If you are interested in ITdumpsfree's training program about Cisco certification 300-710 exam, you can first on [WWW.ITdumpsfree.COM](http://WWW.ITdumpsfree.COM) to free download part of the exercises and answers about Cisco Certification 300-710 Exam as a free try. We will provide one year free update service for those customers who choose ITdumpsfree's products.

Cisco Firepower NGFW is a unified threat management platform that combines firewall, VPN, URL filtering, and other security functions into a single device. The IPS feature provides real-time protection against known and unknown threats, while the AMP feature uses advanced machine learning algorithms to detect and block malware. The 300-710 Exam covers these technologies and their integration with other Cisco security solutions.

## 2026 Cisco Unparalleled Test 300-710 Online Pass Guaranteed Quiz

Cisco 300-710 exam materials are successful with high efficiency and high quality to navigate you throughout the process. If you pay attention to using our 300-710 practice engine, thing will be solved easily. We have favorable quality reputation in the mind of exam candidates these years by trying to provide high quality Securing Networks with Cisco Firepower 300-710 Study Guide with the lowest prices while the highest quality.

Cisco 300-710 certification exam is a valuable certification that demonstrates an individual's expertise in securing networks using Cisco Firepower Threat Defense technology. Securing Networks with Cisco Firepower certification is suitable for individuals who want to pursue a career in network security and IT. 300-710 Exam covers critical topics related to network security and requires extensive preparation and study. Individuals preparing for the exam should consider taking training courses offered by Cisco or other reputable training providers to enhance their skills and knowledge.

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q206-Q211):

NEW QUESTION # 206

A company is deploying intrusion protection on multiple Cisco FTD appliances managed by Cisco FMC. Which system-provided policy must be selected if speed and detection are priorities?

- A. Connectivity Over Security
- B. Maximum Detection
- **C. Balanced Security and Connectivity**
- D. Security Over Connectivity

**Answer: C**

#### NEW QUESTION # 207

What is a result of enabling Cisco FTD clustering?

- **A. Site-to-site VPN functionality is limited to the master unit, and all VPN connections are dropped if the master unit fails.**
- B. All Firepower appliances can support Cisco FTD clustering.
- C. Integrated Routing and Bridging is supported on the master unit.
- D. For the dynamic routing feature, if the master unit fails, the newly elected master unit maintains all existing connections.

**Answer: A**

#### NEW QUESTION # 208

A network engineer is deploying a Cisco Firepower 4100 appliance and must configure a multi-instance environment for high availability. Drag and drop the actions from the left into sequence on the right for this configuration.

**Answer:**

Explanation:

Explanation:

The correct sequence of actions for configuring a multi-instance environment for high availability on a Cisco Firepower 4100 appliance is as follows:

- \* Add a resource profile for container instances. A resource profile defines the CPU, RAM, and disk space allocation for each container instance. You can create multiple resource profiles with different resource settings and assign them to different container instances1.
- \* Add a MAC pool prefix and view the MAC address for the container instance interfaces. A MAC pool prefix is a 24-bit prefix that is used to generate MAC addresses for the container instance interfaces. You can specify a custom MAC pool prefix or use the default one. You can also view the MAC addresses that are assigned to each container instance interface1.
- \* Configure interfaces. You need to configure the physical interfaces, EtherChannels, and VLAN subinterfaces that will be used by the container instances. You can also configure shared interfaces that can be used by multiple container instances on the same security module/engine1.
- \* Add a Standalone Firepower Threat Defense for Cisco Secure Firewall Management Center. You need to add a logical device that runs a standalone Firepower ThreatDefense (FTD) application instance and register it with the Cisco Secure Firewall Management Center (FMC). This logical device will act as the management interface for the container instances1.
- \* Add a high-availability pair. You need to add another logical device that runs a standalone FTD application instance and register it with the FMC as well. Then, you need to configure high availability (HA) between the two standalone FTD logical devices. This will enable HA for the container instances that are associated with them1.

#### NEW QUESTION # 209

Drag and drop the steps to restore an automatic device registration failure on the standby Cisco FMC from the left into the correct order on the right. Not all options are used.

**Answer:**

Explanation:

### NEW QUESTION # 210

An engineer is configuring multiple Cisco FTD appliances (or use in the network. Which rule must the engineer follow while defining interface objects in Cisco FMC for use with interfaces across multiple devices?

- A. Interface groups can contain interfaces from many devices.
- B. Interface groups can contain multiple interface types
- C. Two security zones can contain the same interface
- D. An interface cannot belong to a security zone and an interface group

**Answer: A**

Explanation:
