### **SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q42-Q47):**

#### **NEW QUESTION # 42**

What are some possible configurations for a task created in SAP Signavio Process Governance? Note: There are 3 correct answers to this question.

- A. Assign it to a specific user.**
- B. Assign it to dictionary categories.
- C. Add subtasks.**
- D. Set a due date.**
- E. Store attributes.

**Answer: A,C,D**

#### **NEW QUESTION # 43**

What are some filters that are available in the search function in SAP Signavio Process Collaboration Hub? Note: There are 3 correct answers to this question.

- A. Attributes**
- B. Dictionary entries**
- C. Models**
- D. IT Systems
- E. Files

**Answer: A,B,C**

Explanation:

In the SAP Signavio Process Collaboration Hub, the search function offers several filters to help users find specific content quickly and efficiently. These filters include Attributes, Models, and Dictionary entries.

Attributes allow users to search based on specific characteristics or properties of processes, facilitating targeted search results.

Models filter enables users to narrow down search results to specific types of process models, enhancing the relevance of the results. Dictionary entries filter aids in finding terms and definitions that are crucial for understanding and aligning on process terminology.

across the organization. IT Systems and Files are not listed as standard filters within the SAP Signavio Process Collaboration Hub search functionality.

#### NEW QUESTION # 44

What are the goals of Business Process Management? Note: There are 3 correct answers to this question.

- A. To monitor and control processes
- B. To share processes
- C. To measure processes
- D. To document processes
- E. To save processes

**Answer: A,C,D**

Explanation:

Business Process Management (BPM) aims to systematically manage and optimize organizational processes.

The SAP Signavio Process Transformation Suite Documentation defines the goals:

\* Exact Extract:"The goals of Business Process Management include:

\* To Document Processes: Creating clear, standardized process models for understanding and communication.

\* To Measure Processes: Analyzing process performance through metrics like cycle time or cost.

\* To Monitor and Control Processes: Ensuring processes operate as intended and addressing deviations through governance and analytics." (SAP Signavio Process Transformation Suite Overview, section on "BPM Objectives").

\* Explanation:

\* Option B (To document processes):Documentation is a core BPM goal, creating models (e.g., BPMN diagrams in SAP Signavio Process Manager) to capture process details for reference and improvement.

\* Option C (To measure processes):Measuring performance through KPIs, supported by SAP Signavio Process Intelligence, enables organizations to assess efficiency and identify optimization opportunities.

\* Option D (To monitor and control processes):BPM involves ongoing monitoring (e.g., via the Collaboration Hub) and control (e.g., via Process Governance workflows) to ensure processes align with business objectives.

\* Option A (To share processes)is incorrect as sharing is a means to achieve BPM goals (e.g., via the Collaboration Hub), not a goal itself.

\* Option E (To save processes)is incorrect because "saving" is a technical action, not a strategic BPM objective.

Reference:SAP Signavio Process Transformation Suite Overview, section on "BPM Objectives"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 2: Process Management Objectives.

#### NEW QUESTION # 45

What are some types of subprocesses that exist in BPMN?Note: There are 2correct answers to this question.

- A. Grouped subprocess
- B. Supported subprocess
- C. Expanded subprocess
- D. Collapsed subprocess

**Answer: C,D**

Explanation:

In BPMN (Business Process Model and Notation), subprocesses are used to simplify complex process diagrams by grouping activities. The types of subprocesses in BPMN include:

\* Option A (Expanded subprocess):This subprocess is depicted as a rounded rectangle with a plus sign, indicating that it can be expanded to show the details of the subprocess within the main process diagram

\* Option D (Collapsed subprocess):A collapsed subprocess is represented as a rounded rectangle with a plus sign, but unlike the expanded subprocess, it does not show the internal details within the same diagram. Instead, it simplifies the main process diagram by hiding the complexity of the subprocess.

These subprocess types help manage the complexity of BPMN diagrams, making them easier to understand and navigate.
