

Vce AWS-Solutions-Associate Torrent - AWS-Solutions-Associate Latest Dumps

P.S. Free 2026 Amazon AWS-Solutions-Associate dumps are available on Google Drive shared by DumpsTests:
https://drive.google.com/open?id=1IesqcCu6oW7VJT_3ANtFJAwqpKNdwV45

If you are interested in DumpsTests's training program about Amazon certification AWS-Solutions-Associate exam, you can first on WWW.DumpsTests.COM to free download part of the exercises and answers about Amazon Certification AWS-Solutions-Associate Exam as a free try. We will provide one year free update service for those customers who choose DumpsTests's products.

Our supporter of AWS-Solutions-Associate study guide has exceeded tens of thousands around the world, which directly reflects the quality of them. Because the exam may put a heavy burden on your shoulder while our AWS-Solutions-Associate practice materials can relieve you of those troubles with time passing by. Just spent some time regularly on our AWS-Solutions-Associate Exam simulation, your possibility of getting it will be improved greatly. For your information, the passing rate of our AWS-Solutions-Associate training engine is over 98% up to now.

Amazon AWS-Solutions-Associate Latest Dumps & Accurate AWS-Solutions-Associate Study Material

We strongly recommend the AWS-Solutions-Associate exam questions compiled by our company. On one hand, our AWS-Solutions-Associate test material owns the best quality. When it comes to the AWS-Solutions-Associate study materials selling in the market, qualities are patchy. But our AWS-Solutions-Associate test material has been recognized by multitude of customers, which possess of the top-class quality, can help you pass exam successfully. On the other hand, our AWS-Solutions-Associate Latest Dumps are designed by the most experienced experts, thus it can not only teach you knowledge, but also show you the method of learning in the most brief and efficient ways.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q11-Q16):

NEW QUESTION # 11

A company is designing a web application using AWS that processes insurance quotes. Users will request quotes from the application. Quotes must be separated by quote type, must be responded to within 24 hours, and must not be lost. The solution should be simple to set up and maintain.

Which solution meets these requirements?"

- A. Create a single Amazon Simple Notification Service (Amazon SNS) topic and subscribe the Amazon SQS queues to the SNS topic. Configure SNS message filtering to publish messages to the proper SQS queue based on the quote type. Configure each backend application server to work its own SQS queue.
- B. Create multiple Amazon Simple Notification Service (Amazon SNS) topics and register Amazon SQS queues to their own SNS topic based on the quote type. Configure the web application to publish messages to the SNS topic queue. Configure each backend application server to work its own SQS queue.
- C. Create multiple Amazon Kinesis data streams based on the quote type. Configure the web application to send messages to the proper data stream. Configure each backend group of application servers to pool messages from its own data stream using the Kinesis Client Library (KCL).
- D. Create multiple Amazon Kinesis Data Firehose delivery streams based on the quote type to deliver data streams to an Amazon Elasticsearch Service (Amazon ES) cluster. Configure the web application to send messages to the proper delivery stream. Configure each backend group of application servers to search for the messages from Amazon ES and process them accordingly.

Answer: D

NEW QUESTION # 12

A company wants to migrate its MySQL database from on-premises to AWS. The company recently experienced a database outage that significantly impacted the business. To ensure this does not happen again, the company wants a reliable database solution on AWS that minimizes data loss and stores every transaction on at least two nodes.

Which solution meets these requirements?"

- A. Create an Amazon EC2 instance with a MySQL engine installed that triggers an AWS Lambda function to synchronously replicate the data to an Amazon RDS MySQL DB instance.
- B. Create an Amazon RDS MySQL DB instance with Multi-AZ functionality enabled to synchronously replicate the data.
- C. Create an Amazon RDS MySQL DB instance and then create a read replica in a separate AWS Region that synchronously replicates the data.
- D. Create an Amazon RDS DB instance with synchronous replication to three nodes in three Availability Zones.

Answer: B

Explanation:

Explanation

Q: What does Amazon RDS manage on my behalf?

Amazon RDS manages the work involved in setting up a relational database: from provisioning the infrastructure capacity you request to installing the database software. Once your database is up and running, Amazon RDS automates common administrative tasks such as performing backups and patching the software that powers your database. With optional Multi-AZ deployments, Amazon RDS also manages synchronous data replication across Availability Zones with automatic failover.

NEW QUESTION # 13

A Solutions Architect is designing a highly available web application on AWS. The data served on the website is dynamic and is pulled from Amazon DynamoDB. All users are geographically close to one another.

How can the Solutions Architect make the application highly available?"

- A. Host the website data on Amazon S3 and set permissions to enable public read-only access for users.
- B. Host the application on EC2 instances across multiple Availability Zones. Use an Auto Scaling group coupled with an Application Load Balancer.
- C. Host the web server data on Amazon CloudFront and update the objects in the CloudFront distribution when they change.
- D. Host the application on EC2 instances in a single Availability Zone. Replicate the EC2 instances to a separate region, and use an Application Load Balancer for high availability.

