Latest Real NEX Exam | Valid NEX Braindumps

Achieving a good score on the NLN NEX exam on the first attempt is a common goal for many candidates. However, some believe that studying good Nursing Entrance Exam (Math, Science and Verbal) (NEX) materials isn't necessary. This notion, however, is far from true. The right preparation material for the NEX Exam is critical for success, and failing to find the most up-to-date NLN NEX materials can lead to a wasted effort and expense.

NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q38-Q43):

NEW QUESTION # 38

A rectangle's length and width are 4 centimeters (cm) and 6 cm. What is

1
2
2
1

the area of this rectangle?

(Given Area = length \times width.)

- A. 20 cm^2
- B. 24 cm^2
- C. 12 cm^2
- D. 10 cm^2

Answer: C

Explanation:

This problem tests area formulas and fraction application. First calculate the full area of the rectangle using the given formula: Area = length \times width. Multiply 4 cm by 6 cm to get 24 cm². The question asks for one-half of the area, not the total area. Divide 24 by 2: $24 \div 2 = 12$ cm². Therefore, option B is correct. Option C is the full area, not half. Option A results from subtracting instead of dividing. Option D represents an incorrect partial calculation. NEX geometry questions often require careful reading to determine whether the question asks for total area or a fraction of it.

NEW QUESTION # 39

The graph below shows the growth projections of four infants during their first year of life.

Based on these projections, how many weeks will it take for all infants to reach at least 30 pounds?

- A. 22 weeks
- B. 42 weeks
- C. 35 weeks
- **D. 25 weeks**

Answer: D

Explanation:

This question tests interpretation of a line graph, a common NEX skill. To answer, focus on the infant whose weight increases the slowest, because all infants must reach at least 30 pounds. By examining the graph, Infant A has the lowest growth curve and reaches 30 pounds later than the others. Tracing horizontally from 30 pounds to Infant A's line and then down to the x-axis shows that this occurs at approximately 25 weeks.

Although some infants reach 30 pounds earlier, the question asks when all infants reach that weight, which is determined by the slowest-growing infant. Therefore, option D is correct. The NEX often includes graph-based questions that require identifying minimums or maximums across multiple data sets, so it is important to carefully read qualifiers like "all," "at least," or "no more than."

NEW QUESTION # 40

The weight, in pounds (lb), of 8 infants is listed below:

8.5 lb, 11 lb, 7 lb, 5 lb, 7 lb, 4.5 lb, 9 lb, 8 lb

What is the mean weight of these infants?

- A. 8 lb
- B. 7 lb
- **C. 7.5 lb**
- D. 6.5 lb

Answer: C

Explanation:

This question tests calculation of the mean. First, add all the infant weights:

$$8.5 + 11 + 7 + 5 + 7 + 4.5 + 9 + 8 = 60 \text{ pounds.}$$

Next, divide the total by the number of infants: $60 \div 8 = 7.5$? Recheck carefully: $60 \div 8 = 7.5$, but reviewing the answer choices and recalculating the sum more carefully:

$$8.5 + 11 = 19.5$$

$$19.5 + 7 = 26.5$$

$$26.5 + 5 = 31.5$$

$$31.5 + 7 = 38.5$$

$$38.5 + 4.5 = 43$$

$$43 + 9 = 52$$

$$52 + 8 = 60$$

$$60 \div 8 = 7.5, \text{ which corresponds to option C.}$$

NEW QUESTION # 41

At a certain hospital, only of all births are twins. What percent is that?

- A. 0.4%
- B. 25%
- C. 4%
- D. 1.25%

Answer: C

Explanation:

This problem requires converting a fraction into a percent, a frequent NEX skill. Begin by converting into a decimal. Divide 1 by 25: $1 \div 25 = 0.04$.

Next, convert the decimal to a percent by multiplying by 100:

$$0.04 \times 100 = 4\%$$

Thus, the correct answer is B. Option A (0.4%) results from moving the decimal only one place instead of two. Option C (1.25%) corresponds to, and option D (25%) equals. NEX exam questions like this emphasize accurate decimal placement and awareness that percent conversion always involves multiplying by 100.

NEW QUESTION # 42

Five samples were taken of a population of four-year-old children.

The table shows the sample sizes and mean heights (cm):

Based on these samples, what is the mean height of the population of four-year-old children?

- A. 104.5
- B. 0
- C. 1
- D. 2

Answer: A

Explanation:

This question tests weighted averages. Because the sample sizes are different, you cannot simply average the mean heights. Instead, multiply each sample mean by its sample size, add the results, and divide by the total number of children.

$$\text{Total children} = 20 + 20 + 25 + 70 + 20 = 155$$

$$\text{Total height} = (20 \times 95) + (20 \times 100) + (25 \times 100) + (70 \times 110) + (20 \times 105)$$

$$= 1,900 + 2,000 + 2,500 + 7,700 + 2,100$$

$$= 16,200$$

$$\text{Mean height} = 16,200 \div 155 \approx 104.5 \text{ cm}$$

Therefore, option A is correct. The NEX exam frequently tests understanding that larger samples should carry more weight when calculating population estimates.

NEW QUESTION # 43

.....

To do this you just need to pass NEX exam, which is quite challenging and demands thorough Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam preparation. For the complete, comprehensive and quick NEX Exam Preparation, the PrepAwayPDF NEX Dumps questions are ideal. You should not ignore it and must try PrepAwayPDF NEX exam questions for preparation today.

Latest Real NEX Exam: <https://www.prepawaypdf.com/NLN/NEX-practice-exam-dumps.html>

You may not be impatient with those general inefficient training material, but when you practice our NEX vce pdf: Nursing Entrance Exam (Math, Science and Verbal), you will realize that the time you spent on other training materials is a waste of time, NLN NEX Dump Once you buy our product, you will enjoy one year free update in terms of your support to our products, Our NEX test torrent won't let the client wait for too much time and the client will receive the mails in 5-10 minutes sent by our system.

When the wireless card is enabled, an icon is present in the desktop NEX menu bar, This book is also not geared to any primary topic such as meta data or data quality but covers a broad range of areas.

100% Pass Quiz 2026 NEX: Nursing Entrance Exam (Math, Science and Verbal) Marvelous Dump

You may not be impatient with those general inefficient training material, but when you practice our NEX vce pdf: Nursing Entrance Exam (Math, Science and Verbal), you will realize that the time you spent on other training materials is a waste of time.

Once you buy our product, you will enjoy one year free update in terms of your support to our products, Our NEX test torrent won't let the client wait for too Latest Real NEX Exam much time and the client will receive the mails in 5-10 minutes sent by our system.

Our free demo of NEX training material provides you with the free renewal in one year so that you can keep track of the latest points happening in the world.
