Citrix PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual Citrix 1Y0-205 Exam Questions in this Citrix 1Y0-205 pdf dumps file.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q62-Q67):

NEW QUESTION # 62
Scenario: A Citrix Administrator needs to configure StoreFront to allow external users access to internal resources. The external users will authenticate on StoreFront. Which StoreFront authentication method can the administrator configure?

- A. HTTP Basic
- B. Smart card
- C. Pass-through from NetScaler Gateway
- D. Username and password

Answer: C

Explanation:
For external access, authentication is typically performed at Citrix NetScaler (now Citrix ADC).
StoreFront must then be configured with the "Pass-through from NetScaler Gateway" authentication method, allowing StoreFront to accept and trust the authentication performed externally.

NEW QUESTION # 63
A Citrix Administrator is configuring a Citrix Virtual Desktops Site for use with a mirrored SQL Server database. Which setting In SQL is important that the administrator configure manually when creating an empty database on the principal SQL Server?

- A. SQL Mirroring Version
- B. SQL Version Number
- C. Database Type Setting
- D. Collation Setting

Answer: D

Explanation:
When configuring a Citrix Virtual Desktops Site with a mirrored SQL Server database, the collation setting must be configured manually and must match across all SQL Servers in the mirroring setup. Citrix relies on consistent collation to ensure proper database functionality.

NEW QUESTION # 64
Which Citrix Director view will allow a Citrix Administrator to view data on the current CPU, as well as memory and disk latency for a machine running the Virtual Delivery Agent (VDA)?

- A. Load Evaluator Index
- B. Resource Utilization
- C. Machine Utilization
- D. Capacity Management

Answer: B

Explanation:
The Resource Utilization view in Citrix Director provides real-time data on CPU, memory usage, and disk latency for VDA machines. This allows administrators to monitor system performance and identify resource bottlenecks affecting user sessions.

NEW QUESTION # 65
Scenario: A Citrix Administrator is working on a published application. The network is connected for 100 seconds but is interrupted and applications become unusable. The session then automatically resumes, and the administrator is able to continue working on the application at the same progress point as before the interruption.
Which policy is enabled in this scenario?

- A. ICA Keep Alive
- B. Session Reliability
- C. Auto client reconnect
- D. Load Management

Answer: B

NEW QUESTION # 66
When a user creates a print job from a VDA-mapped network printer, how is the print job routed?

- A. Through the HDX protocol from VDA to Endpoint, and then to the print server.
- B. Directly from the VDA server to the print server and then to the print device for output.
- C. Directly to the Endpoint printer, bypassing the VDA server.
- D. Printing to a network printer is not supported with HDX.

Answer: B

Explanation:
When using a VDA-mapped network printer, the print job is processed on the VDA and sent directly to the network print server,

which then forwards it to the physical printer. This avoids unnecessary routing through the client endpoint and ensures efficient printing.

NEW QUESTION # 67

......

For candidates who want to buy 1Y0-205 exam materials online, they may have the concern of the privacy. We respect personal information of you. If you buy 1Y0-205 test materials from us, your personal information such as your email address and name will be protected well. Once the order finishes, your personal information will be concealed. Moreover, 1Y0-205 Exam Dumps cover most of knowledge points for the exam, and it will be enough for you to pass the exam just one time. In order to strengthen your confidence for 1Y0-205 exam braindumps, we are pass guarantee and money back guarantee.

Test 1Y0-205 Assessment: https://www.lead1pass.com/Citrix/1Y0-205-practice-exam-dumps.html
