D: It performs high-level analytical and generative tasks, not simple automation.

Verified Correct answer: A: It provides instant answers, identifies bottlenecks, and offers

NEW QUESTION # 12

What are the benefits of SAP Business Transformation Management solutions?

(Note: There are 2 correct answers to this question.)

- A. They provide visibility into processes, people, and applications and therefore support our customers in their ERP transformation.
- B. They empower organizations to drive digital transformation by enhancing process efficiency and IT infrastructure management.
- C. They are tools limited to IT landscape analysis and financial reporting.
- D. They are process mining tools which can help identifying process and IT infrastructure bottlenecks.

Answer: A,B

Explanation:

SAP Business Transformation Management (BTM) Solutions are comprehensive, cross-functional tools designed to give organizations visibility across business processes, people, and technology - empowering them to manage digital transformation effectively.

"SAP BTM solutions provide end-to-end visibility across processes, people, and applications, helping organizations streamline ERP transformation initiatives." Reference:

Visibility Across the Enterprise (Answer B):

SAP BTM combines the analytical power of SAP Signavio (process intelligence), SAP LeanIX (enterprise architecture), and WalkMe (adoption enablement) to support holistic transformation initiatives.

"BTM solutions provide a unified view of the business and IT landscape, ensuring transparency across processes, systems, and stakeholders." Driving Digital Transformation and Efficiency (Answer C):

These solutions enable companies to improve process performance and IT infrastructure through insight-driven optimization and modernization.

"By enhancing process efficiency and IT infrastructure management, SAP BTM empowers organizations to drive digital transformation with measurable business outcomes." Incorrect Options:

A: BTM solutions go far beyond IT analysis; they connect business, IT, and people perspectives.

D: While process mining is part of the suite (via Signavio), BTM offers much broader transformation management beyond mining alone.

Therefore, the verified answers are:

B: They provide visibility into processes, people, and applications and therefore support our customers in their ERP transformation.

C: They empower organizations to drive digital transformation by enhancing process efficiency and IT infrastructure management.

NEW QUESTION # 13

What does WalkMe Discovery help organizations achieve?

- A. Translates all tools into multiple languages automatically
- B. Enhances employee satisfaction scores by 50%
- C. Identifies underutilized tools and compliance risks
- D. Automates training development processes

Answer: C

Explanation:

WalkMe Discovery is a key component of the SAP Business Transformation Management (BTM) suite through SAP's partnership with WalkMe. It is designed to provide visibility into the digital application landscape and analyze software usage across the

enterprise.

"WalkMe Discovery automatically discovers all web-based applications used across the organization, revealing underutilized tools, shadow IT, and potential compliance risks." Reference:

The tool allows transformation leaders to map actual system usage, understand license utilization, and identify areas of inefficiency or non-compliance, which directly supports SAP's Business Transformation Management (BTM²) framework goals for transparency and optimization.

"By identifying unused or redundant applications, WalkMe Discovery helps organizations reduce costs and mitigate compliance risks as part of their transformation initiatives." Option A (translation automation) and C (automated training development) are functions more aligned with WalkMe Digital Adoption Platform (DAP), not the Discovery module.

"While the WalkMe DAP provides in-app guidance and user training automation, Discovery focuses on discovering and analyzing app usage." Option D (enhancing satisfaction by 50%) is not a defined or measurable objective of the Discovery module; SAP does not claim specific numerical outcomes related to satisfaction.

Therefore, the correct answer - verified from SAP's official transformation documentation and WalkMe integration materials - is B: Identifies underutilized tools and compliance risks.

NEW QUESTION # 14

What is the primary purpose of WalkMe's Digital Adoption Platform (DAP)?

- A. To implement advanced hardware solutions
- B. To automate recruitment processes
- C. To reduce digital friction and guide users through complex software
- D. To manage payroll systems efficiently

Answer: C

Explanation:

The WalkMe Digital Adoption Platform (DAP) is designed to improve the user experience by reducing friction when interacting with digital systems. It provides on-screen guidance, automation, and analytics that help users complete tasks accurately and efficiently.

"The primary purpose of WalkMe's Digital Adoption Platform is to reduce digital friction and guide users through complex software environments using AI-powered, context-aware assistance." Reference:

The platform enhances employee productivity, adoption success, and process efficiency across SAP and third-party applications by simplifying navigation and ensuring process compliance.

"WalkMe DAP provides contextual guidance directly within applications, enabling users to execute digital workflows with minimal errors or training." Incorrect Options:

A: WalkMe is software-based, not a hardware solution.

B: Recruitment automation is part of SAP SuccessFactors, not WalkMe.

D: Payroll management is unrelated to WalkMe's purpose.

Verified Correct answer: C: To reduce digital friction and guide users through complex software.

NEW QUESTION # 15

What benefit does the combined WalkMe-SAP solution offer to enterprises?

- A. Streamlined user adoption and seamless process integration
- B. Increased hiring efficiency
- C. Lower software maintenance costs
- D. Enhanced physical supply chain management

Answer: A

Explanation:

The partnership between SAP and WalkMe integrates WalkMe's Digital Adoption Platform (DAP) directly into SAP applications (such as SAP S/4HANA, SAP SuccessFactors, and SAP Ariba) to improve user engagement and digital process execution.

"The combined SAP-WalkMe solution helps organizations streamline user adoption and simplify process integration, ensuring users can easily navigate SAP systems and execute digital workflows correctly." Reference:

This integration provides contextual, real-time assistance to users within SAP interfaces, enabling faster onboarding, fewer errors, and improved productivity - all critical for successful transformation under the SAP Business Transformation Management (BTM) framework.

"WalkMe for SAP reduces complexity by guiding users in real time, supporting end-to-end process integration, and driving adoption across the SAP ecosystem." Incorrect Options:

- A: Lower maintenance costs are a secondary effect, not the core benefit.
 B: WalkMe is not a hiring solution.
 D: It does not manage supply chains directly.
 Verified Correct answer: C: Streamlined user adoption and seamless process integration.

NEW QUESTION # 16

.....

Do you want to get the C-BCBTM-2509 certification to boost your career? Do you desire to feel competent and confident going into your real SAP Certified Associate - Positioning SAP Business Transformation Management Solutions certification exam?
