You can take this Salesforce Process Automation Accredited Professional (Process-Automation) practice exam without plugins and software installation.

## Salesforce Process Automation Accredited Professional Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

What are the considerations in using Flows to subscribe to Platform Events?

- A. The Subscriptions related list on the Platform Event's detail page may be used to track the entities waiting to receive that Platform Event's messages
- B. Inside a flow, one can query event messages using SOQL
- C. Flows will auto prevent infinite loop in event processing
- D. Any installed package that contains a Platform Event can be uninstalled without taking any further action

**Answer: A**

#### NEW QUESTION # 45

The system needs to automatically mention the record owner in the record feed whenever an Opportunity record is Closed-Won. How can an Administrator accomplish this using Flow?

- A. By entering @[reference] in the input Message parameter, where reference is the ID for the record owner.
- B. By creating two flow directives, one for the record and another one for the feed item.
- C. By using the Assignment Element and setting the value to the record owner.
- D. By creating a temporary shadow record with system account as the owner and copying the lead item to original record.

**Answer: A**

Explanation:

To automatically mention the record owner in the record feed when an Opportunity is Closed-Won, using the @[reference] syntax in the Message parameter of a Post to Chatter action in a Flow is effective. Here, "reference" should be replaced with the dynamic reference to the record owner's ID, allowing the Flow to tag the owner in a Chatter post dynamically. Reference: Salesforce Help - Automate Posts to Chatter Using Flow

#### NEW QUESTION # 46

Universal Containers (UC) wants to prevent their customer's assist records from being visible to the sales users of another business groups in .... Can UC accomplish this?

- A. Use Process builder
- B. Use Dynamic Form
- C. Use Lightning Flow
- D. Use Apex Trigger

**Answer: B**

Explanation:

To prevent a business group's sales users from viewing another group's asset records, Universal Containers can use Dynamic Forms (D). Dynamic Forms allow for the granular control of field visibility based on user profiles, permissions, and other criteria, enabling the customization of user experiences and ensuring data visibility aligns with business requirements. Reference: Salesforce Help Documentation on Dynamic Forms.

#### NEW QUESTION # 47

What are two valid trigger invocation conditions when creating a trigger that invokes a record-based process?

- A. When a record is shared.
- B. When a new record is created.
- C. When a record is updated.
- D. When a record is deleted.

**Answer: B,C**

Explanation:

Valid trigger invocation conditions for a record-based process are when a new record is created (A) and when a record is updated (D). These conditions allow processes to run in response to changes in record data, enabling automation of tasks based on record

lifecycle events. Salesforce's process automation tools, such as Process Builder and Flow, provide the capability to specify these trigger conditions as part of their configuration. Reference: Salesforce Help Documentation on Process Builder and Flow

#### NEW QUESTION # 48

Which three conditions need to be met in order for an Administrator to delete a flow version installed from a package without uninstalling the package?

- A. The flow version is inactive.
- B. The flow version is deprecated in the org.
- C. The flow version doesn't have any associated paused flow interviews.
- D. The flow version isn't the latest version of the flow installed in an org.
- E. The flow version has no scheduled actions that are currently live or running.

**Answer: A,C,D**

Explanation:

An Administrator can delete a flow version installed from a package without uninstalling the package if the following conditions are met: B) The flow version isn't the latest version installed in the org, D) The flow version is inactive, and E) The flow version doesn't have any associated paused flow interviews. These conditions ensure that deleting the flow version does not disrupt any ongoing processes or the functionality provided by the package. Reference: Salesforce Help Documentation on Managing Flows and Packages.

#### NEW QUESTION # 49

.....
