## 2026 Trustable 100% Free Plat-Dev-210 – 100% Free Sample Questions Pdf | Salesforce Certified Omnistudio Developer New APP Simulations

Professionals who hold Plat-Dev-210 certification demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the industry. To meet the growing demand for Salesforce Plat-Dev-210 certification exam, preparation platforms have emerged in recent years. Dumpleader offers candidates actual Plat-Dev-210 Questions Pdf, practice exams, and 24/7 support to ensure they have the best possible preparation for the exam.

### Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Expression Sets &amp; Decision Matrices:</b> This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Integrated Troubleshooting and Deployment:</b> This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Flexcards:</b> This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Omnistudio Data Mappers:</b> This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.</li> </ul>

## Salesforce Certified Omnistudio Developer Sample Questions (Q27-Q32):

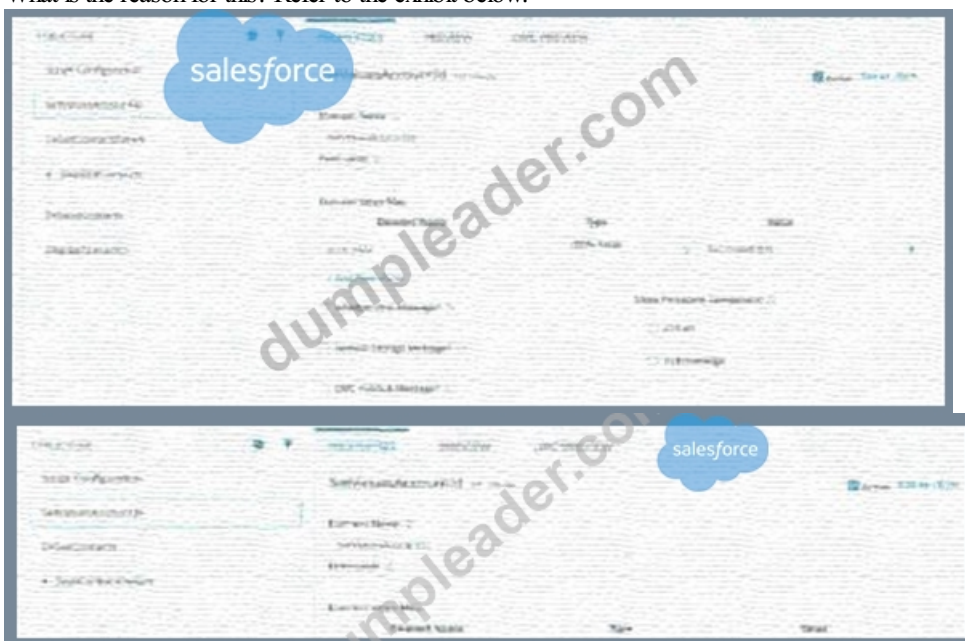

### NEW QUESTION # 27

A customer sets up to LWC Omniscripts, one embedded into another. Account is set in a Set Values element in the parent Omniscript.

The AccountId set in the parent Omniscript is used to another Set Values element ContextAccountId in the embedded OmniScript. The embedded Omniscript is activated.

While previewing the OmniScript flow from the parent, it is found that Account is set correctly in the parent OmniScript. However, ContextAccountId in the embedded OmniScript is not set with the AccountId from parent Omniscript. On previewing the embedded OmniScript individually, it is found that ContextAccountId is set correctly.

What is the reason for this? Refer to the exhibit below.

- A. The LWC PubSub Message flag in the Set Values action of the parent has not been set.

- B. A developer failed to include a Navigation Element to pass data from the parent OmniScript.
- C. The flag pass Data JSON in the parent OmniScript in not configured correctly.
- D. Both parent and embedded OmniScripts have the same element name for the Set values element.

**Answer: B**

Explanation:

The LWC PubSub Message flag in the Set Values action of the parent OmniScript enables the parent OmniScript to send data to the embedded OmniScript using a custom event. If this flag is not set, the data will not be passed to the embedded OmniScript.

