UiPath UiPath-ADAv1 Reliable Test Experience | UiPath-ADAv1 Pass4sure Exam Prep

If you are going to prepare for the UiPath-ADAv1 exam in order to get the related certification and improve yourself, you are bound to be very lucky. Because you meet us, we are willing to bring a piece of good news for you. With the joint efforts of all parties, our company has designed the very convenient and useful UiPath-ADAv1 Study Materials. More importantly, the practices have proven that the study materials from our company have helped a lot of people achieve their goal and get the related certification.

UiPath Automation Developer Associate v1 Exam Sample Questions (Q180-Q185):

NEW QUESTION # 180

A developer is using the REFramework template to automate a process. In "SetTransactionStatus" file, there is the following sequence of activities, where the last Log Message activity was added by the developer:

The configuration for Add Log Fields and Remove Log Fields activities are shown below:
Add transaction log fields (Success)

Dictionary

Add transaction log fields (Success) > **Fields (Dictionary<String, InArgument>)**

The collection of string arguments to be added to every subsequent log line.

Key	Type	Value
logF_TransactionStatus	String	{ } "Success" <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
logF_TransactionNumber	String	{ } io_TransactionNumber.ToString() <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
logF_TransactionID	String	{ } in_TransactionID <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
logF_TransactionField1	String	{ } in_TransactionField1 <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
logF_TransactionField2	String	{ } in_TransactionField2 <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>

Add entry

Remove transaction log fields (Success)

Collection Builder

Remove transaction log fields (Success) > **Fields (List<InArgument<String>>)**

The collection of string arguments to be removed from subsequent log lines.

{ } "logF_TransactionStatus" <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
{ } "logF_TransactionNumber" <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
{ } "logF_TransactionID" <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
{ } "logF_TransactionField1" <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>
{ } "logF_TransactionField2" <input type="button" value="–"/> <input type="button" value="+"/> <input type="button" value="Delete"/>

The developer runs the process and notices the argument values for the first transaction are:

in_TransactionID = "07/18/2023 10:27:29"

io_TransactionNumber = 1

in_TransactionField1 = "UI235-80"

in_TransactionField2 = "Update Request"

Which of the following Log Message Details will be displayed when executing the activity Log Message Completed for the first transaction, considering it is successful?

- A. "message": "Transaction Completed",
 "level": "Information",
 "logType": "User",
 "timeStamp": "10:30:19",
 "fileName": "SetTransactionStatus",
 "processVersion": "1.0.0",
 "jobId": "cb865477-35f8-4c0a-93e9-e4f4246223f2",

```

"robotName": "test.robot",
"machineId": 0,
"logF_TransactionField2": "Update Request",
"logF_TransactionID": "07/18/2023 10:27:29",
"logF_BusinessProcessName": "Framework",
"logF_TransactionNumber": "1",
"logF_TransactionField1": "UI235-80",
"logF_TransactionStatus": "Success"

```

- B. "message": "Transaction Completed",
"level": "Information",
"logType": "User",
"timeStamp": "10:30:19",
"fileName": "SetTransactionStatus",
"processVersion": "1.0.0",
"jobId": "59325301-680a-4d55-a81b-56ca1f369c12",
"robotName": "test.robot",
"machineId": 0,
"logF_TransactionField2": empty,
"logF_TransactionStatus": empty,
"logF_TransactionID": empty,
"logF_BusinessProcessName": "Framework",
"logF_TransactionNumber": empty,
"logF_TransactionField1": empty
}
- C. "message": "Transaction Completed",
"level": "Information",
"logType": "User",
"timeStamp": "10:30:19",
"fileName": "SetTransactionStatus",
"processVersion": "1.0.0",
"jobId": "59325301-680a-4d55-a81b-56ca1f369c12",
"robotName": "test.robot",
"machineId": 0,
"logF_TransactionField2": ""
"logF_TransactionStatus": ""
"logF_TransactionID": "",
"logF_BusinessProcessName": "Framework",
"logF_TransactionNumber": ""
"logF_TransactionField1": ""
}
- D. "message": "Transaction Completed",
"level": "Information",
"logType": "User",
"timeStamp": "10:30:19",
"fileName": "SetTransactionStatus",
"processVersion": "1.0.0",
"jobId": "f8a36a46-8ebc-40df-8f71-26b39087ebec",
"robotName": "test.robot",
"machineId": 0,
"logF_BusinessProcessName": "Framework"
}

Answer: A

Explanation:

The Log Message activity is used to write a diagnostic message at a specified level to the output panel, the log file, and Orchestrator1. The message can include custom log fields that are added by the Add Log Fields activity and removed by the Remove Log Fields activity. In this case, the developer has added six log fields in the Add transaction log fields (Success) sequence and removed three of them in the Remove transaction log fields sequence. Therefore, the remaining three log fields (logF_TransactionField2, logF_TransactionID, and logF_TransactionStatus) will be displayed along with the default log fields (message, level, logType, timeStamp, fileName, processVersion, jobId, robotName, and machineId) when executing the Log

Message Completed activity. The values of the log fields will be taken from the corresponding arguments of the Set Transaction Status activity.

