SAP C_BCBDC_2505 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none">• SAP Business Data Cloud: This section of the exam measures the skills of Data Analysts and covers core concepts of the SAP Business Data Cloud. Candidates are expected to understand its key components, integration mechanisms, and how it functions as a foundation for unified data management across SAP and non-SAP environments. The focus is on enabling data connectivity and providing governed access to data across the enterprise.
주제 2	<ul style="list-style-type: none">• SAP Datasphere: This section of the exam measures the skills of Solution Consultants and covers a comprehensive understanding of SAP Datasphere. Candidates should demonstrate knowledge of data modeling, transformation, and harmonization using SAP Datasphere tools. It evaluates how well they can work with data layer structuring, semantic modeling, and integration to support real-time data access for various business applications.
주제 3	<ul style="list-style-type: none">• SAP Analytics Cloud: This section of the exam measures the skills of Data Analysts and covers the use of SAP Analytics Cloud in data visualization, story building, and dashboard creation. Candidates should be familiar with its planning and predictive capabilities, along with how to utilize data insights to drive business decision-making. It also includes managing user access and collaborating through shared analytics assets.

최신 SAP Certified Associate C_BCBDC_2505 무료샘플문제 (Q68-Q73):

질문 # 68

A company wants to enable self-service data access for analysts while maintaining centralized control over source data. Which SAP Business Data Cloud capabilities help meet these requirements?

There are 3 correct answers to this question.

Response:

- A. Data replication via CSV uploads
- B. Role-based access management
- C. Remote table access to avoid duplication
- D. Exporting data to Excel for distribution
- E. Business Builder for semantic modeling

정답: B,C,E

질문 # 69

Which component of SAP Business Data Cloud allows for the creation of data models?

Please choose the correct answer.

Response:

- A. Data Monitor
- B. Data Marketplace
- C. Data Builder
- D. Data Catalog

정답: C

질문 # 70

What can help prevent data input for invalid member combinations across dimensions?

Please choose the correct answer.

Response:

- A. Validation Rules
- B. Data Locking

- C. Data Actions

정답: A

질문 # 71

Which entity can be used as a direct source of an SAP Datasphere analytic model?

- A. Views of semantic type Fact
- B. Tables of semantic type Hierarchy
- C. Remote tables of semantic type Text
- D. Business entities of semantic type Dimension

정답: A

설명:

An SAP Datasphere analytic model is specifically designed for multi-dimensional analysis, and as such, it requires a central entity that contains the measures (key figures) to be analyzed and links to descriptive dimensions. Therefore, a View of semantic type Fact (B) is the most appropriate and commonly used direct source for an analytic model. A "Fact" view typically represents transactional data, containing measures (e.g., sales amount, quantity) and foreign keys that link to dimension views (e.g., product, customer, date). While "Dimension" type entities (A) provide descriptive attributes and are linked to the analytic model, they are not the direct source of the model itself. Tables of semantic type Hierarchy (C) are used within dimensions, and remote tables of semantic type Text (D) typically provide text descriptions for master data, not the core fact data for an analytic model. The Fact view serves as the central point for an analytic model's measures and its connections to all relevant dimensions.

질문 # 72

Which operation is implemented by the Foundation Services of SAP Business Data Cloud?

- A. Storage of raw data inside a CDS view.
- B. Generation of an analytic model by adding semantic information.
- C. Data transformation and enrichment to generate a data product.
- D. Execution of machine learning algorithms to generate additional insights.

정답: C

설명:

The Foundation Services component of SAP Business Data Cloud (BDC) is responsible for orchestrating the fundamental processes of data preparation and productization. Specifically, a key operation implemented by Foundation Services is data transformation and enrichment to generate a data product. Foundation Services takes raw data ingested from various business applications and applies necessary transformations, cleanses it, and enriches it with additional context or calculated attributes. This process is crucial for creating high-quality, consumable data products, which are curated and semantically rich datasets designed for specific business use cases. While machine learning algorithms are executed by Intelligent Applications (which consume these data products), and analytic models are built in SAP Datasphere (which is part of the BDC ecosystem), Foundation Services focuses on the foundational work of preparing and productizing the data itself, ensuring it's ready for advanced analytics and consumption.

질문 # 73

.....

C_BCBDC_2505인증시험패스는 쉬운 일은 아닙니다. 높은 전문지식은 필수입니다. 하지만 자신은 이 방면 지식이 없다면 KoreaDumps가 도움을 드릴 수 있습니다. KoreaDumps의 전문가들이 자기만의 지식과 지금까지의 경험으로 최고의 IT인증관련자료를 만들어 여러분들의 고민을 해결해드릴 수 있습니다. 우리는 최고의C_BCBDC_2505인증 시험문제와 답을 제공합니다. KoreaDumps는 최선을 다하여 여러분이 한번에C_BCBDC_2505인증시험을 패스하도록 도와드릴 것입니다. 여러분은 우리 KoreaDumps 선택함으로 일석이조의 이익을 누릴 수 있습니다. 첫째는 관여 지식은 아주 알차게 공부하실 수 있습니다.둘째는 바로 시험을 안전하게 한번에 통과하실 수 있다는 거죠.그리고 우리는 일년무료 업데이트서비스를 제공합니다.덤프가 업뎃이되면 우리는 모두 무료로 보내드립니다.만약 시험에서 실패한다면 우리 또한 덤프비용전액을 환불해 드립니다.
