**SIMULATION**

A storage administrator needs to group Volume-1 and Volume-2 for consistency. The group should have a snapshot every day that is retained for 25 hours.

Use the simulator to make this configuration change.

When you have finished continue to the next question.

**Answer:**

Explanation:

See the steps in Explanation

Explanation:

1. Open the simulator and log in with the default credentials: admin/Password123#.
2. Select Storage>Volumes from the left menu.
3. Select Volume-1 and Volume-2 from the list of volumes and click Group.
4. Enter a name for the volume group, such as Consistent-Group, and click Create.
5. Select Protection>Protection Policies from the left menu.
6. Click + CREATE to launch the Create Protection Policy wizard.
7. Enter a name for the protection policy, such as Daily-Snapshot, and click Next.
8. Click + CREATE to create a new snapshot rule for the policy.
9. Enter a name for the snapshot rule, such as Daily-Rule, and click Next.
10. Select All Days for the days to run the rule and Time of day for the frequency. Enter 00:00 as the start time and click Next.
11. Enter 25 as the retention hours and click Next.

12. Review the summary and click **Finish** to create the snapshot rule.
13. Click **Next** to continue the protection policy wizard.
14. Review the summary and click **Finish** to create the protection policy.
15. Select **Storage > Volume Groups** from the left menu.
16. Select **Consistent-Group** from the list of volume groups and click **Edit**.
17. Click **Protection Policy** and select **Daily-Snapshot** from the drop-down list. Click **Save**.
18. The volume group is now configured with a protection policy that creates a snapshot every day at 00:00 and retains it for 25 hours.
