NCA-6.10 Reliable Mock Test | NCA-6.10 Printable PDF

DOWNLOAD the newest SurePassExams NCA-6.10 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1Da_bm-2a1NVz4I4pGLouj-Ewu_xR_UzI

Our services before, during and after the clients use our NCA-6.10 certification material are considerate. Before the purchase, the clients can download and try out our NCA-6.10 learning file freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. After the clients use our NCA-6.10 Prep Guide dump if they can't pass the test smoothly they can contact us to require us to refund them in full and if only they provide the failure proof we will refund them at once. Our company gives priority to the satisfaction degree of the clients and puts the quality of the service in the first place.

Practice tests (desktop and web-based) provide an Nutanix NCA-6.10 examination scenario so your preparation for the Nutanix Certified Associate v6.10 (NCA-6.10) exam becomes quite easier. Since the real NCA-6.10 examination costs a high penny, SurePassExams provide a free demo of Nutanix NCA-6.10 Exam Dumps before your purchase. The free demo of the Nutanix Certified Associate v6.10 (NCA-6.10) exam prep material is helpful to remove your doubts about it. The product is available in three versions which are PDF, Web-based practice test, and Desktop practice test software.

NCA-6.10 Printable PDF, NCA-6.10 Exam Assessment

We will have a dedicated specialist to check if our NCA-6.10 learning materials are updated daily. We can guarantee that our NCA-6.10 exam question will keep up with the changes by updating the system, and we will do our best to help our customers obtain the latest information on learning materials to meet their needs. If you choose to purchase our NCA-6.10 quiz torrent, you will have the right to get the update system and the update system is free of charge. We do not charge any additional fees. Once our NCA-6.10 Learning Materials are updated, we will automatically send you the latest information about our NCA-6.10 exam question. We assure you that our company will provide customers with a sustainable update system.

Nutanix Certified Associate v6.10 Sample Questions (Q54-Q59):

NEW QUESTION # 54
An administrator wants to create a storage container for an application that has built-in redundancy. What should the administrator

do?

- A. Enable RF1 and create an RF1 storage container.
- B. RF1 is enabled by default in a storage container.
- C. Create an RF1 storage container.
- D. Create an RF1 storage container and enable RF1.

Answer: C

Explanation:

The correct answer is B. Create an RF1 storage container.
In Nutanix architecture, Replication Factor (RF) is set at the storage container level to optimize redundancy and performance for specific workloads. When an application has its own internal redundancy, such as database clustering or distributed file systems, the administrator may choose to reduce Nutanix's redundancy to RF1, which stores only one copy of data in the cluster. This reduces overhead and maximizes usable capacity, but is not fault-tolerant at the Nutanix level.
Key clarifications:
* RF1 is not enabled by default. Nutanix clusters default to RF2 or RF3 depending on the configuration and number of nodes.
* RF1 must be explicitly set when creating a storage container.
* There is no separate "enable RF1" setting outside of selecting RF1 at container creation; once selected, it applies directly.
Prism UI Navigation Path:
Storage > Storage Containers > Create Storage Container > Data Redundancy Level # Select "RF1" Official Reference:
* Nutanix Bible - Storage Layer and RF Explanation
* Nutanix Storage Administration Guide - "Creating Containers with Specific Replication Factor"
* Excerpt: "RF1 is typically used for workloads with native redundancy. It must be selected explicitly during container creation."
Conclusion: Only option B accurately reflects this process.

NEW QUESTION # 55
An administrator is configuring Erasure Coding on a Redundancy Factor 2 cluster.
How many nodes, at a minimum, are necessary?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

For a cluster with Redundancy Factor 2 (RF2), at least 4 nodes are required to configure Erasure Coding.
Erasure Coding (EC) distributes data and parity across nodes to improve storage efficiency while maintaining data protection. RF2 requires a minimum of 4 nodes to ensure sufficient space for data and parity distribution.
Other options:
* 3 nodes: Insufficient for EC with RF2.
* 5 and 6 nodes: Can support EC, but the minimum requirement is 4.

Nutanix Administration Guide - Erasure Coding Configuration.
Nutanix Storage Concepts Documentation.

NEW QUESTION # 56
Which bridge does the Controller VM use by default to communicate with the AHV host it runs on?

- A. bridge0
- B. virbr0
- C. vs0
- D. br0

Answer: A

NEW QUESTION # 57

An administrator needs to license a new AOS-based cluster with no add-on packages via Nutanix Cloud Platform Package Licensing.

What license type would fulfill this requirement?

- A. Nutanix Cloud Infrastructure (NCI)
- B. Nutanix Unified Storage (NUS)
- C. Nutanix Database Service (NDB)
- D. Nutanix Cloud Manager (NCM)

Answer: A

Explanation:

To license a new AOS-based cluster with no add-on packages, the appropriate license type isNutanix Cloud Infrastructure (NCI).
The NCI license provides the fundamental capabilities required for Nutanix clusters, including:
* Storage and data management.
* Core virtualization features.
* Compute resources for workloads.
NCI is designed for organizations that need the essential features of the Nutanix platform without additional add-ons such as database services (NDB) or advanced storage options (NUS).
Other options:
* A. Nutanix Cloud Manager (NCM):Focuses on management capabilities for multi-cloud and operational tasks, not core infrastructure licensing.
* C. Nutanix Unified Storage (NUS):Specifically provides unified file and object storage capabilities, not relevant for a base AOS cluster.
* D. Nutanix Database Service (NDB):A dedicated licensing tier for database management features.

NEW QUESTION # 58

What is the purpose of the Recycle Bin?

- A. Centralizes the deleted data from the different VMs in the cluster.
- B. Keeps deleted VMs for 24 hours for recovery.
- C. Allows administrators to undo the last five actions.
- D. Stores the OpLog's most recent deleted data in case of a CVM failure.

Answer: B

NEW QUESTION # 59
