Salesforce Certified Tableau Data Analyst Sample Questions (Q150-Q155):

NEW QUESTION # 150

A Data Analyst is creating an annual report in Microsoft Word.

In Tableau Desktop, the analyst built a chart in a worksheet.

The analyst wants to create an image of the chart to add to the annual report.

Which two options should the analyst use to create the image? (Choose two.)

- A. Copy Image option from the Dashboard menu
- B. Export Image option from the Dashboard menu
- C. Export option from the Worksheet menu
- D. Copy option from the Worksheet menu
- E. Export As Version option from the File menu

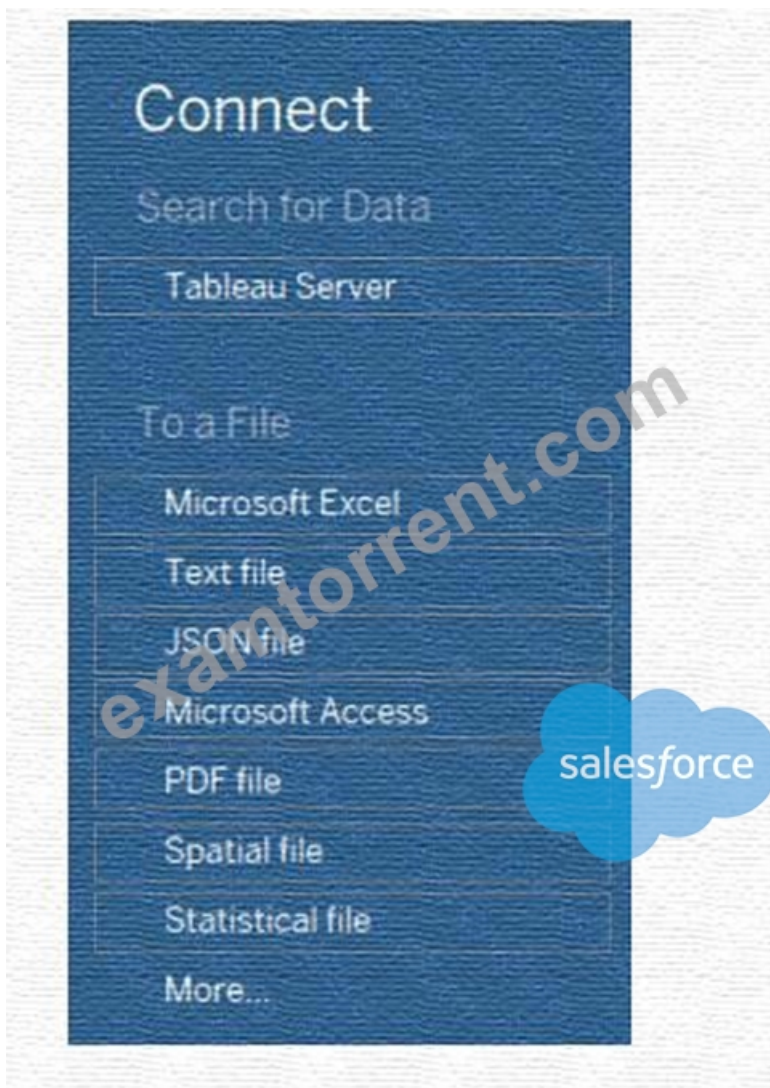

Answer: C,D

NEW QUESTION # 151

You receive a tab-delimited data file name sales.tsv.

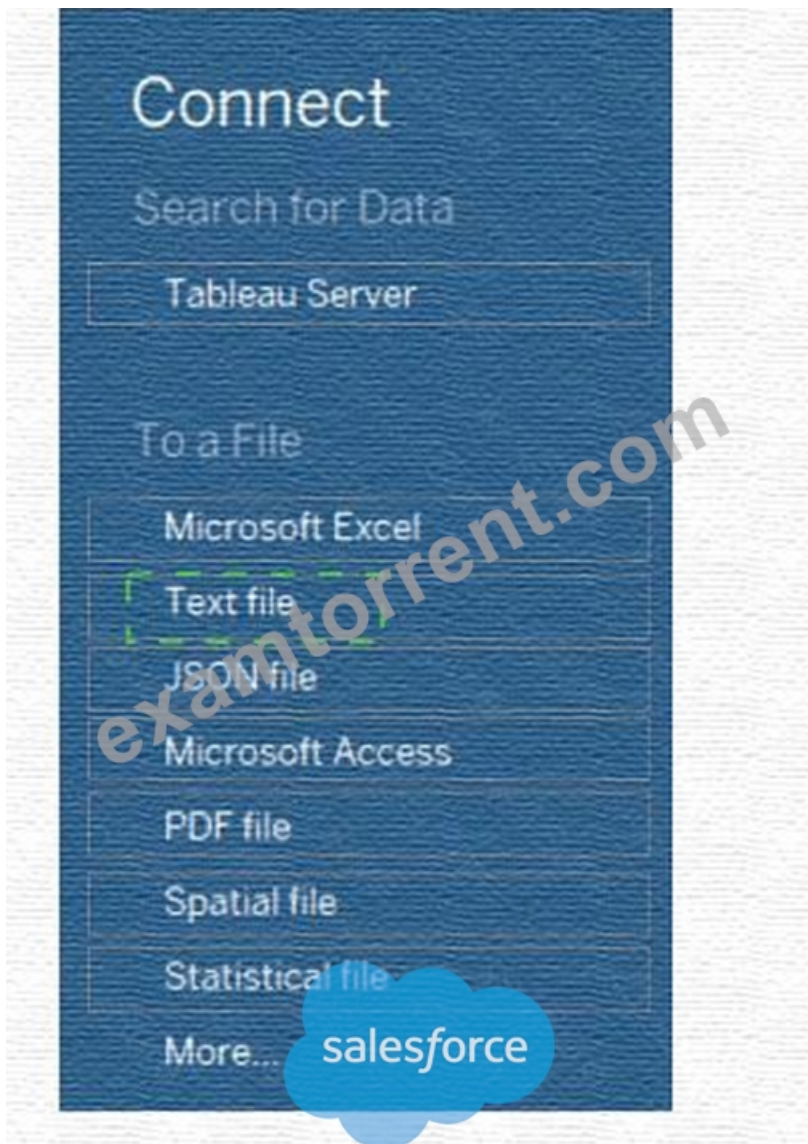

You need to connect to the file.

Which option should you select in Tableau Desktop?

Answer:

Explanation:

Explanation:

To connect to a tab-delimited data file named sales.tsv, you should select the option To a File > Text file in Tableau Desktop. This option will allow you to browse and select the file from your local or network drive and connect to it as a data source. You can then specify the text file properties, such as the delimiter, the text qualifier, and whether the first row contains column names. You can also join, union, or blend the data with other data sources if needed. References:

NEW QUESTION # 152

You have the following table.

iii Columns	Category		
Rows	State		
State	Furniture	Office Supplies	Technology
Alabama		18,000	18,000
Arizona	10,000	20,000	20,000
Arkansas			
California	12,000	24,000	12,000
Colorado			
Connecticut			
Delaware			
District of Columbia			
Florida	24,000	36,000	24,000
Georgia			
Idaho			
Illinois			10,000
Indiana	12,000	92,000	18,000
Iowa			
Kansas			
Kentucky	10,000	10,000

Massachusetts			
Michigan		10,000	
Minnesota			
Mississippi			
Missouri			

You need each record to alternate between grey and white.
What should you change in the Format Shading pane?

- A. the column banding size to 3
- B. the row banding size to 1
- C. the row banding size to 3
- D. the column banding size to 1

Answer: B

Explanation:

To have each record alternate between grey and white, you should change the row banding size to 1 in the Format Shading pane. This setting will ensure that each row has a different shading from the one above and below it, creating an alternating pattern of grey and white rows. References: The answer can be verified through practical application within Tableau or by consulting Tableau's official learning resources, such as Tableau Help: Format Shading or Tableau Training Pass: Formatting.

NEW QUESTION # 153

You have the following dashboard.

Currently the map is used as a filter that affects the data on the other sheets of the dashboard. You need to configure the dashboard to ensure that selecting a data point on the map only filters the Detail table. What should you do?

- A. From the context menu of Profits by State deselect Use as Filter
- B. From the context menu of Sales over time select Deselect
- C. From the context menu of Sales over time select Remove Dashboard Item
- **D. From the context menu of Sales over time select Ignore Actions**

Answer: D

Explanation:

To configure the dashboard to ensure that selecting a data point on the map only filters the Detail table, you should select Ignore Actions from the context menu of Sales over time. Ignore Actions is a feature that allows you to exclude a sheet from being affected by any actions on the dashboard, such as filters or highlights. You can select Ignore Actions by right-clicking on a sheet on the dashboard and selecting Ignore Actions from the menu.

In this case, you want to exclude Sales over time from being filtered by the map, so you should select Ignore Actions from its context menu. This will make Sales over time ignore any selections on the map and show all values. The Detail table will still be filtered by the map as usual.

The other options are not correct for this scenario. Removing Dashboard Item will delete Sales over time from the dashboard, which is not what you want. Deselecting Use as Filter will disable the map as a filter for any sheet on the dashboard, which is not what you want. Selecting Deselect will clear any selections on the map, but it will not prevent Sales over time from being filtered by future selections. References: <https://help.tableau.com/current/pro/desktop/en-us/actions.htm> https://help.tableau.com/current/pro/desktop/en-us/actions_ignore.htm

<https://help.tableau.com/current/pro/desktop/en-us/actions.htm> https://help.tableau.com/current/pro/desktop/en-us/actions_ignore.htm

On a Tableau dashboard, when a map is used as a filter, it affects all other sheets in the dashboard by default.

To restrict the filter action to only affect the Detail table and not the 'Sales over time' chart, you would modify the action settings. By selecting "Ignore Actions" from the context menu of the 'Sales over time' chart, it will no longer respond to the filtering action initiated by selecting data points on the map.

NEW QUESTION # 154

You have a line chart on a worksheet.

You want to add a comment to March 2020 as shown in the following visualization.

What should you do?

- A. Add a tooltip
- **B. Annotate March 2020**
- C. Enable captions
- D. Drag the growth rate to Text on the Marks card

Answer: B

Explanation:

To add a comment to March 2020 on a line chart, you need to annotate that mark. You can right-click on the mark and select Annotate > Mark from the menu. This will open a dialog box where you can type your comment and format it as you like. You can also drag and drop the annotation to position it on the worksheet.

Dragging the growth rate to Text on the Marks card will add a label to every mark on the line chart, enabling captions will show a description of the worksheet at the bottom, and adding a tooltip will show a text box when users hover over a mark. References:

[/formatting_annotations_create.htm](https://help.tableau.com/current/pro/desktop/en-us/formatting_annotations_create.htm)

To add a comment to a specific point on a line chart, such as March 2020 in the provided visualization, you would use the 'Annotate' feature. Right-clicking on the data point for March 2020 and selecting 'Annotate' allows you to add a text annotation directly to the chart, which can be used to highlight and comment on that particular data point.
