Test PDII-JPN Result & PDII-JPN Reliable Test Preparation

The pass rate is 98% for PDII-JPN exam bootcamp, if you choose us, we can ensure you that you can pass the exam just one time. In addition, we offer you free demo to have a try before buying, so that you can know what the complete version is like. In order to strengthen your confidence for PDII-JPN training materials, we are pass guarantee and money back guarantee, and we will refund your money if you fail to pass the exam. We have a professional service team and they have the professional knowledge for PDII-JPN Exam Bootcamp, if you have any questions, you can contact with them.

Salesforce Sample Questions (Q70-Q75):

NEW QUESTION # 70
企業は、アカウントが更新されるたびに外部システムに通知する必要があります。

```
trigger AccountTrigger on Account (after update){ for (Account
updatedAccount:Trigger.new){ AccountTriggerHelper.notinyxternalSystem
(updatedAccount.id); } } public class AccountTriggerHelperfuture(callout=true)
{ public static void notinyxternalSystem(Id accountId){ Account acc = [Select
id, name from Account where accountId =:accountId]; http objectHttp h = new
Http(); HttpRequest req = new HttpRequest(); req.setEndpoint('http://
example.org/restService'); req.setMethod('POST'); req.setBody(JSON serialize
(acc)); HttpResponse res = h.send(req); } }
```

次のコードはどのような LimitException を引き起こす可能性がありますか?

- A. System.LimitException: 将来の呼び出しが多すぎます
- B. System.LimitException: SOQL クエリが多すぎます
- C. System.CalloutException: トリガーからのコールアウトは現在サポートされていません
- D. System.LimitException: コールアウトが多すぎます

Answer: A

NEW QUESTION # 71
次のコードがあるとします。
Java
for (Contact c : [SELECT Id, LastName FROM Contact WHERE CreatedDate = TODAY])
{
Account a = [SELECT Id, Name FROM Account WHERE CreatedDate = TODAY LIMIT 5]; c.AccountId = a.Id; update c;
}
今日、連絡先が 10 件、アカウントが 5 件作成されたと仮定すると、どのような結果が期待されますか?

- A. System.QueryException: リストにアカウントの割り当ての行が複数あります
- B. System.QueryException: 連絡先に DML ステートメント エラーが多すぎます
- C. System.LimitException: アカウントのSOQLクエリが多すぎます
- D. System.LimitException: 連絡先に対するSOQLクエリが多すぎます

Answer: A

Explanation:
2
The primary issue in this code snippet is a violation of basic variable assignment rules in Apex when dealing with SOQL results. In the line Account a = [SELECT Id, Name FROM Account ...], the code attempts to assign the result of a query directly 3to a single SObject variable (Account a).
In Apex, a SOQL query assigned to a single SObject variable must return exactly one record. If the query returns zero records, it throws a System.QueryException: List has no rows for assignment. If the query returns more than one record, it throws a System.QueryException: List has more than one row for assignment (Option A). Since the prompt explicitly states that five Accounts were created today and the query is not filtered to a single unique ID, the query will return five records. Even though there is a LIMIT 5 clause, that only caps the results at five; it does not ensure only one is returned. To fix this, the result should be assigned to a List<Account> or the query should be filtered to return exactly one row.
While the code also violates the "SOQL in a loop" best practice, it would not hit the LimitException (Option C) in this specific case because the loop only runs 10 times (10 contacts), and the limit is 100 queries. The runtime assignment error occurs before any governor limits are breached.

NEW QUESTION # 72
開発者は、連絡先をすばやく入力できるように Lightning Web コンポーネントを作成しますが、エラー メッセージは表示されません。

```
<template>
    <lightning-record-edit-form
            object-api-name="Contact">
        <lightning-input-field field-name="FirstName"></lightning-input-field>
        <lightning-input-field field-name="LastName"></lightning-input-field>
        <lightning-input-field field-name="Email"></lightning-input-field>
        <lightning-button type="submit"
                          name="submit"
                          label="Create Contact">
        </lightning-button>
    </lightning-record-edit-form>
</template>
```

エラー メッセージを表示するために開発者がフォームに追加する必要のあるコンポーネントはどれですか?

- A. オーラ:メッセージ
- B. 頂点: メッセージ
- C. 雷エラー
- D. ライトニング メッセージ

Answer: D

NEW QUESTION # 73

コードの重複を避け、保守性を向上させるために、Universal Containers はコード再利用のための API 統合をどのように実装する必要がありますか?

- A. API 統合コードを、それを必要とする各 Apex クラスに直接含めます。
- B. API 統合用の再利用可能な Apex クラスを作成し、関連する Apex クラスから呼び出します。
- C. 統合ロジックをカプセル化するには、API エンドポイントごとに個別の Apex クラスを使用します。
- D. API 統合コードを静的リソースとして保存し、各 Apex クラスで参照します。

Answer: B

Explanation:
Comprehensive and Detailed Explanation:1
The fundamental principle of DRY (Don't Repeat Yourself) in Apex development dictates that logic used in multiple places should be centralized. For API integrations, this typically invo2lves creating a Utility or Service Class (Option A).
This class handles the common "plumbing" of the integration:
* Retrieving Named Credentials.
* Setting headers (Content-Type, Timeout).
* Standardizing error handling and logging.
* Serializing and deserializing JSON payloads.
By invoking this central class from various triggers, batch jobs, or controllers, the developer ensures that any change to the API (such as a version update or header change) only needs to be made in one place. Option B leads to "class sprawl" and duplicate boilerplate code. Option C is incorrect as Static Resources cannot contain executable Apex code. Option D is the definition of poor maintainability.

NEW QUESTION # 74

企業は、機密情報を 7 年後に自動的に削除する必要があります。
これにより、毎日約 100 万件のレコードが削除される可能性があります。
どうすればこれを達成できるでしょうか?

- A. 3fuzure プロセスをスケジュールして、7 年以上古いレコードをクエリし、それ自体を 1,000 レコードバッチで再帰的に呼び出して削除します。
- B. 集計関数を使用して 7 年以上古いレコードをクエリし、aggrigateResults オブジェクトを削除します。{civ [+] 7 年以上前のレコードをクエリして削除するバッチ Apex プロセスを毎日実行するようにスケジュールします。
- C. SOSL ステートメントを実行して 7 年より古いレコードを検索し、結果セット全体を削除します。

Answer: C

Explanation:
Batch Apex is designed to handle large data operations by breaking the transaction into smaller batches.
Scheduling a batch process to run daily enables the system to manage the deletion of large numbers of records efficiently, without hitting governor limits. It's the best practice for performing mass deletions on a regular schedule.
