E_S4CPE_2405 Exam Questions - SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Study Question & E_S4CPE_2405 Test Guide

Candidates are looking for valid E_S4CPE_2405 questions which belong to E_S4CPE_2405 urgently. If you need valid exam questions and answers, our high quality is standing out. We are confident that our E_S4CPE_2405 training online materials and services are competitive. Every year we spend much money and labor relationship on remaining competitive. We are trying to offer the best high passing-rate E_S4CPE_2405 Training Online materials with low price. Our exam materials will help you pass exam one shot without any doubt.

SAP E_S4CPE_2405 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.
Topic 2	<ul style="list-style-type: none"> • Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.
Topic 3	<ul style="list-style-type: none"> • System Landscapes and Identity Access Management: This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q28-Q33):

NEW QUESTION # 28

How do you set up SAP Test Automation by Tricentis for a customer?

- A. With an API from the SAP Business Accelerator Hub
- B. With an integration package from SAP Signavio Process Navigator
- **C. With an app in SAP Business Technology Platform**
- D. With an app in SAP Cloud ALM

Answer: C

Explanation:

SAP Test Automation by Tricentis is a cloud-based testing solution integrated with SAP S/4HANA Cloud Private Edition for automated testing. Let's evaluate how it's set up:

* A. With an app in SAP Business Technology Platform: This is correct. SAP Test Automation by Tricentis is provisioned and configured through SAP Business Technology Platform (BTP) as part of the RISE with SAP offering. It integrates with SAP S/4HANA via a BTP app, enabling customers to set up automated test cases, execute them, and monitor results.

* B. With an API from the SAP Business Accelerator Hub: This is incorrect. While APIs for testing might be available in the SAP Business Accelerator Hub, the setup of Tricentis involves a broader integration via BTP, not just an API.

* C. With an app in SAP Cloud ALM: This is incorrect. SAP Cloud ALM manages test plans and manual testing but does not host or set up SAP Test Automation by Tricentis—it integrates with it via BTP.

* D. With an integration package from SAP Signavio Process Navigator: This is incorrect. SAP Signavio focuses on process modeling, not test automation setup.

In summary, SAP Test Automation by Tricentis is set up A (With an app in SAP Business Technology Platform).

NEW QUESTION # 29

What has the SAP Business Workflow been designed for? Note: There are 3 correct answers to this question.

- **A. To create business processes with a high number of people involved in a pre-defined sequence**
- **B. To create cross-product workflow procedures**
- C. To create complex, repeated work processes with iterative cycles
- D. To create standard procedures from SAP Signavio Process Navigator
- **E. To create very simple release or approval procedures**

Answer: A,B,E

Explanation:

SAP Business Workflow is designed to automate and streamline various business processes. The following are key purposes of SAP Business Workflow:

Option A: To create cross-product workflow procedures

This option is correct. SAP Business Workflow facilitates the creation of workflows that span multiple products, enabling seamless integration across different systems.

Option B: To create complex, repeated work processes with iterative cycles This option is incorrect. While SAP Business Workflow can handle complex processes, it is not specifically designed for iterative cycles.

Option C: To create business processes with a high number of people involved in a pre-defined sequence This option is correct. SAP Business Workflow is ideal for processes that require the involvement of multiple participants in a predefined sequence, ensuring tasks are completed in the correct order.

Option D: To create very simple release or approval procedures

This option is correct. SAP Business Workflow can efficiently manage simple release or approval procedures, automating routine tasks to improve efficiency.

Option E: To create standard procedures from SAP Signavio Process Navigator This option is incorrect. SAP Business Workflow does not directly create procedures from SAP Signavio Process Navigator.

In summary, SAP Business Workflow is designed to create cross-product workflow procedures, manage business processes involving multiple participants in a predefined sequence, and handle simple release or approval procedures.