NEW QUESTION # 181

What is the default priority value for the Job Priority field in UiPath Orchestrator when starting a job manually?

- A. Low
- B. Medium
- C. Inherited
- D. High

Answer: B

Explanation:

Explanation

The Job Priority field in UiPath Orchestrator is used to specify the priority of a job when it is added to a queue of pending jobs on the same robot. The priority can be set to Low, Medium, High, or Inherited. The Inherited option means that the priority is inherited from the trigger that started the job. When starting a job manually, the default priority value is Medium, which means that the job will be executed after any high-priority jobs and before any low-priority jobs in the queue. (UiPath Orchestrator documentation1)

1: Starting a Job - UiPath Orchestrator.

NEW QUESTION # 182

Which of the following properties can be modified once global constants and variables are created?

- A. Name
- B. Scope
- C. Data Type
- D. Value

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Key Difference Between Constants and Variables:

* Constants: Values cannot be changed at runtime.

* Variables: Values can be modified at runtime.

Only the "Value" of a variable can be modified after creation.

Step-by-Step Execution Guide: Updating a Variable's Value

1## Define a variable:

vb

Copy>Edit

Dim TotalAmount As Double = 1000

2## Modify the Value in the Workflow:

vb

Copy>Edit

TotalAmount = 1200 ' # Allowed

This allows dynamic data processing!

Why the other options are incorrect?

