Getting the Google Associate-Cloud-Engineer certification exam is necessary in order to get a job in your desired tech company. Success in the Google Associate Cloud Engineer Exam (Associate-Cloud-Engineer) certification exam gives you an edge over the others because you will have certified skills. The Google Associate-Cloud-Engineer certification exam badge will make a good impression on the interviewer. Most of the people planning to attempt the Associate-Cloud-Engineer Exam are confused that how will they prepare and pass Associate-Cloud-Engineer exam with good grades. Many don't find real Associate-Cloud-Engineer exam questions and face loss of money and time.

Google Associate-Cloud-Engineer (Google Associate Cloud Engineer) Certification Exam is a widely recognized industry certification that validates the skills and expertise of an individual in implementing and managing Google Cloud Platform (GCP) solutions. Associate-Cloud-Engineer exam is designed to assess the candidate's knowledge in various areas of cloud computing, such as deploying applications, monitoring operations, and managing GCP resources. Google Associate Cloud Engineer Exam certification is ideal for cloud professionals who are looking to enhance their career prospects in the field of cloud computing.

The Google Associate-Cloud-Engineer Exam covers topics such as compute engine, storage, container deployment, Kubernetes, security, networking, billing, and support. To prepare for the exam, candidates can opt to take the online training courses offered by Google Cloud or other third-party training providers. They can also utilize free resources such as online documentation, tutorials, and practice tests available on the GCP website. Candidates with prior experience can leverage their skills by practicing on GCP projects and labs.

## Associate-Cloud-Engineer Authorized Certification, New Associate-Cloud-Engineer Test Test

Like other Google examinations, the Associate-Cloud-Engineer exam preparation calls for a strong preparation and precise Associate-Cloud-Engineer practice material. Finding original and latest 121 exam questions however, is a difficult process. Candidates require assistance finding the Associate-Cloud-Engineer updated questions. It will be hard for applicants to pass the Google Associate-Cloud-Engineer exam on their first try if Google Associate Cloud Engineer Exam questions they have are not real and updated.

### Google Associate Cloud Engineer Exam Sample Questions (Q323-Q328):

#### NEW QUESTION # 323

Your company has a large quantity of unstructured data in different file formats. You want to perform ETL transformations on the data. You need to make the data accessible on Google Cloud so it can be processed by a Dataflow job. What should you do?

- A. Upload the data to Cloud Storage using the gsutil command line tool.
- B. Upload the data to BigQuery using the bq command line tool.
- C. Upload the data into Cloud SQL using the import function in the console.
- D. Upload the data into Cloud Spanner using the import function in the console.

**Answer: A**

Explanation:

Explanation

"large quantity": Cloud Storage or BigQuery "files" a file is nothing but an Object

#### NEW QUESTION # 324

Your company uses a large number of Google Cloud services centralized in a single project. All teams have specific projects for testing and development. The DevOps team needs access to all of the production services in order to perform their job. You want to prevent Google Cloud product changes from broadening their permissions in the future. You want to follow Google-recommended practices. What should you do?

- A. Create a custom role that combines the required permissions. Grant the DevOps team the custom role on the organization level.
- B. Grant all members of the DevOps team the role of Project Editor on the organization level.
- C. Create a custom role that combines the required permissions. Grant the DevOps team the custom role on the production project.
- D. Grant all members of the DevOps team the role of Project Editor on the production project.

**Answer: D**

#### NEW QUESTION # 325

Your Dataproc cluster runs in a single Virtual Private Cloud (VPC) network in a single subnet with range 172.16.20.128/25. There are no private IP addresses available in the VPC network. You want to add new VMs to communicate with your cluster using the minimum number of steps.

What should you do?

- A. Modify the existing subnet range to 172.16.20.0/24.
- B. Create a new VPC network for the VMs with a subnet of 172.32.0.0/16.  
Enable VPC network Peering between the Dataproc VPC network and the VMs VPC network.  
Configure a custom Route exchange.
- C. Create a new Secondary IP Range in the VPC and configure the VMs to use that range.
- D. Create a new VPC network for the VMs.  
Enable VPC Peering between the VMs' VPC network and the Dataproc cluster VPC network.

**Answer: D**

Explanation:

A subnet has a single primary IP address range and, optionally, one or more secondary IP address ranges. For each subnet IP address range, Google Cloud creates a subnet route. When you use VPC Network Peering, Google Cloud always exchanges the subnet routes that don't use privately reused public IP addresses between the two peered networks. If firewall rules in each network permit communication, VM instances in one network can communicate with instances in the peered network.

#### NEW QUESTION # 326

You need to set a budget alert for use of Compute Engine services on one of the three Google Cloud Platform projects that you manage. All three projects are linked to a single billing account. What should you do?

- A. Verify that you are the project billing administrator. Select the associated billing account and create a budget and alert for the appropriate project.
- **B. Verify that you are the project billing administrator. Select the associated billing account and create a budget and a custom alert.**
- C. Verify that you are the project administrator. Select the associated billing account and create a budget for the appropriate project.
- D. Verify that you are project administrator. Select the associated billing account and create a budget and a custom alert.

**Answer: B**

#### NEW QUESTION # 327

Your company's machine learning team requires a scalable and flexible platform to fine-tune large language models utilizing a large volume of proprietary data on Google Cloud. You are tasked with building a solution for this team. What should you do?

- A. Use Cloud Run and GPU as a platform to run the fine-tuning jobs.
- B. Use a Compute Engine managed instance group as a platform to deploy Jupyter Notebooks and run fine-tuning jobs.
- **C. Use Google Kubernetes Engine (GKE) and hardware accelerators as a platform to run the fine-tuning jobs.**
- D. Use Dataflow as a platform to run the fine-tuning jobs

**Answer: C**

Explanation:

GKE with hardware accelerators (e.g., GPUs or TPUs) provides the scalability, flexibility, and control needed to run large-scale ML workloads, such as fine-tuning large language models. It allows efficient resource management, autoscaling, and orchestration of complex ML pipelines while integrating well with other GCP services.

#### NEW QUESTION # 328

.....

After you purchase our Associate-Cloud-Engineer exam guide is you can download the test bank you have bought immediately. You only need 20-30 hours to learn and prepare for the exam, because it is enough for you to grasp all content of our study materials, and the passing rate is very high and about 98%-100%. Our laTest Associate-Cloud-Engineer Quiz torrent provides 3 versions and you can choose the most suitable one for you to learn. All in all, there are many merits of our Associate-Cloud-Engineer quiz prep.