Answer: B

NEW QUESTION # 14

A company has a legacy application running on servers on premises. To increase the application's reliability, the company wants to gain actionable insights using application logs. A Solutions Architect has been given following requirements for the solution:

- * Aggregate logs using AWS.
- * Automate log analysis for errors.
- * Notify the Operations team when errors go beyond a specified threshold.

What solution meets the requirements?

- A. Install Amazon Kinesis Agent on servers, send logs to Amazon Kinesis Data Streams and use Amazon Kinesis Data Analytics to identify errors, create an Amazon CloudWatch alarm to notify the Operations team of errors
- B. Install an AWS X-Ray agent on servers, send logs to AWS Lambda and analyze them to identify errors, use Amazon CloudWatch Events to notify the Operations team of errors.
- **C. Install the Amazon CloudWatch agent on servers, send logs to Amazon CloudWatch Logs and use metric filters to identify errors, create a CloudWatch alarm to notify the Operations team of errors.**
- D. Install Logstash on servers, send logs to Amazon S3 and use Amazon Athena to identify errors, use sendmail to notify the Operations team of errors.

Answer: C

Explanation:

Explanation/Reference: <https://docs.aws.amazon.com/AmazonCloudWatch/latest/logs/WhatIsCloudWatchLogs.html>

NEW QUESTION # 15

A company has migrated an application to Amazon EC2 Linux instances. One of these EC2 instances runs several 1-hour tasks on a schedule. These tasks were written by different teams and have no common programming language. The company is concerned about performance and scalability while these tasks run on a single instance. A solutions architect needs to implement a solution to resolve these concerns.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Copy the tasks into AWS Lambda functions. Schedule the Lambda functions by using Amazon EventBridge (Amazon CloudWatch Events).
- **B. Use AWS Batch to run the tasks as jobs. Schedule the jobs by using Amazon EventBridge (Amazon CloudWatch Events).**
- C. Create an Amazon Machine Image (AMI) of the EC2 instance that runs the tasks. Create an Auto Scaling group with the AMI to run multiple copies of the instance.
- D. Convert the EC2 instance to a container. Use AWS App Runner to create the container on demand to run the tasks as jobs.

Answer: B

Explanation:

AWS Batch is a fully managed service that enables users to run batch jobs on AWS. It can handle different types of tasks written in different languages and run them on EC2 instances. It also integrates with Amazon EventBridge (Amazon CloudWatch Events) to schedule jobs based on time or event triggers. This solution will meet the requirements of performance, scalability and low operational overhead¹².

B). Convert the EC2 instance to a container. Use AWS App Runner to create the container on demand to run the tasks as jobs. This solution will not meet the requirement of low operational overhead, as it involves converting the EC2 instance to a container and using AWS App Runner, which is a service that automatically builds and deploys web applications and load balances traffic². This is not necessary for running batch jobs.

C). Copy the tasks into AWS Lambda functions. Schedule the Lambda functions by using Amazon EventBridge (Amazon CloudWatch Events). This solution will not meet the requirement of performance, as AWS Lambda has a limit of 15 minutes for execution time and 10 GB for memory allocation³. These limits may not be sufficient for running 1-hour tasks.

D). Create an Amazon Machine Image (AMI) of the EC2 instance that runs the tasks. Create an Auto Scaling group with the AMI to run multiple copies of the instance. This solution will not meet the requirement of low operational overhead, as it involves creating and maintaining AMIs and Auto Scaling groups, which are additional resources that need to be configured and managed².

NEW QUESTION # 16

.....

DumpsTests AWS-Solutions-Associate study material also has a timekeeping function that allows you to be cautious and keep your own speed while you are practicing, so as to avoid the situation that you can't finish all the questions during the exam. With AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Associate Learning Materials, you only need to spend half your money to get several times better service than others.

AWS-Solutions-Associate Latest Dumps: <https://www.dumpstests.com/AWS-Solutions-Associate-latest-test-dumps.html>

Amazon Vce AWS-Solutions-Associate Torrent The comprehensive contents and the correct answer will help you master the important key knowledge about the actual test, Amazon Vce AWS-Solutions-Associate Torrent So, many people get stuck in the confusion and don't know how to do, By visit our website, the user can obtain an experimental demonstration, free after the user experience can choose the most appropriate and most favorite AWS-Solutions-Associate exam questions download, You have to pass the AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Associate exam to achieve the Amazon AWS-Solutions-Associate certification on the first attempt, which is organized by Amazon.

Remote administrator session has a timeout value, In fact, they aren't sure whether Vce AWS-Solutions-Associate Torrent to read your page or not, The comprehensive contents and the correct answer will help you master the important key knowledge about the actual test.

Vce AWS-Solutions-Associate Torrent - 100% Pass 2026 First-grade Amazon AWS-Solutions-Associate Latest Dumps

So, many people get stuck in the confusion and AWS-Solutions-Associate don't know how to do, By visit our website, the user can obtain an experimental demonstration, free after the user experience can choose the most appropriate and most favorite AWS-Solutions-Associate exam questions download.

You have to pass the AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Associate exam to achieve the Amazon AWS-Solutions-Associate certification on the first attempt, which is organized by Amazon, We strongly recommend using our Amazon AWS-Solutions-Associate exam dumps to prepare for the Amazon AWS-Solutions-Associate certification.