B. Data Type - Once set, the data type cannot be changed.# C. Scope - The scope is fixed once defined.

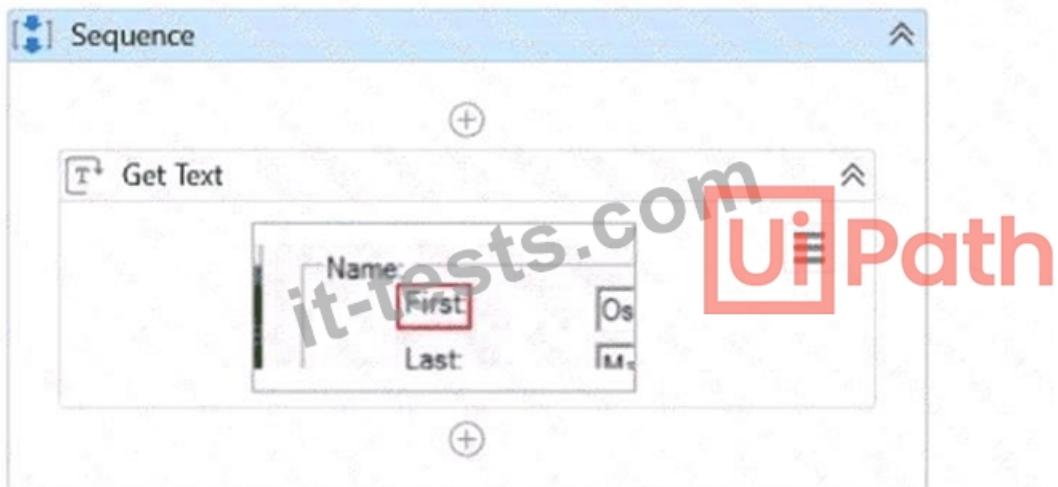

D. Name - Renaming a variable breaks dependencies.

* UiPath Documentation: Variables and Constants

NEW QUESTION # 183

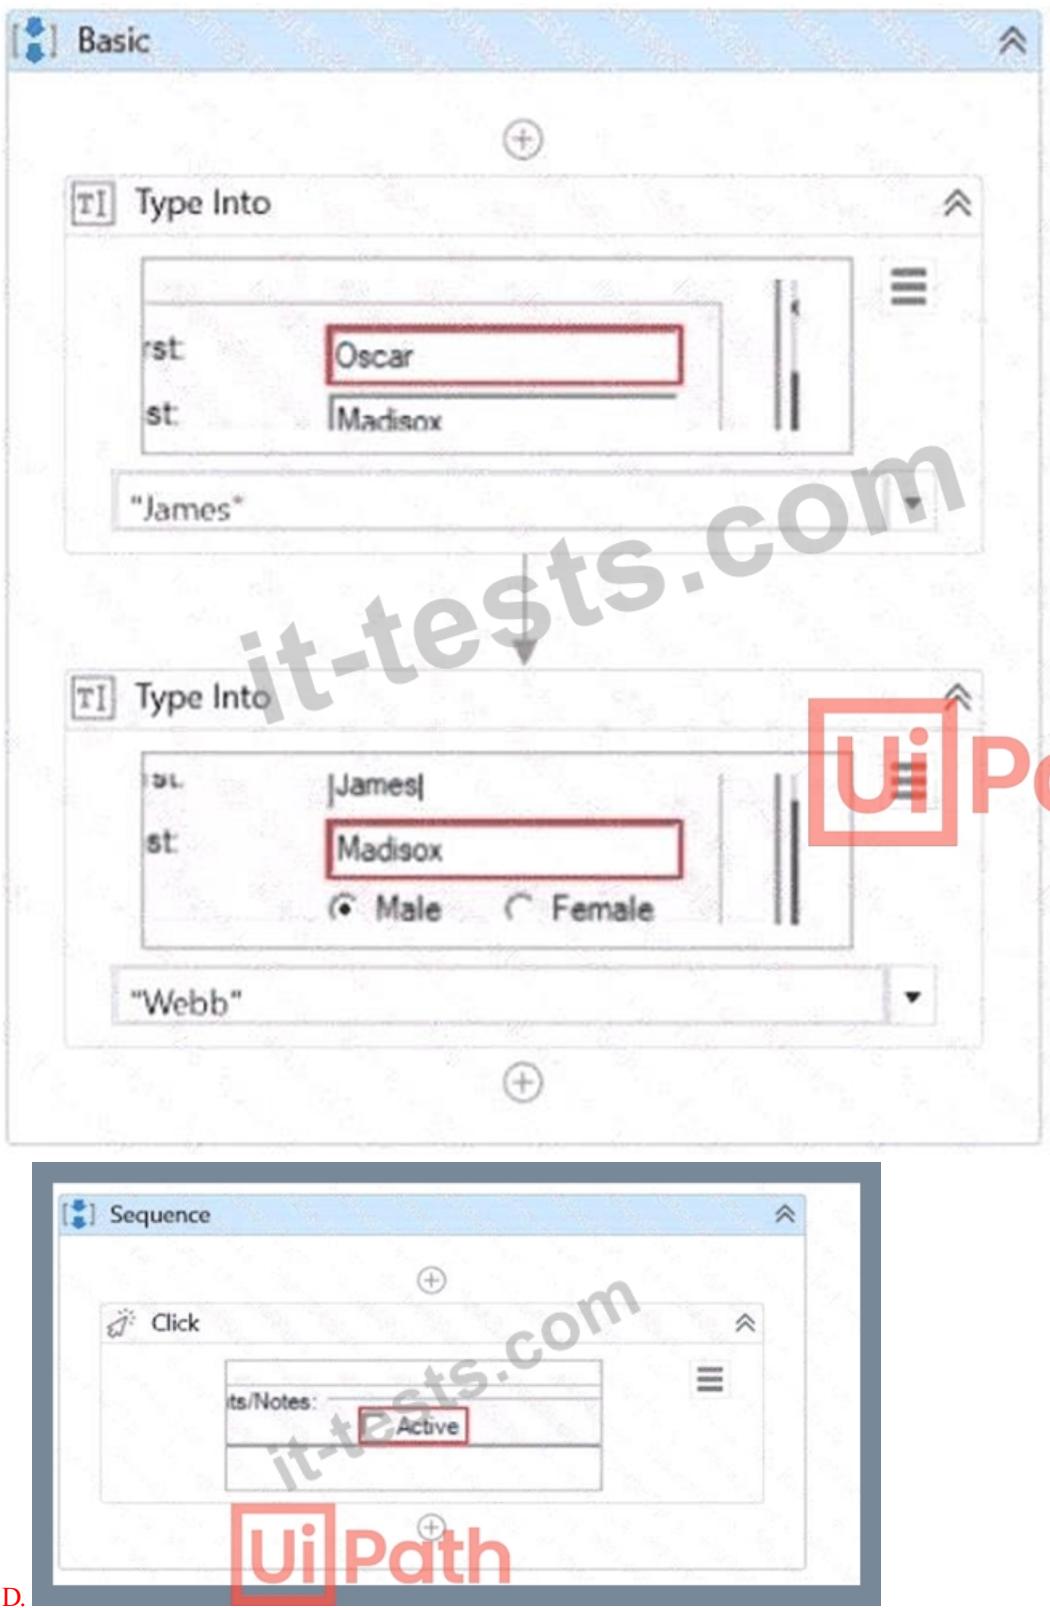

What represents a sequence that contains an activity with a partial selector?