#### NEW QUESTION # 28

A developer is building a DataRaptor Load for an Integrate Procedure used in an OmniScript. Based on best practices, how should the developer configure the Input JSON?

- A. Build the Input JSON node by node in the DataRaptor Designer.
- B. Copy the Input JSON from the DataRaptor Action Debug node.
- C. Copy the Input JSON from the OmniScript {Data} modal.
- D. Build the Input JSON node by node in an editor.

**Answer: C**

Explanation:

The best practice for configuring the Input JSON for a DataRaptor Load is to copy the Input JSON from the OmniScript {Data} modal. This ensures that the Input JSON matches the data structure and format of the OmniScript data. The DataRaptor Action Debug node may not have the same data as the OmniScript data, and building the Input JSON node by node in an editor or in the DataRaptor Designer may introduce errors or inconsistencies.

#### NEW QUESTION # 29

A developer is configuring an Integration Procedure Action in an OmniScript. The OmniScript needs a JSON response from the Integration Procedure but does not need to wait for the response for the user to proceed. Which feature should the developer enable?

- A. Invoke Mode Non-Blocking
- B. Invoke Mode Fire and Forget
- C. Toast Completion
- D. Use Future

**Answer: B**

Explanation:

In OmniStudio, the Invoke Mode: Fire and Forget setting allows an OmniScript to call an Integration Procedure asynchronously, meaning it does not wait for the response to complete before continuing user interaction.

\* C. Invoke Mode Fire and Forget - This is the correct setting. It's designed specifically for use cases where the user experience should not be blocked by backend processing.

Incorrect Options:

- \* A. Use Future is not a valid OmniScript configuration option.
- \* B. Invoke Mode Non-Blocking is not an official setting in OmniStudio terminology.
- \* D. Toast Completion is a UI notification setting and does not impact execution behavior.

:

OmniStudio Developer Guide # Integration Procedure Actions in OmniScripts

#### NEW QUESTION # 30

The OmniScript must retrieve device details stored in the Asset object and then call an external system to send troubleshooting commands via REST API to the device.

Which two OmniScript element should the developer use to configure this functionality?

- A. Navigation Action
- B. HTTP Action

- C. SOQL Action
- D. REST API Action
- E. DataRaptor Extract Action

**Answer: B,E**

Explanation:

According to the OmniScript Action Elements page, a DataRaptor Extract Action can be used to "get data from one or more Salesforce records" and an HTTP Action can be used to "get, save, or delete data through a web application programming interface (API)".

### NEW QUESTION # 31

A developer is building an OmniScript and needs to save to Salesforce and to an AWS Order Management system. Which OmniScript element could save all of this data?

- A. Integration Procedure Action
- B. DataRaptor Post Action
- C. DataRaptor Load Action
- D. HTTP Action

**Answer: A**

Explanation:

An Integration Procedure Action can execute an Integration Procedure that contains multiple elements, such as DataRaptor Actions, HTTP Actions, or other Integration Procedure Actions. This can be used to save data to multiple systems, such as Salesforce and AWS Order Management, in one OmniScript element.

### NEW QUESTION # 32

.....

Are you still upset about how to pass Salesforce certification Plat-Dev-210 exam? Are you still waiting for the latest information about Salesforce certification Plat-Dev-210 exam? Dupleader has come up with the latest training material about Salesforce certification Plat-Dev-210 exam. Do you want to pass Salesforce certification Plat-Dev-210 exam easily? Please add Dupleader's Salesforce certification Plat-Dev-210 exam practice questions and answers to your cart now! Dupleader has provided part of Salesforce Certification Plat-Dev-210 Exam practice questions and answers for you on [www.Dupleader.com](http://www.Dupleader.com) and you can free download as a try. I believe you will be very satisfied with our products. With our products you can easily pass the exam. We promise that if you have used Dupleader's latest Salesforce certification Plat-Dev-210 exam practice questions and answers exam but fail to pass the exam, Dupleader will give you a full refund.