NEW QUESTION # 30

What are the most important tasks in the Fit-to-Standard analysis and design workshops for a system conversion? Note: There are 2 correct answers to this question.

- A. Capturing configuration requirements for the predefined solution
- B. Validating new functionality in the sandbox system
- C. Validating the predefined solution in the sandbox system
- D. Capturing configuration requirements for new functionality

Answer: A,C

NEW QUESTION # 31

Which of the following are key-user in-app extensions that can be completed in SAP S/4HANA Cloud Private Edition? Note: There are 2 correct answers to this question.

- A. Create a custom object with the Business Object Processing Framework (BOPF).
- B. Define a core data services (CDS) view with the ABAP development tools for Eclipse.
- C. Create a custom application UI with UI adaptation at runtime.
- D. Define a custom table in the SAP Fiori app "Custom Business Objects."

Answer: C,D

Explanation:

Key-user in-app extensibility in SAP S/4HANA Cloud Private Edition allows users to make specific adaptations and extensions directly within the system.

Option A: Define a custom table in the SAP Fiori app "Custom Business Objects." This option is correct. The "Custom Business Objects" app enables key users to create custom business objects, which include defining custom tables, without the need for developer intervention.

Option B: Create a custom object with the Business Object Processing Framework (BOPF).

This option is incorrect. Creating custom objects with BOPF requires developer skills and access to development tools, which goes beyond key-user in-app extensibility.

Option C: Define a core data services (CDS) view with the ABAP development tools for Eclipse.

This option is incorrect. Defining CDS views using ABAP development tools is a developer task and is not part of key-user in-app extensibility.

Option D: Create a custom application UI with UI adaptation at runtime.

This option is correct. UI adaptation at runtime allows key users to modify the user interface of applications, such as adding or hiding fields, without coding.

In summary, key-user in-app extensibility in SAP S/4HANA Cloud Private Edition includes defining custom tables using the "Custom Business Objects" app and creating custom application UIs through UI adaptation at runtime.

NEW QUESTION # 32

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition?

Note: There are 2 correct answers to this question.

- A. Nomination of a lead configuration expert for content activation
- B. Access to the Software Update Manager tool
- C. Detailed Digital Discovery Assessment with SAP Best Practices
- D. Nomination of a lead conversion expert for content activation

Answer: A,C

Explanation:

For a new implementation of SAP S/4HANA Cloud Private Edition, the following are required:

Option A: Detailed Digital Discovery Assessment with SAP Best Practices This option is correct. Conducting a comprehensive Digital Discovery Assessment helps in understanding the customer's business processes and aligning them with SAP Best Practices. This assessment is crucial for defining the project scope and ensuring a successful implementation.

Option B: Nomination of a lead configuration expert for content activation This option is correct. Appointing a lead configuration expert is essential for overseeing the activation of content and ensuring that the system is configured according to the project's requirements. This role is pivotal in managing the configuration activities during the implementation.

Option C: Nomination of a lead conversion expert for content activation This option is incorrect. While a lead conversion expert is important for data migration activities, content activation primarily falls under the purview of the configuration expert.

Option D: Access to the Software Update Manager tool

This option is incorrect. The Software Update Manager tool is typically used for system upgrades and updates, not specifically required for a new implementation.

In summary, a Detailed Digital Discovery Assessment with SAP Best Practices and the nomination of a lead configuration expert for content activation are critical prerequisites for a new implementation of SAP S

/4HANA Cloud Private Edition. These steps ensure that the project is aligned with best practices and that the system configuration is managed effectively.

NEW QUESTION # 33

.....

At present, SAP certification exam is the most popular test. Have you obtained SAP exam certificate? For example, have you taken SAP E_S4CPE_2405 certification exam? If not, you should take action as soon as possible. The certificate is very important, so you must get E_S4CPE_2405 certificate. Here I would like to tell you how to effectively prepare for SAP E_S4CPE_2405 exam and pass the test first time to get the certificate.