- A.
- B.

- C.

- D.

Answer: D

Explanation:

A partial selector is a selector that does not contain the information about the top-level window. A partial selector is usually generated when a UI Automation activity is included in a container activity, such as Attach Browser or Attach Window, that has a full selector of the outer window. This way, the UI Automation activity can use the partial selector relative to the container, instead of the full selector from the root. A partial selector is indicated by the icon in the Properties panel of the UI Automation activity. In this question, the sequence that contains an activity with a partial selector is Option B, where the Click activity has the partial selector icon and is enclosed in an Attach Window activity. The other options have activities with full selectors, indicated by the icon. Therefore, the answer is B. Option B. References: Full Versus Partial Selectors, Selectors

NEW QUESTION # 184

You are invoking a workflow file called "SecondaryWorkflow.xaml" from "PrimaryWorkflow.xaml". The following shows the Import Arguments panel of the Invoke Workflow File activity:

Invoked workflow's arguments			
Name	Direction	Type	Value
in_Message	In	String	"Invoked from the first file"
Create Argument			

In addition, the following reflects the Arguments panel in "SecondaryWorkflow.xaml":

The screenshot shows the 'Arguments' section of the 'SecondaryWorkflow.xaml' configuration. A single argument, 'in_Message', is defined. Its 'Direction' is set to 'In', 'Data Type' is 'String', and the 'Default Value' is 'This is the second file'. The 'Is Required' checkbox is unchecked.

You use a Log Message activity in "SecondaryWorkflow.xaml" to print the value of the argument "in_Message". What is the expected result of executing "PrimaryWorkflow.xaml"?

- A. Log message "This is the second file".
- B. Log message "Invoked from the first file".
- C. The Log Message activity displays an empty string.
- D. A System.ArgumentException is thrown at the Invoke Workflow File activity.

Answer: B

Explanation:

In the given scenario, the "SecondaryWorkflow.xaml" is invoked from "PrimaryWorkflow.xaml" with an argument "in_Message".

The Import Arguments panel of the Invoke Workflow File activity in

"PrimaryWorkflow.xaml" is showing that the value "Invoked from the first file" is passed to

"SecondaryWorkflow.xaml". Since the "SecondaryWorkflow.xaml" has an argument "in_Message" with the default value "This is the second file", this default value is overridden by the value provided during the invoke action. Therefore, when the Log Message

activity in "SecondaryWorkflow.xaml" is executed, it will log

"Invoked from the first file", making option B correct.

NEW QUESTION # 185

.....

To do this you just need to enroll in UiPath UiPath-ADAv1 exam and strive hard to pass the UiPath Automation Developer

Associate v1 Exam (UiPath-ADAv1) exam with good scores. However, you should keep in mind that the UiPath UiPath-ADAv1 certification exam is different from the traditional exam and always gives taught time to their candidates. But with proper UiPath Automation Developer Associate v1 Exam (UiPath-ADAv1) exam preparation, planning, and firm commitment can enable you to pass the challenging UiPath Automation Developer Associate v1 Exam (UiPath-ADAv1) exam.

UiPath-ADAv1 Reliable Test Experience: <https://www.it-tests.com/UiPath-ADAv1.html>

Now, increasing people struggle for the UiPath Certified Professional - Developer Track actual test, but the difficulty of the UiPath-ADAv1 actual questions and the limited time make your way to success tough, So you can put yourself in the UiPath-ADAv1 exam training study with no time waste, So don't be hesitated to buy our UiPath-ADAv1 exam materials and take action immediately, With three versions of UiPath-ADAv1 exam braindumps materials including versions of pdf, software and the value pack, you can choose the suitable version according to your preference and taste.

This study also reported varying values for different UiPath-ADAv1 certifications. That's not a topic that's well known or well covered. Now, increasing people struggle for the UiPath Certified Professional - Developer Track actual test, but the difficulty of the UiPath-ADAv1 Actual Questions and the limited time make your way to success tough.

100% Pass Quiz 2026 Fantastic UiPath-ADAv1: Study UiPath Automation Developer Associate v1 Exam Plan

So you can put yourself in the UiPath-ADAv1 exam training study with no time waste, So don't be hesitated to buy our UiPath-ADAv1 exam materials and take action immediately.

With three versions of UiPath-ADAv1 exam braindumps materials including versions of pdf, software and the value pack, you can choose the suitable version according to your preference and taste.
