CONFIDENTIAL

CD/JUL 2024/CSC207/204

UNIVERSITI TEKNOLOGI MARA
FINAL EXAMINATION

COURSE	: FUNDAMENTALS OF OPERATING SYSTEMS / PRACTICAL APPROACH OF OPERATING SYSTEMS	
COURSE CODE	: CSC207/204	LEHNY YUSRINA BINTI BUJANG KHEOH Pensyarah Kanan Kolej Pengajian Pengkomputeran, Informatik Dan Matematik Universiti Teknologi MARA Cawangan Sarawak
EXAMINATION	: JULY 2024	
TIME	: 3 HOURS	

INSTRUCTIONS TO CANDIDATES

1. This question paper consists of two (2) parts: PART A (20 Questions)
PART B (7 Questions)
2. Answer ALL questions from all two (2) parts:
 - i. Answer PART A and PART B in the Answer Booklet. Start each answer on a new page.
3. Do not bring any material into the examination room unless permission is given by the invigilator.
4. Please check to make sure that this examination pack consists of:
 - i. the Question Paper
 - ii. an Answer Booklet – provided by the Faculty
5. Answer ALL questions in English.

DO NOT TURN THIS PAGE UNTIL YOU ARE TOLD TO DO SO

This examination paper consists of 11 printed pages

Pass4Test Implementing and Operating Cisco Security Core Technologies Certification Exam come in three different formats so that the users can choose their desired design and prepare Implementing and Operating Cisco Security Core Technologies (350-701) exam according to their needs. The first we will discuss here is the PDF file of real Implementing and Operating Cisco Security Core Technologies (350-701) exam questions. It can be taken to any place via laptops, tablets, and smartphones. In addition, you can print these Implementing and Operating Cisco Security Core Technologies (350-701) PDF questions for paper study in this format of Pass4Test product frees you from restrictions of time and place as you can study 350-701 exam questions from your comfort zone in your spare time.

Cisco 350-701 exam is a challenging exam that requires candidates to have a solid understanding of security concepts and hands-on experience in implementing and operating Cisco's security solutions. 350-701 exam is designed to validate the candidate's ability to implement and operate Cisco's security solutions in real-world scenarios. Implementing and Operating Cisco Security Core Technologies certification exam is a crucial step for IT professionals who want to advance their careers in network security and demonstrate their competence and expertise in implementing and operating Cisco's security technologies.

Who Should Take Cisco 350-701 Exam?

Test 350-701 is for those willing to discover more about how Cisco network security systems work and aiming to earn the Cisco Specialist – Security Core certification or any of the related higher-level certificates. Also, it covers network access and visibility and

thus is ideal for network engineers and designers, as well as security engineers, system engineers, or network managers.

When it comes to prerequisites, the vendor doesn't have any mandatory conditions. However, it is important that the candidate has some prior experience using basic Cisco network security. Also, the understanding of networking fundamentals or consistent knowledge equivalent to Cisco CCNA is recommended.

Cisco 350-701 Exam is a comprehensive test that evaluates the knowledge and skills of candidates in implementing and operating Cisco Security Core Technologies. Passing 350-701 exam is a prerequisite for obtaining the CCNP Security certification, which is highly valued in the industry. Candidates who want to take 350-701 exam must have a deep understanding of security concepts and best practices, as well as a solid understanding of Cisco technologies.

Implementing and Operating Cisco Security Core Technologies exam training solutions & 350-701 latest practice questions & Implementing and Operating Cisco Security Core Technologies free download material

The most notable feature of our 350-701 learning quiz is that they provide you with the most practical solutions to help you learn the exam points of effortlessly and easily, then mastering the core information of the certification course outline. Their quality of our 350-701 Study Guide is much higher than the quality of any other materials, and questions and answers of 350-701 training materials contain information from the best available sources.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q463-Q468):

NEW QUESTION # 463

Drag and drop the Firepower Next Generation Intrusion Prevention System detectors from the left onto the correct definitions on the right.

Answer:

Explanation:

Explanation:

NEW QUESTION # 464

What is the purpose of the Decrypt for Application Detection feature within the WSA Decryption options?

- A. It decrypts HTTPS application traffic for authenticated users.
- B. It alerts users when the WSA decrypts their traffic.
- **C. It provides enhanced HTTPS application detection for AsyncOS.**
- D. It decrypts HTTPS application traffic for unauthenticated users.

Answer: C

Explanation:

The Decrypt for Application Detection feature within the WSA Decryption options enhances the ability of AsyncOS to detect HTTPS applications. The HTTPS Proxy can decrypt HTTPS connections to web applications. This allows the Application Visibility and Control (AVC) engine to more accurately detect and block web applications that use HTTPS. This feature can help improve the security and performance of the network by identifying and controlling the usage of web applications that may consume bandwidth, pose security risks, or violate compliance policies.

NEW QUESTION # 465

Refer to the exhibit.

Refer to the exhibit. What function does the API key perform while working with <https://api.amp.cisco.com/v1/computers?>

- A. HTTP authorization
- B. plays dent ID
- C. imports requests
- **D. HTTP authentication**

Answer: D

NEW QUESTION # 466

Which protocol provides the strongest throughput performance when using Cisco AnyConnect VPN?

- A. TLSv1.1
- B. DTLSv1
- **C. BJTLSv1**
- D. TLSv1.2

Answer: C

NEW QUESTION # 467

Which Cisco command enables authentication, authorization, and accounting globally so that CoA is supported on the device?

- A. ip device-tracking
- B. aaa new-model
- C. auth-type all
- **D. aaa server radius dynamic-author**

Answer: D

Explanation:

The aaa server radius dynamic-author command enables authentication, authorization, and accounting (AAA) globally on the device so that Change of Authorization (CoA) is supported. CoA is a feature that allows an external AAA server to dynamically change the attributes of a user session after it is authenticated. For example, the AAA server can send a CoA request to reauthenticate a user, terminate a session, or apply a new policy. The aaa server radius dynamic-author command specifies the IP address and port number of the device that listens for CoA requests from the AAA server. The command also configures the shared secret key that is used to encrypt the communication between the device and the AAA server¹².
