Candidates are expected to be familiar with tools and methods for importing legacy data and confirming its integrity post-migration.</li> </ul>

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q33-Q38):

### NEW QUESTION # 33

Which of the following actions does the lead configuration expert carry out during the content deployment phase in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Create two projects
- B. Confirm primary finance settings
- C. Define the scope
- D. Confirm primary HCM settings
- E. Confirm primary logistics settings

**Answer: A,C,E**

Explanation:

For implementing SAP S/4HANA Cloud Public Edition for a customer, the following systems are commonly used:

\* Sandbox system: This system is used in the very early stages of the project for exploration and trying out different configurations without affecting the development or production environments. It's a safe space for experimentation.

\* Development system: This system is where the initial setup and customizations are made. Configuration changes, custom development, and extensions are carried out here before being moved to the test system for further testing.

\* Test system: After configurations and developments are done in the development system, they are transported to the test system. This environment is used for rigorous testing to ensure that everything works as expected and to identify any issues before moving to the production environment.

These systems play crucial roles in the implementation process, allowing for a structured and phased approach to setting up, customizing, testing, and finally deploying SAP S/4HANA Cloud Public Edition.

### NEW QUESTION # 34

Which of the following actions does the lead configuration expert carry out during the content deployment phase in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Create two projects
- B. Confirm primary finance settings
- C. Confirm primary logistics settings
- D. Define the scope
- E. Confirm primary HCM settings

**Answer: A,B,D**

### NEW QUESTION # 35

Which tools does SAP provide to make it easier for customers to maintain their SAP S/4HANA Cloud systems after a release

upgrade? Note: There are 2 correct answers to this question.

- A. SAP Signavio Process Navigator Tool
- **B. What's New Viewer Tool**
- **C. Test Automation Tool**
- D. Release Assessment and Scope Dependency Tool

**Answer: B,C**

Explanation:

SAP provides several tools to facilitate the maintenance of SAP S/4HANA Cloud systems following a release upgrade, ensuring that customers can smoothly transition to the latest functionalities and improvements:

\* What's New Viewer Tool: This tool is invaluable for understanding the changes and new features introduced with each SAP S/4HANA Cloud release. It provides detailed descriptions of new functionalities, improvements, and changes in the system, helping customers to adapt their processes and leverage new capabilities effectively. It serves as a guide to explore and understand the enhancements that come with each upgrade.

\* Test Automation Tool: Post-upgrade, it's crucial to ensure that existing functionalities continue to work as expected and new features are correctly implemented. The Test Automation Tool allows customers to automate testing of business processes, significantly reducing the time and effort required for testing after a release upgrade. This tool helps in identifying any issues arising from the upgrade early in the process, ensuring a smooth transition to the new release.

These tools are designed to assist customers in navigating the complexities of system upgrades, ensuring that they can make the most out of new features while maintaining their existing system's stability and performance.

#### NEW QUESTION # 36

After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. Integration and API List
- **B. Integration Solution Advisory Methodology**
- C. SAP Business Accelerator Hub
- D. SAP Cloud ALM Requirements app

**Answer: B**

Explanation:

The Integration Solution Advisory Methodology (ISA-M) is a framework that helps customers and partners to define their integration strategy, design the integration architecture, and document the integration solution.

ISA-M covers the entire integration lifecycle, from planning and scoping to testing and deployment. ISA-M is based on best practices and recommendations from SAP and industry experts. ISA-M supports different integration scenarios, such as cloud-to-cloud, cloud-to-on-premise, and hybrid integration. ISA-M also provides tools and templates to facilitate the integration process, such as the Integration Assessment Questionnaire, the Integration Architecture Document, and the Integration Test Plan.
