## EPIC EDI101 Test Quiz & EDI101 Vce Exam

The field of EPIC is growing rapidly and you need the EPIC EDI101 certification to advance your career in it. But clearing the EDI101 test is not an easy task. Applicants often don't have enough time to study for the EDI101 Exam. They are in desperate need of real EPIC EDI101 exam questions which can help them prepare for the EDI101 test successfully in a short time.

## EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q52-Q57):

### NEW QUESTION # 52

It is possible to start the Communications Daemons for both incoming and outgoing interfaces at the same time.

- A. False
- B. True

**Answer: B**

Explanation:

Bridges management tools allow administrators to select multiple interfaces-regardless of whether they are sending data (outgoing) or receiving data (incoming)-and issue a "Start" command to their respective Communications Daemons simultaneously. This facilitates efficient management during system startups or after maintenance.

### NEW QUESTION # 53

Editing a message in the messages activity can overwrite existing messages on the data queue.

- A. False
- B. True

**Answer: A**

Explanation:

When you edit a message within the Bridges Messages activity, you are not overwriting the original message on the data queue. Instead, Bridges typically creates a new version of the message for resubmission or processing, preserving the original message's history and integrity for auditing purposes. The original data remains intact as part of the interface's message log.

### NEW QUESTION # 54

Which of the following are possible reasons that an incoming message might show as "waiting" in your message search results?  
(SELECT ALL THAT APPLY)

- A. The message is in the holding queue.
- B. There is a high volume of messages to file.
- C. The communications daemon is not running.
- D. The Filer Daemon is not running.

**Answer: A,B,D**

Explanation:

A message shows as "waiting" when it has been received but not yet processed by the Filer. Common causes include:

- \* High Volume: The Filer Daemon is working through a backlog.
- \* Filer Daemon Stopped: If the Filer is not running, no messages can move from the queue to the database.
- \* Holding Queue: The message is specifically waiting for a patient record lock to be released before it can file.
- \* The Communications Daemon (Option D) is responsible for receiving the message; if it weren't running, the message wouldn't even be in the search results yet.

### NEW QUESTION # 55

If interface specification ABC has 45 days listed as its purge days, and Data Exchange System Definitions has 60 days listed for purge days, how many days will messages on interface ABC last?

- A. 30 Days
- B. 45 Days
- C. It depends on whether the message has active errors
- D. 60 Days

**Answer: B**

Explanation:

Similar to profile variables, purge settings follow a hierarchy where the more specific configuration overrides the more general one. Because the Interface Specification is more specific than the System Definitions, its value of 45 days takes precedence. Messages for interfaces using that specification will be eligible for purging after 45 days.

#### **NEW QUESTION # 56**

The Communications Daemon translates the HL7 data it receives into Chronicles.

- **A. False**
- B. True

**Answer: A**

Explanation:

The Communications Daemon is only responsible for the transport of the message (connecting to the external system and moving raw data). The process of translating that data and filing it into Epic's database (Chronicles) is handled by the Filer Daemon .

#### **NEW QUESTION # 57**
